Subject: ESG Investment of Pension Funds

Secretary Scalia:

I stand with you in opposition to ESG investments of private citizens hard earned money. I certainly don't want my West Virginia retirement account invested in Chinese companies that produce weapons for the CCP army, nor any ESG investments which always have political strings attached. Investors/investment companies large and small, if not voluntarily, then by force of law, must invest only in funds that are strictly apolitical.

Again, I support your efforts to stop this nonsense.
