## General Comment

Trading options (covered calls) in an IRA account is very safe. Once I learned the way to handle the trade, I have successfully done dozens of trades without it impacting the safety of my IRA.

The current rules regarding stock activity in an IRA account is adequate to protect the money. We don't need more rules and regulations that will limit our use of our money.

Please reconsider this new rule change and believe that those of us who have learned the methods being employed are adults, and we don't need the government to coddle us.
