Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc.

DETAILED_DESCRIPTION

As a member of the User Experience team, you will develop and apply software design/usability processes in the investigation of technical problems. Manage the load configuration and performance of the system. Responsible for creating and implementing system enhancements that will improve the performance and reliability of the system. Manage the load configuration and performance of the system. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will define and implement standard practices and procedures. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will define and implement standard practices and procedures. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Define and implement standard practices and procedures. As a member of the software engineering division, you will perform detailed design based on provided high level design specifications. Assist in system planning and implementation. As a Principal Support Engineer, you will offer strategic technical support to assure the highest level of customer satisfaction. A primary focus is to create and implement standard practices and procedures. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Define and implement standard practices and procedures. As a member of the software engineering division, you will specify, design and implement major changes to existing software architecture. Create new architecture and implement standard practices and procedures. Manage the development and implementation process of a specific company product involving departmental or cross-functional teams focused on the delivery of the product. As a Director in the product development division, you will lead a team that defines product specifications and or strategy. Gather and analyze information to define product specifications and or strategy. As a member of the software engineering division, you will specify, design and implement major changes to existing software architecture. Create new architecture and implement standard practices and procedures. As a Senior Sales Consultant you will be responsible for providing presales technical / functional support to prospective clients and customers while ensuring customer satisfaction. As a director of the software engineering division, you will apply your extensive knowledge of software architecture to manage software development tasks.

Serve as a liaison with other divisions such as Finance, Contracts, HR, Legal, Shared Services, Accounts Receivable, Purchasing, and Risk Management. As a manager in the product development division, you will lead a team that defines product specifications and or strategy. Gather and analyze information to define product specifications and or strategy. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Define and implement standard practices and procedures.

As a member of the IT organization, assist with the analyze of existing complex programs and formulate logic for new complex internal systems. Prepare and implement standard practices and procedures. As a Senior Sales Consultant you will be responsible for providing presales technical / functional support to prospective clients and customers while ensuring customer satisfaction. As a Director in the product development division, you will lead a team that defines product specifications and or strategy. Gather and analyze information to define product specifications and or strategy. As a member of the product development division, you will specify, design and implement major changes to existing software architecture. Define project specifications and or strategy. Develops project plans and coordinates cross-functional teams through meetings and progress measurement activity which bring distinct, specific project goals to fruition. As a manager in product marketing, you will be responsible for leading the development of company marketing specifications for specific product(s) or product line. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will define and implement standard practices and procedures. Develops project plans and coordinates cross-functional teams through meetings and progress measurement activity which bring distinct, specific project goals to fruition. As a member of the product development division, you will analyze and integrate external customer specifications. Suggest and justify product directions and or strategy. As a Senior Sales Consultant you will be responsible for providing presales technical / functional support to prospective clients and customers while ensuring customer satisfaction. As a member of the product development division, you will analyze and integrate external customer specifications. Suggest and justify product directions and or strategy.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Define and implement standard practices and procedures. As an Advisory Systems Engineer, you are expected to be an expert member of the problem-solving/avoidance team and be highly skilled in solving extremely complex technical problems. As a member of the product development division, you will define product specifications and or strategy. Gather and analyze information to define product specifications and or strategy. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will define and implement standard practices and procedures. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will define and implement standard practices and procedures.

ADDITIONAL_DETAILS

DETAILED_DESCRIPTION

As a member of the product development division, you will define product specifications and or strategy. Gather and analyze information to define product development strategy. Prepare and manage product development projects. Provide Development and/or Production support. This includes creating primary database storage structures, designing and creating primary objects, managing database performance, and providing technical support for database users.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a director of the software engineering division, you will apply your extensive knowledge of software architecture to manage software development tasks and projects. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the IT organization, assist with the analyze of existing complex programs and formulate logic for new complex internal systems. Prepare and manage product development projects. Provide Development and/or Production support. This includes creating primary database storage structures, designing and creating primary objects, managing database performance, and providing technical support for database users.

