General Comment

Federal Registrar John smith,

Workers' and retirees' savings should be able to be invested in safe and sustainable ways that promote healthy returns, a healthy economy, and a healthy society and planet. That means ensuring that the updated rules fully reverse the Trump-era rules by eliminating all prohibitions and burdens that discourage retirement plans from considering workplace safety, climate impact, racial equity and other conditions that affect the long-term sustainability of the business.

It is critically important to make these changes - for the current folks on the planet and for the next folks who will inherit it. Please look at the big picture and the long view! Today's profits should not trump the health of our world tomorrow. Thank you for doing the right thing.
