Qualifications (External) (1st Part) (BL)

We're disrupting the world of digital marketing. And we want your help. Oracle Responsys was built with the mission Our dynamic team, Fusion Release Engineering (FRE), is responsible for all aspects of Build and Integration for Fusion Cloud Services. We're disrupting the world of digital marketing. And we want your help. Oracle Responsys was built with the mission The Oracle Cloud for Industry (OCI) provides Cloud-based Infrastructure and Platform services to allow the Oracle Cloud to help you do more with your data. The Big data Engineer will be responsible to build data processing and analytical solutions utilizing big data technologies. The SOA team manages the App2App (A2A) & Business2Business (B2B) message platform and integrations between Oracle Fusion Product Information Management Data Hub (PIM Data Hub) allows companies successfully manage their product information. Oracle RightNow Cloud Service combines Web, Social and Contact Center experiences for a unified, cross-channel customer experience. Solaris Core Engineering Technology consists of software engineers who specialize in software test development and automation. Vice President of Fusion Middleware Information Development Are you passionate about building a next-generation product? The SOA Product development organization designs and develops tools and infrastructure for enterprise customers. Oracle Fusion Talent Management is a fast growing family of applications in the HCM Cloud that is key to Oracle's success. Who we are: The Oracle Cloud Social Platform is the solution of choice for the world's biggest brands trying to connect with their customers. In October 2011, Oracle CEO Larry Ellison unveiled Oracle Public Cloud in his Oracle Open World Keynote, and the Fusion Cloud Operations is responsible for the delivery, day to day support, performance management and complete lifecycle of Oracle Cloud Services. The Global Data Services group is designing and building a ground-breaking database cloud architecture that makes it easier to manage your data. The SOA Product development organization designs and develops tools and infrastructure for enterprise customers. Excellent technical skills (Unix, ER Modeling, SQL, PL/SQL, Forms, Pro*C, Reports, Java, OAF, HTML). Strong communication skills. Business-to-business (B2B) applications are the fastest growing segment of the supply chain market. Join a dynamic team. Fusion HCM Product Management is responsible for defining and delivering new product capabilities for the Human Capital Management Cloud. The Oracle Cloud User Assistance (UA) group produces various UA artifacts for Oracle Cloud Services, including Cloud User Assistance Product Manager/Strategy 3-ProdDev

This position provides sales support to the Oracle Security (Database Security and Identity and Access Management) and Oracle Data Technology Group Overview: We design and develop the data storage & processing engine for the Oracle Cloud. Oracle's Global Business Units (GBU's) provide best-in-class products for the communications, financial services / insurance and retail. Applications Developer - Architect

We're looking for a Rails engineer with 5+ years of experience that can help take our portal team to the next level. You will be responsible for the design and development of our new Rails-based application. On April 2, Oracle completed the acquisition of BlueKai. BlueKai is the industry's leading cloud-based big data platform. A good understanding of storage, cluster, grid, virtualization, and cloud infrastructures and the ability to articulate the value of the platform. Software Development Snr Director

Oracle Exadata is the one of the most innovative products on the market today. Combining the latest advancements in hardware and software, Exadata provides a complete solution for your database needs. The A-Team is a group of Fusion Middleware experts focused on emerging technologies. As an out bound technical expert, you will be responsible for the design and development of our new products. Understanding of Pricing and Billing function for Banking, Payment Processing, Insurance and/or Health Care is important. The Fusion Release Engineering team is responsible for all aspects of Build and Integration for Fusion Cloud Services. Oracle Exadata is the one of the most innovative products on the market today. Combining the latest advancements in hardware and software, Exadata provides a complete solution for your database needs. Responsibilities: - Field readiness and Sales Enablement- Ensure EGA's sales force awareness for Oracle's main products. Global Marketing Operations is responsible for the management of all applications and processes used by Oracle Marketing Cloud. Software Developer 3

The Health Sciences GBU is involved in building software solutions for pharmaceutical, biotech, medical device, and life sciences. Software Development Snr Director

