

### **Quarterly Report Analysis (QRA) Descriptions**

This document contains four additional sheets, one for each WIOA title I or III program. These sheets contain important information on each of the QRA metrics currently in use for the WIOA Adult, Dislocated Worker, Youth, and Wagner-Peyser programs.

Notable items include:

1. Definition/Relationship Targeted - this column provides a plain text overview of how the metric is calculated and the relationship ETA intends to capture.
2. Date Parameters for Quarterly Reporting - this column provides the dynamic timeframes of each metric. Depending on the metric, these timeframes could reference various cohorts of program exiters, current participants, new participants, or both.
3. Numerator and Denominator Specifications - these columns provide SQL queries that match the definition of each metric. Grantees can use these SQL queries to investigate the cause of their results and develop internal analysis products that mirror the QRA.
