critical	[REDACTED]	[REDACTED]	[REDACTED]	New Hire									HQ	CMTS	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED] No relocation package	Juan Loaiza	[REDACTED] has an incredible breadth of knowledge in the area of system software design and implementation. He spent most of his career developing the operating system used in [REDACTED] systems, and then spent another 7+ years working on database internals in the data storage and processing layer in the [REDACTED] appliance. He seemed to be a very sharp and proficient developer, with excellent debugging skills and an eye for good design. He has the ability to work on any component in the database product and make an immediate impact with little to no setup time. All who interviewed [REDACTED] believe that he would be an excellent addition to our team. He has direct working experience related to the projects we are working on, and those who interviewed him all feel that he can come on board as a senior developer and make an immediate contribution. He asked thought-provoking questions during the interviews, and convincingly described how his current work with integrating [REDACTED] with [REDACTED] can be applicable with the Oracle [REDACTED]. He's one of the few remaining highly-qualified database engineers left in [REDACTED], and we should hire him immediately before he thinks about seriously interviewing with other companies. [REDACTED] also came highly recommended by another star engineer in [REDACTED] - [REDACTED]
