1. Introduction

This documentation describes the data collected and used for the Randomized Controlled Trial Evaluation of Kailash Satyarthi Children Foundation (KSCF) Bal Mitra Gram (BMG) program in India. This study was funded by the Office of Child Labor, Forced Labor and Human Trafficking (OCFT) as part of the *Closing the Child Labor and Forced Labor Evidence Gap: Impact Evaluations* project. The purpose of the study was to provide causal estimates from an experimental evaluation of the effects of the BMG program on incidence of child labor. IMPAQ used survey data from program participants and estimated the impact of the BMG program on child labor and other child labor-related outcomes, including educational attainment, and adult attitudes regarding child labor.

Quantitative results from the study are summarized in IMPAQ (2019)¹ and were based on household surveys.

The public use survey data files for the study is 'India_Public Use.dta', which contains 40,668 records. The data file has a single record for each household member who participated in the study from 2016 to 2019. Unique households are clustered in 40 villages in India. IMPAQ (2019)'s study report describes the evaluation design and set-up in detail.

2. Information about Input Data Sources

2.1 OVERVIEW

Below is a description of the quantitative data used in the evaluation. In both datasets any variable from baseline has a *b_* prefix while any variable from endline has an *e_* prefix.

2.2 DATA DESCRIPTION

The data for the evaluation comes from surveys of households conducted in 40 villages in Giridih district, Jharkhand, India. It was administered at baseline (2016) and at endline (2018). The survey includes information on demographics, current activities including education and employment (for all household members including children), adult attitudes towards children, women's decision-making power, and (at endline) information about participation in the program. All variables included from baseline have a *b_* prefix while any variable from endline has an *e_* prefix. The survey instruments in the appendix include a label corresponding to each raw variable in the dataset. Raw variables used in the analysis are recoded for usability – for example, non-responses coded as 99 are recoded to missing.

2.4 DESCRIPTION OF DIFFERENCES BETWEEN THE RESTRICTED AND PUBLIC VERSIONS

To protect the identity of individuals, all personally identifiable information has been stripped from the public-use dataset ('India_Public Use.dta'). In some instances, variables with fewer than five observations in a given category have been masked by aggregating their categories into broader ones to minimize the risk of identification.² For example, reasons for missing school with fewer than five responses are grouped together into the 'other' option (*b_natl_masked* and *e_natl_masked*). Continuous variables such as age (*age_masked*) or savings (*b_save_masked* and *e_saved_masked*) are aggregated to hide values at the low and high ends, which could potentially identify an individual. In these instances, if necessary, variables were placed in groupings that preserve cutoffs needed for constructing outcome variables. Exhibit 1 lists the variables that are excluded from or masked in the public-use data file (and therefore from the data dictionary), along with the rationale for excluding or masking each variable.

5. Data Dictionary

The following pages contain the data dictionary for all variables in the Public Use File. The data dictionary provides details on each of the variables included in the 'India_Public Use.dta' dataset. Each variable is presented in a table containing the variable name and label, along with a summary of the data including the frequency of each response, the proportion of respondents who chose it, and, when applicable, the value label. Continuous variables with many responses report only the five highest and lowest responses along with the range in between. Note that because the data is shapped longwise, there are two observations for each household member, one at baseline and one at endline. Therefore, all of the endline variables are missing for the baseline observations and all of the baseline variables are missing for the endline observations (in addition to any missing values for the variable itself).

ILAB INDIA – HOUSEHOLD SURVEY AND WOMEN’S SURVEY

STATE: Jharkhand

Hhid HHID: <<insert>>

REGION: <<insert>>

DISTRICT: <<insert>>

LOCALITY: <<insert>>

Village Hamlet/Village: <<insert>> Block Tehsil/Block/Town: <<insert>> Ward: <<insert>>

Time Started Interview: **b_starttime** AM/PM Time Ended Interview: **b_endtime** AM/PM

Hello, my name is [insert name] and first I’d like to thank you for taking the time to talk to me. I am from Outline India, which is a company that interviews people to collect information about them and their opinions.

I am going to ask you a few questions about your household and how you feel about some things in your community. It should take no more than 35 to 40 minutes of your time. Please note that everything you say to me is confidential. We will never identify you or anyone in your household in any reports or information we release. You can choose to refuse to do this interview. You can also choose to refuse to answer any questions you are uncomfortable with or don’t want to answer. There are no penalties to you for not participating or not answering a question. There is also no direct benefit to you for participating in this group. Do I have your permission to continue? If yes:

b_consent Can you please tell me your address?

b_Address ADDRESS:

Can you please tell me the name of the head of household? Can I have his/her cell phone, in case I need to contact him/her to clarify some answers?

b_HHname Name of Head of Household: _____

b_cellphone Cell Phone of Head of Household: _____

And what is your name?

b_resname Name of Respondent: _____

Could I also get the name of the village panchayat?

b_Panchayat Name of Village Panchayat: _____

1. We would first like to ask about the people who usually live in your household. By this we mean:

- Members living in household and eating out of the same kitchen for six months and/or going to live there for the next six months.
- Members who have migrated alone or with one /two other people for work or for school.

- If parents are equally living in the households of all the sons, include them in the current house-hold.
- If they live mostly with one son count him in that household.

Do not count

- Members who have migrated with the entire immediate family.
- Any child who is permanently living with other relatives.
- If no gauna do not include the daughter-in-law.

b_numfamily A. Can you please tell me how many people live in this household? _____

Hello, my name is [insert name] and first I’d like to thank you for taking the time to talk to me. I am from Outline India, which is a company that interviews people to collect information about them and their opinions.

I am going to ask you a few questions about your household and how you feel about some things in your community. It should take no more than 35 to 40 minutes of your time. The information we collect during the survey will only be used for research to understand the influence of village-level programs on children’s education and work. This information will help improve our understanding of village-level programs for people living in similar communities as you.

Please note that everything you say to me is confidential. We will never identify you or anyone in your household in any reports or information we release. You can choose to refuse to do this interview. You can also choose to refuse to answer any questions you are uncomfortable with or don’t want to answer. There are no penalties to you for not participating or not answering a question. There is also no direct benefit to you for participating in this group. Do I have your permission to continue? If yes:

IF SEPARATE WOMEN'S SURVEY, RECORD ROSTER NUMBER OF WOMAN SELECTED TO PARTICIPATE. ADDITIONALLY, CAPTURE THE CONSENT OF THE WOMAN TO PARTICIPATE IN THE WOMEN'S INSTRUMENT.

Hello, my name is [insert name] and first I'd like to thank you for taking the time to talk to me. Please ask me any questions that you have about this interview. I am going to ask you a few questions about your activities and the way you feel about your community. The information we collect during the survey will only be used for research to understand the influence of village-level programs on children's education and work. This information will help improve our understanding of village-level programs for people living in similar communities as you.

Please note that everything you say to me is confidential and we will never identify you in any information we release or in any reports we write. There is very little risk. You can choose to refuse to do this interview and you choose to refuse to answer any questions you are uncomfortable with. There are no penalties to you for not participating or not answering a question. There is also no direct benefit to you for participating in this group and no payment or cost to you for taking part. Do I have your permission to continue? If yes,
