General Comment

Please withdraw the proposed new rule regarding environmental, social and governance (ESG) under the Employee Retirement Income Security Act (ERISA).

As Americans, we must have the freedom to to invest our money as we see fit. Choosing plans that further social goals or policy objectives is the right to control our money and our future. Diversity is proven to be a strength in long term investment that is so important in building a retirement nest egg. In addition, reducing the ESG criteria option is reducing competition, which is against the foundation of capitalism.