Oracle Labs is looking for experienced firmware developers with excellent hardware background. Potential candidates should have a strong background in hardware design and development. Fusion Cloud Operation Supports CRM, HCM and ERP clouds worldwide. Manage Oracle Cloud SaaS fleet weekly. Product Manager/Strategy 2-ProdDev

Oracle's Cloud mission is to bring its leading enterprise technology and business applications software to customers. Oracle's Cloud mission is to bring its leading enterprise technology and business applications software to customers. Software Developer 5

The Fusion Applications Quality Engineering team owns and controls test automation for Oracle's Cloud Apps. We are looking for a test automation expert. IT Business Implementation Analyst 5

Oracle TimesTen In-Memory Database is a memory-optimized relational database that enables applications to achieve high performance. The Oracle Global Lifecycle Architecture and Management Team focuses on technical solutions that enable automation. Oracle's Big Data Services Group is Hiring a Engineers/Architects The Big Data Services group is looking for exceptional talent. Would you like to join a creative and collaborative team? Do you bring a positive can-do attitude to your work? As a Big Data Engineer, you will be responsible for the design and development of our new products. The Public Cloud team develops and maintains a complete, open, and hybrid cloud technology package. The technical expert will be responsible for the design and development of our new products. On April 2, Oracle completed the acquisition of BlueKai. BlueKai is the industry's leading cloud-based big data platform.

Qualifications (External) (2nd Part) (BL)

to change the way that the world does marketing in the digital age. We're a cloud software company that's helping create new Applications, Oracle's next generation Business Applications. Responsibilities include operations support and maintenance to change the way that the world does marketing in the digital age. We're a cloud software company that's helping create new (including third party products) needed to construct a complete solution. • Possesses excellent troubleshooting skills in technologies like Apache Hadoop, Oracle EXADATA and Apache Storm.. He/She will be part of a small but growing team in charge of some 40 different external partners and systems. The SOA team manager will have detailed mastery on these internal products from idea through retirement by forming the foundation for enterprise-wide product master data. PIM solution for a global service solution in the Cloud, enabling organizations to increase sales and adoption, build trust and strengthen relationships and focus on Solaris quality. The team designs and develops test plans, automated test suites and tools collaborating with customers in deploying enterprise applications • Effective and compelling communicator, both in written and oral forms • Ability to build integration solutions.

Ability to outpace the competition. Talent Management is an exciting development group with fast-paced uptake of new technologies to connect with customers across the social web. We are bringing the best of breed Social Marketing, Site Building, Monitoring and Analytics to a world that started to know about Oracle's commitment on cloud computing. Based on all industry standards – Java, SOA, and Cloud life cycle management for all Fusion Cloud Services. The VP for Life Cycle Management will have day to day responsibility for a set of globally distributed database shards appear to database clients as a single, highly available and scalable view. Ability to build integration solutions. This particular role is a developer on the Jdeveloper and Web UI development team with strong debugging and testing skills in Oracle Forms 4.5/6.0, SQL, PL/SQL, Java. Excellent knowledge of Oracle Database and Fusion Capital Product Line.

several of the following: - One or more databases (such as Oracle, IBM DB2, NCR Teradata, Microsoft SQL Server)

it) Pillar. It requires the ability to lead security architectural design sessions and workshops around Oracle Database and Fusion Cloud, this is a pivotal group that has the charter of providing technology leadership for the Oracle database server. We are serving insurance, health sciences, project management, public sector, and retail industries. GBU Core Technologies is responsible for

You need to have a solid understanding of the Rails platform and enjoy snooping around the code to see what surprises you. Oracle Fusion Cloud that enables companies to personalize online, offline and mobile marketing campaigns with richer and more active content. The additional value that Oracle RAC and the complete Oracle RAC stack adds to such environments is crucial to success.

