

**REO****Reentry Employment Opportunities**

## Pathway Home Grant Program

Pathway Home (PH) grants from the U.S. Department of Labor's Employment and Training Administration (ETA) provide states, U.S. territories, local governments, and non-governmental organizations the resources needed to improve employability outcomes for adults during the reentry process from incarceration. PH grants include reentry services to eligible participants while still incarcerated in prisons, jails, and other state correctional facilities and continue comprehensive services post-release. Between 2020 and 2025, ETA awarded 109 grants through six rounds of funding. In total, organizations in 36 states and the District of Columbia received \$337,788,957.

These projects eliminate the time gap between release from incarceration and enrollment into a reentry employment program and build on research findings from the Linking Employment Activities Pre-Release (LEAP) implementation study in 2018.<sup>1</sup> The two-year LEAP pilots, which ended in 2018, demonstrated potential for breaking the cycle of recidivism by linking participants to an employment case manager while still in jail—and then continuing with the same case manager post-release. PH grants are job-driven and build connections to local employers that enable transitioning participants to secure employment.

For PH 1 and PH 2, pre-release services begin between 20 to 180 days from participants' scheduled release dates in preparation for returning to their communities; for PH 3, PH 4, PH 5 and PH 6, pre-release services begin between 20 to 270 days from participants' scheduled release dates. Services and activities include:

### PRE-RELEASE

- needs assessments
- individual development plans
- comprehensive case management
- career exploration and planning
- job preparation
- legal assistance
- counseling
- links to any necessary social services

### POST-RELEASE

- linking participants to employers, including apprenticeship opportunities
- external service providers
- skill-building services
- occupational training for in-demand industries
- industry-recognized credentials
- career services
- supportive and follow-up services

Grantees ensure that occupational training provided has no federal, state, or local regulations that restrict individuals with criminal records from obtaining licenses or other necessary credentials in that industry.

PH grants have a 42-month period of performance, including three to six months of planning, 24 to 27 months of operations, and 12 months of follow-up for each participant. An estimated 37,355 adults (18+ years old and incarcerated) are expected to benefit from the PH grants, including 7,240 in PH 1; 6,949 in PH 2; 5,366 in PH 3; 5,900 in PH 4, 5,875 in PH 5, and 6,025 in PH 6. This sizeable group makes possible a rigorous quasi-experimental study of the program impacts achieved across the five rounds.

Grantees report on five of the six WIOA primary performance indicators (employment in 2<sup>nd</sup> and 4<sup>th</sup> quarters, earnings, credentials, and skill gains), as well as recidivism outcomes for participants.

## Pathway Home Grant Program

Although all rounds are part of the same umbrella program, there are some differences between Pathway Home 1, 2, 3, 4, 5, and 6. PH 1, for example, included a low-income participant eligibility requirement. PH 1 and 2 required participant enrollment to occur between 20 and 180 days of release, whereas PH 3, PH 4, PH 5, and PH 6 allowed enrollment between 20 and 270 days of release. Additionally, PH 4 mandated that Program Managers be a full-time employee (FTE) with 100% of their time dedicated to the grant, which continued with PH 5 and PH 6. Program variations such as these occurred as part of the continuous learning approach REO applies to all grant programs; lessons learned in previous rounds are applied to future rounds. These and any other differences are reflected in the Funding Opportunity Announcements (FOAs):
