## INTRODUCTION

Schedule C of the Form 5500 captures information regarding service providers contracted by private pension and welfare plans along with Direct Filing Entities (DFE). ${ }^{1}$ This information includes, but is not limited to, the names and employer identification numbers of the providers, a description of the services provided, and the amount paid for services. This form was significantly updated prior to release of the 2009 Form 5500.

This report captures important information that is reported on the Schedule C. The parts of the Schedule C that are of interest are

- Part I - Service Provider Information - Item I Information on Persons Receiving Only Eligible Indirect Compensation and
- Part I - Service Provider Information - Item 2 Information on Other Service Providers Receiving Direct or Indirect Compensation.

[^0]
## WHO MUST FILE

Schedule C must be filed by large pension plans (generally those with 100 or more participants as of the beginning of the plan year), master trust investment accounts, 103-12 investment entities, and group insurance arrangements if any service provider was paid $\$ 5,000$ or more in compensation, or an accountant or enrolled actuary was terminated.

## DIRECT AND INDIRECT COMPENSATION

An important distinction mentioned in The Instructions for Form 5500 (the Instructions) is the difference between direct and indirect compensation. According to the Instructions, direct compensation includes all payments made directly by the plan for services rendered to the plan. Examples of direct compensation include "direct payments by the plan out of a plan account, charges to plan forfeiture accounts and fee recapture accounts, charges to a plan's trust account before allocations are made to individual participant accounts, and direct charges to plan participant individual accounts."

Indirect compensation, alternatively, includes payments received by providers from sources other than the plan for services rendered to the plan. For purposes of indirect compensation, only payments made for the provision of services to the plan are included, i.e. payments made to employees that would have been made whether or not the services were performed are not considered indirect compensation for reporting purposes.

There are also several important distinctions regarding what may or may not be considered indirect compensation for reporting purposes. Specifically, "the investment of plan assets and payment of premiums for insurance contracts, however, are not in and of themselves payments for services rendered to the plan for purposes of Schedule C reporting, and the investment and payment of premiums themselves are not reportable compensation for purposes of Part I of the Schedule C."

Items that are considered reportable indirect compensation include "fees and expense reimbursement payments received by a person from mutual funds, bank commingled trusts, insurance company pooled separate accounts, and other separately managed accounts and pooled investment funds in which the plan invests that are charged against the fund or account and reflected into the value of the plan's investment (such as management fees paid by a mutual fund to its investment adviser, sub-transfer agency fees, shareholder servicing fees, account maintenance fees, and 12b-1 distribution fees)."

Expanding on the idea of charges against an investment fund ${ }^{2}$, examples considered reportable indirect compensation include "the fund's investment adviser asset-based investment management fee from the fund, brokerage commissions and fees charged in connection with purchases and sales of

[^1]interests in the fund, fees related to purchases and sales of interests in the fund (including 12b-1 fees ${ }^{3}$ ), fees for providing services to plan investors or plan participants such as communication and other shareholder services, and fees relating to the administration of the employee benefit plan" are all considered reportable indirect compensation."

Additional examples of reportable indirect compensation are:

- Finder's fees
- Float revenue
- Brokerage commissions (regardless of whether the broker is granted discretion)
- Research or other products or services, other than execution, received from a broker-dealer or other third party in connection with securities transactions (soft dollars)
- Other transaction based fees received in connection with transactions or services involving the plan whether or not they are capitalized as investment costs

It is important to note that certain types of non-monetary compensation can be excluded from Schedule C reporting. ${ }^{4}$

Note: To arrive at the average direct and indirect payments as a percentage of assets, the percentage is calculated at the plan level, as opposed to the cell level. The sum of the percentages is then divided by the number of plans in the cell. This is different from a calculation that aggregates all direct and indirect payments within a cell and divides by the aggregate total assets of the plans in the cell.
Note: Total asset amounts shown exclude funds held by life insurance companies under group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total pension fund assets. Asset amounts are as of the end of the plan year.
Note: The letters $K, M$, and $B$ denote thousands, millions, and billions, respectively.
Note: Direct and indirect payments tabulated from Schedule C Part I, Item 2.
Note: Excludes one-participant plans.
1/ The denominator for the calculation is the total assets reported as of the end of the plan year on Schedule H. In the event that value was zero, beginning of year assets was used.

[^7]:    Note: To arrive at the average direct and indirect payments as a percentage of assets, the percentage is calculated at the plan level, as opposed to the cell level. The sum of the percentages is then divided by the number of plans in the cell. This is different from a calculation that aggregates all direct and indirect payments within a cell and divides by the aggregate total assets of the plans in the cell.
