Subject: RIN 1210-AB32

Please include listed stock options in the list of assets permissible for within IRA accounts. Stock options are important tools for hedging my IRA portfolio. Restricting listed options put severe restrictions on my asset allocation and the expression of my personal level of risk. In short it's a restriction of my self expression.

If limiting option trading is not the goal of this proposal the it must be explicitly permitted. Otherwise to not pass the proposal.

Thank you.
