## General Comment

Re: EBSA Proposed Rule - Financial Factors in Selecting Plan Investments  
Docket ID: EBSA-2020-0004A, RIN: 1210-AB95

Dear Mr. DeWitt,

I write as an individual participant in a pension plan to strongly oppose the above proposal. I believe that incorporating social justice and climate factors into the selection of plan investments is both moral and economically justifiable. In particular, failure to consider the impact of investments on climate change is critical for our future. I appreciate your consideration of my comment.
