

<b>National Dislocated Worker Grant (DWG) Summary</b>
---

<b>Project Type</b>	Reemployment System Integration (RSI)	
<b>State</b>	Wyoming	
<b>Period of Performance</b>	October 1, 2016 - September 30, 2018	
<b>Grant Award Amount</b>	\$1,100,000	
<b>Core Project Elements</b>		✓ Where Applicable
	Common registration and case management across at least the DW, ES, and UI programs	✓
	Implementation of robust on-line service delivery hubs that integrate information and on-line services across at least the DW, ES, and the UI programs	
	Data integration strategies that support the ability of front-line staff, including career counselors, to better connect dislocated workers to the services they need to get jobs in demand and expand the capacity to provide career counseling to more customers	
<b>Alternate Options for States</b>	For states with existing integrated systems, the proposal includes enhancing existing system	✓
<b>Workforce Connect</b>		Yes or No
	Plan to use	
	Plan to investigate	Yes
<b>Project Description</b>	<p>Wyoming is proposing to initiate an information technology project to build an integrated common intake, referral and reporting system in accordance with WIOA regulations and to support high-quality service delivery and improved employment outcomes for dislocated workers, including those who are also unemployment insurance claimants or long term unemployed. The four core WIOA partners in Wyoming will participate in design of this technology solution. The programs included are: DW, Adult, Youth, WP, TAA, UI, Vocational Rehabilitation and Adult Education.</p> <p>The technology requirements will support and provide high-quality service delivery and improve employment</p>	

	<p>outcomes for dislocated workers (and other WIOA participants) by providing a more seamless experience across WIOA partners. The proposed system will provide a 'no wrong door' approach, benefitting dislocated workers, who often enter the system via UI by connecting them to employment and training opportunities while reducing the data entry burden and reducing the need to provide duplicate information to various programs. The technology will allow for a client portal, which is customizable by the client and will allow for self-service interaction with the system.</p>
