General Comment

To whom it may concern:

Socially Responsible Investing and the screening of companies for their Environmental, Social, and Governance performance is growing more popular year after year. People like me invest in Socially Responsible portfolios because of their unique values. We want to invest in companies that are doing well WHILE DOING GOOD, and that align with what we believe in -- ethical corporate behavior, protection of the environment and a humanitarian ethos. ESG screening can help us achieve this. Please allow us to continue doing so.
