General Comment

Good morning,

I would like to share my opposition to this proposed rule to include environmental and social governance (ESG) requirements as part of the "single fiduciary focus" under which fund managers must act within the ERISA. Fund managers and clients should be allowed the freedom to select investments that fit their financial goals. ESG investing adds risk to their portfolios unnecessarily, and may require them to invest their monies in initiatives that investors would not otherwise support financially.

Thank you for your consideration,
Jennifer
