Financial Factors in Selecting Plan Investments

Comment On: EBSA-2020-0004-0002
Financial Factors in Selecting Plan Investments

Document: EBSA-2020-0004-DRAFT-0394
Comment on FR Doc # 2020-13705

Submitter Information

Name: Elle Roberts

General Comment

The DOL's proposed rule to eliminate ESG funds from 401(k)s is harmful, hurtful to workers, and designed to benefit polluters. Protecting the financial interests of retirees is important to preserving the livelihoods of Americans. Removing ESGs from 401(k)s when ESGs have clearly increased in popularity only illustrates how the Trump administration absolutely don't care about the interests and well-being of Americans and only care about its own interests and the interests of irresponsible companies.
