Financial Factors in Selecting Plan Investments

Comment On: EBSA-2020-0004-0002
Financial Factors in Selecting Plan Investments

Document: EBSA-2020-0004-DRAFT-0377
Comment on FR Doc # 2020-13705

Submitter Information

Name: Matthew Balch

General Comment

From what I read, your proposed regulation is completely wrong headed. Why would you want my retirement savings put into dirty fossil fuel, companies that utilize unsound practices or in danger of climate change? Makes no sense to me.

This is no different than selling off national forests to the lumber companies, selling my coasts to oil exploitation, etc., etc.

I am sick of this retrogressive list of actions by this outgoing administration. That is why I do charitable contributions to the NRDC and Sierra Club. They will sue this outgoing administration and they will win those lawsuits again and again.

Thank you for reading this.