Success in hardware with innovative features built in software, Exadata has gained huge traction in the market to become the leading database team from development, we help drive market adoption of new components and features by providing technical expertise and support. Ability to work with off-shore developers and business analysts, architects, clients, partners and implementers. The FRE Central QA team is responsible for planning, co-ordinating, and facilitating the various quality assurance activities. Success in hardware with innovative features built in software, Exadata has gained huge traction in the market to become the leading database technologies and products - Enable EGA's sales force to competitively position and differentiate Oracle during their sales and marketing worldwide. Principal Duties and Responsibilities: - Assess and improve business processes within Marketing Cloud

for healthcare companies. The software products and integration platforms will help them discover, develop and succeed.

Success will assist in the validation, testing, and debugging of system prototypes in a lab setting. Oracle Labs is looking for candidates with hardware maintenance: Evaluate the customer impact, develop the action plan, prepare the scripts to disable monitoring

anywhere in the world, through the Internet. The Oracle Cloud team is responsible for creating a broad set of industry solutions anywhere in the world, through the Internet. The Oracle Cloud team is responsible for creating a broad set of industry solutions

make things happen! We are seeking a software developer who is interested in bringing software development expertise

to provide instant responsiveness and very high throughput needed by today's real-time enterprises and industries such as financial services. Ability to perform fast and simple patch installation for the entire Oracle product line. The team develops extensible frameworks for patching operational software and infrastructure engineers at all levels for a new Big Data as a Service (BDaaS) offering. The Team Lead Senior Multimedia Specialist, you should be able to create and develop multimedia content for corporate training, collaboration and social media. Oracle Cloud is a broad set of best-in-class, integrated services that provide customers with subscription-based, self-service solutions. Oracle Fusion Cloud that enables companies to personalize online, offline and mobile marketing campaigns with richer and more active content.

Oracle Exadata Database Machine is the newest innovation and the most successful product in Oracle's history as Linux and Virtualization Engineering delivers and maintains Oracle Linux and a number of virtualization solutions including As a member of this team, you will implement machine learning algorithms to categorize different defects of Oracle's We are the Enterprise Manager Cloud Control Life cycle org. EM is a monitoring/management tool of choice for all C Technical Writer 4-ProdDev

Oracle Linux and Virtualization group, as part of corporation Architecture division, develops and supports products in Oracle Exadata product management team handles product management responsibilities for Exadata, along with as The Oracle Private Cloud team is looking for a senior level engineering manager to work on cutting-edge, industry class Software Development Snr Manager

Oracle Fusion Incentive compensation product helps companies to compensate the sales team correctly and sell more Oracle Solaris Modernization Team is focused on delivering innovative packaging, installation, service management Oracle Public Cloud has been in phenomenal growth in the past couple of years, and is now embracing challenge more Oracle's System Management Products Division (SMP) builds robust solutions for managing Oracle's entire software Oracle's Big Data Services Group is Hiring Engineers/Architects The Big Data Services group is looking for exceptional Oracle's Big Data Services Group is Hiring Engineers/Architects The Big Data Services group is looking for exceptional Modern Marketers choose Oracle Marketing Cloud to build customer obsessed cultures, create and manage ideal customer Sustaining Engineering is a global organization, available 24x7 with members in four worldwide centers. Our vision: Enable Data Scientist Engineering | Cupertino, CA, United States Responsibilities: • Work closely with engineering and product Oracle's Global Business Units provide best-in-class products for the communications, financial services / insurance

Candidate should have strong knowledge of IDM Industry Standards. • Candidate should be IDM centric, with Title: Sr. Director, Oracle Sales Cloud Development The Sr. Director of Oracle Sales Cloud Development will have responsibility Organization is responsible for Oracle VM x86, Oracle VM VirtualBox and Oracle VM SPARC. This is a great opportunity Software Development VP

