Submitter Information

Name: Shruti Saxena

General Comment

Hi,

I would like to see my core values for a sustainable planet (which manifests as environmental, social, and governance (ESG) based mutual funds) taken into consideration for investment decision-making by retirement plan fiduciaries.

I want to be able to invest in socially and environment friendly investments which are going to take over the traditional investments in the near future.

Please let us be early adopters on this front and get ahead of the market by standing up for the values we believe in.

Thanks,
Shruti