As a member of the User Experience team, you will develop and apply software design/usability processes in the investigation of technical problems. Manage and coordinate user experience activities. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Define and manage software development processes. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will perform high-level design based on provided external specifications. Specify, design and implement software solutions. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a Senior Database Administrator, you are instrumental in researching, evaluating, designing, testing, recommending, and planning implementation of database systems. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

Serve as a liaison with other divisions such as Finance, Contracts, HR, Legal, Shared Services, Accounts Receivable, Purchasing, and Risk Management. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

Create the division strategy for supporting and/or implementing large and/or complex multi-functional and/or multi-location projects and/or systems. Lead and manage software development projects. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the product development division, you will define product specifications and or strategy. Gather and analyze information to define product development strategy. Prepare and manage product development projects. Provide Development and/or Production support. This includes creating primary database storage structures, designing and creating primary objects, managing database performance, and providing technical support for database users.

Manages a team maintaining and/or implementing software project(s) and/or internal systems. Defines, documents and manages scope, expectations, and resources. Operates independently to provide quality work products to an engagement. Performs varied and complex duties and tasks that need independent judgment. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Define and manage software development processes. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a manager of the software engineering division, you will apply your knowledge of software architecture to manage software development tasks and projects. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a manager of the software engineering division, you will apply your knowledge of software architecture to manage software development tasks and projects. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a Principal Sales Consultant you will be responsible as the expert for formulating and leading presales technical / functional support activity to prospective customers. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a first-level manager who has performed technical or professional duties in a support environment, a significant component of your duties will entail gathering and analyzing information to define product development strategy. Prepare and manage product development projects. Provide Development and/or Production support. This includes creating primary database storage structures, designing and creating primary objects, managing database performance, and providing technical support for database users.

Partners with Account, Technology, and Application sales representatives to qualify and close new business on Oracle solutions. Provides specific industry expertise. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the product development division, you will define product specifications and or strategy. Gather and analyze information to define product development strategy. Prepare and manage product development projects. Provide Development and/or Production support. This includes creating primary database storage structures, designing and creating primary objects, managing database performance, and providing technical support for database users.

As a manager of the software engineering division, you will apply your knowledge of software architecture to manage software development tasks and projects. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the product development division, you will analyze and integrate external customer specifications. Suggest and justify product directions and strategies. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. You will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

As a member of the software engineering division, you will assist in defining and developing software for tasks associated with the developing, debugging, and testing of software.

ADDITIONAL_DETAILS

The Hospitality Industry Product Strategy Team is looking for a passionate and talented leader to support the overall product direction and help create products. This position is for a Senior Software Engineer in systems group at Oracle. The candidate will be responsible for bringing up flavors of Linux and hybrid cloud. As a member of the software engineering division, you will apply basic to intermediate knowledge of software architecture to perform software development. Job Requirements: - Participate in the development of a new database security infrastructure for next generation of Oracle applications. - Support the development of Oracle's Cloud Provisioning Operations team. We are seeking a highly motivated, organized, experienced and well rounded individual that is interested in leading a team of world class software engineers.

Become a part of the Oracle Projects development team to help build the new features of the product to meet the demands of the market. Current working experience and expert level knowledge in following area :- Normal 0 false false false MicrosoftInternetExplorer4 /* We seek an experienced business analyst to join Oracle's Cloud Provisioning Operations team. This high-profile, dynamic position will drive provision of new features.

Requirement University Education Expertise in Data Warehousing Technical Knowledge of OBIEE/Informatica/DAC Proven Software Development Methodology An experienced consulting professional who has a broad understanding of solutions, industry best practices, multiple business processes or technology domains. We are a small team of 16 developers that thrive on working on challenging problems. We take pride in identifying functional opportunities that have a clear business case. SCO belongs in the Fusion product line. The technologies used to build SCO are the cutting edge technology that Oracle has assembled, in house and through acquisitions.

