General Comment

I have spent many hours to learn how to successfully use options in my retirement account to decrease the risk of loss.

Options when used wisely can be the safest and least risky way to invest. In addition they can allow for extra income or dividends to allow my portfolio extra growth, especially since all the government intervention has destroyed interest rates.

I spend a great amount of time learning methods to protect and grow what I've worked very hard to save.

The government will ultimately benefit far more when the time comes for me to start drawing down those saved and earned dollars.

PLEASE don't change the rules now!!

Options are one of the most important and safest means we have to hedge and grow our retirement accounts

Thank You very much

Paul Bell
