Statewide Outcomes

33 programs

Programs Launched

= 10 programs

Participants

= 1,000 participants

8,520 participants

Credentials Earned

= 1,000 credentials

13,683 credentials

The data presented reflects final grantee reporting as of September 30, 2018. See explanatory information at <https://www.doleta.gov/taaccct/state-profiles.cfm>

The U.S. Department of Labor's TAACCCT grant program was a major investment in building the capacity of community colleges. Grant funds were not used for tuition, but to create or enhance programs of study that lead to industry-recognized credentials, upgrade equipment, support student success toward completion, and more. TAACCCT supported colleges to better serve workers eligible for training under the TAA for Workers program, as well as a broad range of other adults. TAACCCT grant funding ended in 2018; its ongoing impact is documented in third-party evaluations.

Examples from Kansas

Industry Emphasis of Programs of Study

To find free and open career and technical training resources produced by colleges using TAACCCT funds, visit <https://www.skillscommons.org/>.

Kansas Example: The Technical Retraining to Achieve Credentials (TRAC-7) consortium developed and uploaded [syllabi, courses, manuals, and other learning materials](#) for subjects including electric power, agri-biotechnology, and environmental technology.

"TRAC-7 [Technical Retraining to Achieve Credentials] and KanVet recently partnered to further advance the educational and employment opportunities for Kansas Veterans and their families. This collaborative effort is currently building a stronger Kansas workforce and benefiting Service Members from across the State. I encourage military members to take advantage of KanVet website resources and to consider TRAC-7 signature programs when seeking educational paths to excellent career opportunities."

*Lee E. Tafanelli, Major General, Kansas National Guard
The Adjutant General*

"A Kansas Technical Retraining Among Interdisciplinary Networks (KanTRAIN) project participant completed an Associate of Applied Science (AAS) in Welding and made a career change from food service to master welder starting at \$19/hour. Another participant completed the Industrial Automation AAS; with his diverse background in robotics, he gained employment as an adjunct instructor at \$30/hour. A third...completed the Climate & Energy Control AAS and went from unemployed to HVAC technician at \$15/hour."

*Debra Mikulka, Project Director, KanTRAIN
Washburn University of Topeka*
