General Comment

Thank you for taking comments on this topic.

I am in support of the rule being brought forward to protect retirement and investment accounts from ESG. I am an older woman very close to retirement age and from my view the environment and social agendas are destroying everything they touch without helping either the environment or any social issues. Please use your common sense and accept the proposed rule to protect our investment accounts from these ideals. The accounts should benefit the investors or owners of the accounts and not managers making decisions based on their agendas.
