I would like to comment about RIN 1210-AB32. I have just begun to actively engage in an IRA and have already invested many hours and dollars understanding how to use Options as a safety net while investing in an IRA account. From what I understand this proposal if passed, will restrict the trading of options in an IRA account.

I would ask this proposal be voted down or removed as written from being introduced. If the intention is to reduce fees and conflicts then leave the ability for me to decide how I want to build my retirement portfolio to me, by allowing option trading in an IRA account.
