## General Comment

Federal Registrar John smith,

I'm writing to urge the Department of Labor to make sure that workers and retirees' savings are invested in safe and sustainable ways that help lower climate risk, promote fair working conditions, and create a racially just society. I am depending on the Department of Labor to follow through with this revision and fix the Trump-era rules that protected unsustainable industries by making it more difficult for retirement plan managers to assess the impact of their investments on the climate, working conditions, or racial equity, as well as the major economic risks associated with these investments.

Workers and their retirement plans should have the right to take ethical investment into account regarding which companies they support and finance with their savings. Please restore this right!