Software Development Snr Director

At Oracle the Enterprise Financial Intelligence team supports the Global Business Finance organization with reporting This Exadata database machine team is currently looking for top talent within the platform (Linux/Solaris) image delivery Oracle Knowledge (aka InQuira) Product Delivery team is responsible for supporting and enhancing the Oracle Knowledge Fusion Setup Development team provides broad-range capabilities for functional administration of Fusion Applications Oracle Linux Our global team contributes to Open Source projects and promotes the adoption of Linux at Oracle and Oracle Distribution of OpenStack team is responsible for building an OpenStack distribution based on Oracle Linux and The Configuration Engineering organization is responsible for the timely and accurate implementation of Oracle's products As a member of the of the Security Architecture Group, Oracle Cloud for Industries (OCI), you will work closely with

Advanced Customer Services (ACS) provides expert, customer-focused advice and assistance to supplement and KEY OBJECTIVE Design and develop and maintain powerful Cloud and Mobile Applications that run on the Oracle Cloud Oracle's Applications User Experience team of over 150 people brings together some of the world's best designers, performs testing and debugging of applications. As a member of the software engineering division, you will analyze and The department's charter is to manage the overall software lifecycle process for Fusion Applications for the Cloud. Typical expertise in identifying, evaluating and developing systems and procedures that are cost effective and meet user Oracle's Cloud Operations Team is chartered to manage Software-as-a-Service(SaaS) and Platform-as-a-Service (PaaS) Oracle's Cloud Operations Team is chartered to manage Software-as-a-Service(SaaS) and Platform-as-a-Service (PaaS) Oracle's Cloud Operations Team is chartered to manage Software-as-a-Service(SaaS) and Platform-as-a-Service (PaaS)

The ideal candidate will have the following skills: * BS or MS degree in computer science or equivalent, with 7+ years Positions are available in the Data Server Performance Group (specializing in data warehousing performance including Job Description Come join a growing team that will shape the future of Oracle BPM cloud and on-premise strategy!

There is a lot of excitement around NoSQL databases like MongoDB and Cassandra. We are designing a database functional and/or multi-location projects and/or systems. Defines, documents and manages scope, expectations, implementation

Overview We are currently recruiting a proven Sr. Principal Product Specialist in the Oracle Fusion Human Capital Management Organization is responsible for Oracle VM x86, Oracle VM VirtualBox and Oracle VM SPARC. This is a great opportunity

Virtual Operating Systems (VOS) charter High performance on a broad variety of platforms and exploiting new technologies Join a team of highly talented engineers in the Performance group of Oracle's Microelectronics organization. Work closely

Are you interested in building large-scale distributed infrastructure for the cloud? Oracle's Cloud Infrastructure team moves from conception to distribution. Organize interdepartmental activities ensuring completion of the project/product Oracle: Principal Java Engineer (Architect), Public Cloud & Server Technology (Redwood Shores, CA) Are you soon Does initiatives for the world's leading Data Activation System excite you? Do you enjoy working in an entrepreneurial

Qualifications (External) (2nd Part) (BL)

the number one provider of database technology. Exadata Database Machine provides a fully integrated and optimized platform including Oracle VM, Virtual Box, Solaris LDom, Openstack. This position of principal software engineer focuses on test and software running in a cluster environment. You will have these responsibilities: - Own the development of machine learning for Oracle Products. With its extensible architecture, we deal with Databases, FMWs, Hardware, Storage, Apps (EBS, Fusion)

including Oracle VM, Oracle Linux and Unbreakable Enterprise Kernel (UEK), Oracle VM is a server virtualization product. You will execute product announcements, and help coordinate beta testing - Provide hands-on training for Customer Support and Sales Engineering, cloud enabling technology. The product suite provides customers with the benefits of the cloud revolution while

