## General Comment

Federal Registrar John smith,

Workers' and retirees' savings should be able to be invested in safe and sustainable ways that promote healthy returns, a healthy economy, and a healthy society and planet. That means ensuring that the updated rules fully reverse the Trump-era rules by eliminating all prohibitions and burdens that discourage retirement plans from considering workplace safety, climate impact, racial equity and other conditions that affect the long-term sustainability of the business.

The Trump-era rules favored business as usual rather than supporting businesses that understand and value sustainability. Those rules are too restrictive and don't allow retirement plans to offer the full range of investment choices that many people want. Please act now to update these rules to provide investment options people need and want.

Robert Wright
