Calculations – WIOA Indicators of Performance

Figure 5: Calculation: Median Earnings Indicator - Revised

The median is the number that is in the middle of the series of numbers, so that there is the same quantity of numbers above the median as there are below the median.

The data for this calculation is drawn from *PIRL 1704 or RSA-911 385: Wages 2nd Quarter After Exit Quarter*.

$\{(n + 1) \div 2\}$ value, where n is the number of earnings for all participants who exited during the reporting period employed in unsubsidized employment in the 2nd quarter after exit (PIRL 1602; code value 1, 2, 3) and Wages 2nd Quarter After Exit (PIRL 1704) <999999.99 or (RSA-911 Element 385), except those that exit for specified reasons listed in (PIRL 923; code value #1, 2, 3, 4, 5, 6, or 7) or (RSA-911 Element 355; code #1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, or 15).

1. To calculate the median, wages (PIRL 1704) or (RSA-911 Element 385) must first be ranked (sorted in ascending order).
2. The median earnings value is the wage in the middle of the rank order list.
3. Median = the middle value of a set of ordered data.

If the list rank order of earnings contains an even number of values, sum the two middle values and divide by two. Whether there is an odd or even number of entries in the list of earnings values, there will be an equal number of records above and below the median value.

Example of Calculation of Median Earnings

If the series of values is 1, 2, 12, **22**, 33, 43, 195, the median value is the number that is in the middle of the series of numbers, so that there is the same quantity of numbers above the median as there is below the median. In this example, the median value would be **22**.

If there is an even number of values, such as 1, 2, 12, **22, 27**, 33, 43, 195 the median value is the sum of the two middle values divided by two. In this case the median value would be $(22 + 27) / 2 = 24.5$

Figure 6: Calculation: Credential Attainment Rate Indicator - Revised

$$\text{Credential Attainment Indicator} = \frac{A \text{ or } C}{B \text{ or } D}$$

The Credential Attainment Indicator measures the percentage of participants enrolled in an education or training program (excluding those in OJT and customized training) who either: (1) exited during the reporting period and obtained a recognized postsecondary credential during the program or within one year after exit **OR** (2) exited from a secondary education program and obtained a secondary school diploma or its recognized equivalent during the program or within one year after exit **and** were also employed or in an education or training program leading to a recognized postsecondary credential within one year after exit.

Note: A participant should only be included in the numerator and denominator of the credential attainment indicator once per period of participation. Participants who achieve multiple credentials should be reported based on the highest credential attained for that period of participation.
