

Check the scaffold whether it is safe before working.

Wear body harness and ensure proper anchorage while working at height.

Prolonged exposure to dust can cause respiratory problems.

Keep the workplace clean and tidy for a safe working environment.

PROJECT STRATEGY

BETTER OSH DATA

Assisting countries to collect and effectively use relevant OSH data

Greater OSH CAPACITY

Providing tripartite constituents with skills necessary to address workplace hazards and risks

BETTER OSH LAWS

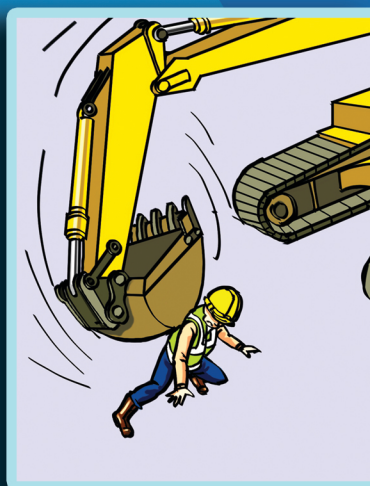

Improving legal and policy frameworks to better protect young workers

GREATER OSH ADVOCACY

Raising awareness and building the knowledge base on hazards and risks face by young workers

The project has a comprehensive Monitoring & Evaluation component to ensure sustainability and replicability.

Beware of the danger zone while working near the machinery.

Check before entering underground for atmospheric hazard.
