TABLE OF EXHIBITS

1. Introduction

This documentation describes the data collected and used for the Randomized Controlled Trial Impact Evaluation of the Working Children and Adolescents (*Niños, Niñas y Adolescentes Trabajadores* or NNAT) program in Costa Rica conducted by IMPAQ International for the U.S. Department of Labor Bureau of International Labor Affairs (ILAB).

This study was funded by the Office of Child Labor, Forced Labor and Human Trafficking (OCFT) as part of the *Closing the Child Labor and Forced Labor Evidence Gap: Impact Evaluations*. The purpose of the study was to provide causal estimates from an experimental evaluation of the effects of the NNAT program on child labor reduction. IMPAQ used survey data from adolescent program participants and estimated the impact of NNAT on hazardous child labor and related labor outcomes, educational and employment aspirations, and student behavior.

Results from the study are summarized in Meza-Cordero et al. (2019)[1] and were based on information from the following sources:

- Student Survey
- Qualitative interviews and focus groups

The public use survey data files for the study is 'Costa Rica_Public Use.dta', which contains 951 records. The data file has a single record for each student who participated in the study from 2016 to 2018.

2. Information about Input Data Sources

2.1 OVERVIEW

Below is a description of the quantitative data used in the evaluation report.

2.2 DATA DESCRIPTION

The data in for the evaluation comes from surveys of 551 youth in Costa Rica. It was administered at baseline (October 2016) and at endline (March 2018). The survey includes information on demographics, educational aspirations, current activities including employment, workplace conditions, and household conditions. Any variable from baseline have a *b_* prefix while any variable from endline has an *e_* prefix. Variables with neither prefix are cleaned variables used in analytical outputs in the Data Analysis and Results section of the main report. Raw variables also include a prefix, and indicate which question they correspond to in the survey instrument. For example, *b_q6* is the sixth question in the personal information section at baseline. The survey instruments in the appendix include a label corresponding to each raw variable in the dataset.

2.3 DESCRIPTION OF DIFFERENCES BETWEEN THE RESTRICTED AND PUBLIC VERSIONS

To protect the identity of individuals, all personally identifiable information has been stripped from the public-use dataset ('Costa Rica_Public Use.dta'). Continuous variables such as the number of siblings are recoded to hide values at the low and high ends, which could potentially identify an individual. In these instances, if necessary, variables were placed in groupings that preserve cutoffs needed for constructing outcome variables. Exhibit 1 lists the variables that are excluded from or masked in the public-use data file (and therefore from the data dictionary), along with the rationale for excluding or masking each variable.

Exhibit 1. Variables Excluded or Masked in Public-Use Datasets

Variable Label	Excluded or Masked	Reason for Exclusion from or Masking in Public Use File
Name Of Last School Attended	Excluded	Fewer than five observations
Other, Specify	Excluded	Fewer than five observations
What Do You Plan To Do Instead?	Excluded	Fewer than five observations

5. Data Dictionary

The following pages contain the data dictionary for all variables in the Public Use File. The data dictionary provides details on each of the variables included in the 'Survey Data – Costa Rica_Public Use.dta' datasets. Each variable is presented in a table containing the variable name and label, along with a summary of the data including the frequency of each response, the proportion of respondents who chose it, and, when applicable, the value label. Continuous variables with many responses report only the five highest and lowest responses along with the range in between.

BASELINE STUDENT SURVEY

COSTA RICA BASELINE SURVEY

Region _____

District _____

Date _____

Interviewer_____

Consent Script for Survey Respondents:

Hello, my name is [insert name] and first I'd like to thank you for taking the time to talk to me. I am from [Subcontractor], which is a company that interviews people to collect information about them and their opinions.

[Subcontractor] is working with IMPAQ International to collect information on working children, such as yourself. The purpose of this data collection activity is to assess if programs designed to improve your economic conditions are working or not working. If you agree to participate, we will ask you to complete an interview now, and again at the end of the school year. Between now and then, we will also send you a few short text message surveys. We will give you a cellular sim card if you need one, and a small balance will be added to the card to cover the cost of the text message surveys. If you do not have a mobile phone, we will provide you with one to use during the data collection period. We will also ask your school to send us information about your school enrollment, school attendance, and grade completion.

If you agree to participate, at this time, I will ask you a few questions about yourself and the things that you do on a regular basis. It should take no more than 35 to 40 minutes of your time.

Please note that everything you say to me is confidential. Only the research team will be able to see information linked to your name. We will never identify you or anyone in your household in any reports or information we release. There is no risk, payment or cost to you for taking part in the data collection activity.

You can choose to refuse to do this interview and take part in the data collection activity. You can also choose to refuse to answer any questions you are uncomfortable with or don't want to answer. There are no penalties or loss of benefits to you for not participating or not answering a question. Your participation in this data collection activity may help other children in the future.

Do you agree to take part in the data collection activity, and do I have your permission to continue with the interview?
Potential Participant:

_____   _____ agrees to be interviewed and participate in the study
(print name)   _____ disagrees to be interviewed and participate in the study

[Terminate interview if respondent confirms that they do NOT want to participate.]

Interviewer_____

Consent Script for Survey Respondents:

Hello, my name is [insert name] and I'd like to thank you for taking the time to talk to me. I am from [Subcontractor], which is a company that interviews people to collect information about them and their opinions.

[Subcontractor] is working with IMPAQ International to collect information on children, such as yourself. The purpose of this data collection activity is to assess if programs designed to improve your economic conditions are working or not working. If you agree to participate, we will ask you to complete this interview. By responding our questions we will be able to provide policy makers with valuable information that will allow them to adjust and improve social programs aimed to benefit you, your family, and your community.

If you agree to participate, at this time, I will ask you a few questions about yourself and the things that you do on a regular basis. It should take no more than 35 to 40 minutes of your time.

Please note that everything you say to me is confidential. Only the research team will be able to see information linked to your name. We will never identify you or anyone in your household in any reports or information we release. There is no risk, payment or cost to you for taking part in the data collection activity.

You can choose to refuse to do this interview and take part in the data collection activity. You can also choose to refuse to answer any questions you are uncomfortable with or don't want to answer. There are no penalties or loss of benefits to you for not participating or not answering a question. Your participation in this data collection activity may help other children in the future.

Do you agree to take part in the data collection activity, and do I have your permission to continue with the interview?

Potential Participant:

_____   _____ agrees to be interviewed and participate in the study
(print name)   _____ disagrees to be interviewed and participate in the study

[Terminate interview if respondent confirms that they do NOT want to participate.]
