General Comment

Concerning your Proposed Rule RIN 1210-AB32 changing the rules to restrict trading options within an IRA account would be an determent to increasing the value of my IRA as well as the taxes to be paid when the monies are withdrawn in the future. My account has growth by using both covered call and cash secured put options to protect against market volatility as well as generate additional income. Respectively I ask to not change my ability to use options within my IRA account.
