The New School

Senior Vice President at Oracle

San Francisco Bay Area · 500+ connections · [Contact info](#)

## About

Experienced Sr Vice President with a demonstrated history of working in the information technology and services industry. Strong professional skilled in Performance Tuning, Oracle Database, Enterprise Software, Enterprise Architecture, and Agile Methodologies.

## Experience

### Senior Vice President

Oracle

Feb 2010 – Present · 9 yrs 7 mos

United States

Manage a R&D team of engineers worldwide from USA , India, China, Europe, and Australia for product development and marketing

The team was started in 1999 to develop Real Application Clusters (RAC). RAC soon became the standard Oracle Database product for scalability and high availability . It is used worldwide from small companies to Fortune 100/500 companies for commodity HW and large SMP. It has a penetration of more than 90% and it is still selling strong.

Grid Infrastructure (GI) was developed in conjunction with RAC to provide HA across servers and increased ease of use. RAC has no competitors in the market. RAC Clusters scale to 1000's of nodes. Automatic Storage Management (ASM) is a scalable Volume Manager which eliminates the need for performance tuning and provides HA . ASM Cluster File System (ACFS) is a highly available and scalable Cluster Filesystem which provides high performance , snapshotting , tagging , encryption and replication capabilities . All these products are available on several platforms . All these products are used in Oracle Engineered Systems . The Autonomous Health Framework set of products use Machine Learning and Deep Learning to predict faults in the system and take corrective action

Oracle Database Appliance (ODA) is an appliance that can run database and applications on the same server. It has won a few awards from the industry and has gained a very large customer base. It is the base building block of the Oracle cloud. The appliance is a load- go system that requires very minimal hand holding from the customer

The team includes also a test and performance organization that is dedicated to test the products. This team is responsible from regular correctness and robustness to ensuring that the products have very good performance and are easy to manage and are of the highest quality possible

Also holds 50+ patents and several industry awards [See less](#)

### Chief Architect

Sun Microsystems

Feb 1995 – Mar 1999 · 4 yrs 2 mos

United States

**Senior Architect**

IBM

Feb 1983 – May 1995 · 12 yrs 4 mos

United States

joined IBM in 1982 as a developer for MVS in the Poughkeepsie Lab. At IBM, he held various positions in the mainframe OS software design and development. He was one of the architects of MVS/ESA and one of the initial members of the Sysplex development effort. He was the architect of the OSF/Mach redesign for S/390 and he worked on the high availability and RAS features in AIX for the SP2 product line and was the architect of the Phoenix HA/API for the SP. holds many patents.
