

## Attachment I: Sample Job Quality Continuum

This provides an example of a skeleton job quality continuum SWAs and LDBs can build upon for their own efforts. This represents the components of a good job, including what is necessary for a worker to have basic dignity; what career supports help a worker to grow their skills and climb a career pathway; and what worker empowerment opportunities can be embedded into businesses to ensure worker voice is heard and respected. The details of each bullet can change based on local factors, but the broad components of each should exist for a job to be considered a good job.
