Notes:

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.
- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

* ETA estimates the state/local split for newly available FY funds because financial reports are not yet available.

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

* ETA estimates the state/local split for newly available FY funds because financial reports are not yet available.

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- The FY 2014 new funds available for Northern Marianas show up negative because this grantee is reporting more than the maximum five percent of its total Dislocated Worker allotment for PY 2013 in their PY 2013 State Dislocated Worker reports, and the methodology ETA uses to estimate how to split the FY 2014 funds between state and local activities.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

* ETA estimates the state/local split for newly available FY funds because financial reports are not yet available.

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

* ETA estimates the state/local split for newly available FY funds because financial reports are not yet available.

- The FY 2014 new funds available for Northern Marianas show up negative because this grantee is reporting more than the maximum five percent of its total Dislocated Worker allotment for PY 2013 in their PY 2013 State Dislocated Worker reports, and the methodology ETA uses to estimate how to split the FY 2014 funds between state and local activities.

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

* ETA estimates the state/local split for newly available FY funds because financial reports are not yet available.

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.

Notes:

* ETA estimates the state/local split for newly available FY funds because financial reports are not yet available.

- Aberrations, such as negative expenditure rates or those over 100%, usually result from errors or adjustments in 9130 reporting for prior periods being corrected in current period reports. They are a result of reporting on a cumulative basis and an ETA policy that limits the States's and Territories's ability to correct quarterly reports.

- Data come from WIA 9130 financial reports for the 9/30/13 reporting period accessed from E-Grants on 03/06/14.
