Financial Factors in Selecting Plan Investments

Document: EBSA-2020-0004-DRAFT-1102
Comment on FR Doc # 2020-13705

Submitter Information

Name: Anna Lyles

General Comment

I strongly oppose this confusing proposed rule. Retirement plan fiduciaries already have huge pressure, and a duty, to pick financially prudent investments. Data are showing that the most prudent investments are often those that also perform well on ESG screens. People with retirement plans, like me, should be able to pick plans that are more aligned with what we value. This rule will further muddy the playing field.
