General Comment

Why are you questioning Americans ability to invest our money in SRI accounts? I like the ability to choose Companies that reflect the way I feel ethically and environmentally. To remove this from my portfolio would be saying you know what is best for me. It is my money and I want the ability to invest it in ways that I see fit. Their rates are very competitive to other market sectors. And if I want to ensure that I am funding environmentally and eithically responsible companies, i believe that I should have that right.

Thank you.
