## General Comment

RIN1210-AB32

I had taken the time to educate myself on how to use various financial tools to aid my investment needs. I am appalled that the government is getting involved where they do not belong. Any conflicts between Brokers and investors should be handled by the adult individuals involved. This is not for government interference. This is America no? Each tax paying citizen should be able to make financial decisions with their hard earned money and invest it as they see fit. In this information age education on numerous subjects are readily available and citizens have the ability to gather information from numerous quality institutions. We are not blindly using financial tools and should have the right to use such tools as we deem best for our individual investment situation.

This is not a socialist country it is a capitalist country what are you trying to make it? Please allow the ingenuity of America and its citizens to flourish though allowing freedom in our financial management. Please consider closely what your thinking because this great country depends on it!

Thank you for being a part of what keeps America being the great country that it is by knowing your boundaries of governance!
