General Comment

I would like to continue to have the ability to trade options in my IRA. I have taken the time to learn how to increase the income from the stocks that I hold using options. The type of option trades that I do actually decrease risk and create cash flow. This involves selling call options, as opposed to buying them. This method of using options lowers risk and lowers the cost basis on my stocks. Please make sure that I can continue to use this kind of option trade in my IRA. Thank you for your considered attention to this matter.