Today's data centers deploy tens of thousands of nodes and require efficient utilization of resources and highly automated deployment lifecycle support. The Solution Architect's primary responsibilities include partnering with NAAE Application sales representatives to identify cross pillar applications solutions. Additional skills/traits: Excellent communication and listening skills. Exceptional motivational and leadership skills.

Oracle's Siebel CRM On Demand Product Management team is looking for an experienced professional who is ready to take on an exciting and challenging role.

Are you interested in working with cloud computing, defining standards, design and develop software components that can be consumed by platforms as a service?

DEPARTMENT_DESCRIPTION

Supply Chain Operations

About Our Product: Oracle Solaris is one of the most widely used operating systems by enterprise customers. Solaris Zones partitioning technology is used

The Solaris Zones Engineering group is responsible for the most innovative OS-level virtualization technology in the industry. We develop and maintain products in the areas of Virtualization, Security, and Performance in Linux

Oracle - MICROS

Oracle is committed to growing our Retail Business Unit to a position of leadership in the Retail Application market. Our customer base is a who's who of the industry. This position is on the Java Client Team, working on the Java Deployment Technology Stack. This encompasses the browser plugin, Java WebStart, and JavaFX. The Oracle Solaris Userland Development team integrates a number of functional and business critical FOSS (Free and Open Source Software) components into the Solaris operating system. Today, IT organizations proactively manage many technologies, ranging from Service-Oriented Architecture (SOA) to Cloud Computing, all while maintaining a high level of security. The WebCenter User Experience team provides end to end user centered design support for the products in the WebCenter Development organization. The Oracle Database Install team is responsible for Oracle database and several other Oracle database-centric products user experience during installation and configuration. Global Advertising and Online

Software Patch Build Engineer ("Gatekeeper"), Software Developer 3 The successful candidate will join the experienced and mission critical "Gatekeeping" team at Oracle Corporation. Oracle Corporation is actively seeking an experienced Hyperion Support Engineer to join our On Demand Hyperion Operations team. This team manages the Oracle Hyperion products. The Product Management team within the Java Platform Group is responsible for product strategy for Oracle's Java SE-based technologies and products including Java SE, Java EE, and JavaFX. The Cluster & Parallel Storage Technology group in the Server Technologies division is responsible for research, design and development of cluster data

and security. GIT Risk Management's charter is to protect the confidentiality, integrity, and availability of Oracle & Customer's information data and (Please note that this position can be based in many U.S. locations, San Francisco Bay area is preferred) Brief Description DC design responsibility with strong consulting level application development skills. We are part of Oracle Server Technologies organization and responsible for the Oracle JDeveloper. Our group develops systems optimized for extreme-scale database processing. We integrate standard hardware components with specialized server and storage. As a member of the EBS Development Team, you will perform high-level design based on provided external needs. Specify, design and implement Oracle Exalogic PM has global responsibility for driving product strategy, product positioning, field enablement, customer input, and product life cycle for the product. Oracle JDeveloper (JDEV) 11g is a complete and integrated development environment for developing Oracle's Fusion Applications and Fusion Middleware. The Enterprise Replication group within the Oracle RDBMS is chartered to deliver the base platform for all of Oracle's logical replication products, including Oracle Data Guard. The Pillar Technical Publications group develops content to support Pillar Axiom SAN and NAS storage products. All content source is authored in

Department Description Our global team contributes to Open Source projects and promotes the adoption of Linux at Oracle and in the industry in general.

PGBU

NATO

PDIT builds, provisions and maintains the key infrastructure necessary to allow our product development teams to design, build, test and release Oracle products. The Applications Core Technology (ACT) Group within the Oracle Server Technologies (ST) Division is responsible for building common application components. The Agile Analytics development group is responsible for designing, developing and supporting the state of the art Enterprise Search and Business Intelligence

BRIEF_POSTING_DESCRIPTION

Manage the development and implementation process of a specific company product.
