## General Comment

Hello,

As a patriotic citizen who loves this country, I was very disturbed and disappointed to see this proposed rule. Our nation's money including our investments and investment courses of action should not be based solely on financial considerations. Environmental and social considerations must be part of the decision criteria. I do not want to see some Americans becoming rich while our natural resources and other citizens are disregarded. There are many investments and investment courses of action that are financially, environmentally, and socially beneficial and these should be prioritized and encouraged.

I strongly oppose this regulation.

Sincerely,
