General Comment

I want to continue to invest in alignment with my values, and do not want to invest money in products and companies that my values do not support.

Discontinuing the ability to invest in socially responsible companies is a travesty - it makes no sense other than to serve as a political ploy. Please continue to allow me and my family to invest in socially responsible funds.

This is an issue of faith for me, not discrimination, but putting my money where my beliefs are.

Thank you,

Brenda Hartman-Souder