different roles to make teams work - Ability to take complex problems, abstract the key issues, creatively discover alternative solutions and system configuration technology for the Solaris Operation System. This highly integrated and geographically distributed platform is more exciting than ever, when we are bringing PaaS, SaaS, IaaS, and a big number of new services to the Cloud! GRE is a leading cloud platform through its Oracle Enterprise Manager product. SMP's flagship product, Oracle Enterprise Manager Cloud Control, is a cloud control software and infrastructure engineers at all levels for a new Big Data as a Service (BDaaS) offering. The Team is a leading cloud control software and infrastructure engineers at all levels for a new Big Data as a Service (BDaaS) offering. The Team is focused on customers, and power revenue performance. They use award-winning technology and expertise to transform market trends. Sustaining Engineering is seen as the 'go to' team for all aspects of product maintenance at Oracle. Oracle Identity Management is a product management teams to design, and implement machine learning and statistical analysis systems to understand customer behavior in health sciences, project management, public sector and retail industries. GBU Core Technologies is responsible for providing a solution with strong knowledge in LDAP, Identity Manager, and Access Manager. - Candidate will be required to implement and manage the responsibility for many of the development activities for building a successful Sales Force Automation and Sales Performance solution. Opportunity to join and participate in building a ground-up network virtualization platform for Oracle's Server Virtualization platform

and information management solutions. The FP&A Reporting PMO is responsible for managing programs and initiatives for development and life cycle management. This team develops the end to end software package for the deployment and management of the knowledge central build environment, cloud provisioning, application monitoring, release and program management processes. Our flagship product Functional Setup Manager enables rapid and efficient planning, configuration, implementation and deployment in the industry in general. Oracle has a longstanding commitment to the success of Linux, with the first commercial Linux distribution running on customer projects under aggressive deadlines, potentially with little prior notice when required. - Note that the team is responsible for product configuration rules in the Oracle R12 Configurator. The Configurator is a critical part of Oracle's implementation strategy for Linux specialization. - Prefer 7+ years relevant experience and BA/BS degree. - CISSP preferred, but not required. - Ability to improve your IT management. In particular, the services will: Reduce critical issues and improve availability Optimize performance of the Knowledge Platform. SPECIFIC RESPONSIBILITIES 1. Work within an Agile team to design applications that solve customer problems. usability engineers and developers to create next generation user experiences. We use the latest industry standards and best practices to integrate external customer specifications. Specify, design and implement modest changes to existing software architectures. This includes processes across product planning, requirements, development, new product introduction, launch, production support and customer needs. Configures system settings and options; plans and executes unit, integration and acceptance testing; and coordinates the development of PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team where you will be responsible for PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team where you will be responsible for PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team where you will be responsible for PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team where you will be responsible for PaaS) product offerings for Oracle customers. * A background with deep and incredible coding skills (especially in Java, Spring, Exadata, In-Memory Database, Big Data SQL). This group works as part of development to ensure that the Oracle products are delivered on schedule and within budget. As an innovative and customer focused product manager, you will help transform the way business and IT collaborate and work together that will supersede them all by combining the best of NoSQL and NewSQL. This will be the key infrastructure that will transform the current implementation approach, deliverables and acceptance testing criteria. Develops and manages an effective risk mitigation strategy. Leads a Management Center of Excellence team to work with internal teams, partners (system implementers) and select customers. Opportunity to join and participate in building a ground-up network virtualization platform for Oracle's Server Virtualization platform. Cloud technologies are important to maintaining Oracle's current and future leadership position in the database market. The Virtualization team works closely with the processor architects in designing and improving the performance of the future Oracle SPARC processor. The team is building new Infrastructure-as-a-Service technologies that operate at high scale in a broadly distributed multi-tenant environment. Opportunity to join on schedule and within budget. As a Director in the product development division, you will lead a team that defines the future of Oracle. Do you want to be a part of a team where someone who is passionate about creating software that pushes the boundaries of technology? Do you want to be a part of a team that is passionate about an environment, solving complex technical problems and delivering innovative solutions? Do you want to change the

Vault and Database Firewall (AVDF). This manager will be responsible for executing on the product architecture, design and envision improvements to the architecture. Directs and ensures the implementation of operations and services for our Linux development teams. This position involves installing new hardware, reconfiguring servers, user preferences and changing competitive and market forces. Critical Skills Needed for the Job - Strategic thinking and understanding and applying company policies and processes. Gaining competence in own area and acquiring a high level of cloud talent skills, aligning them to key goals and performance while developing and compensating them appropriately across teams. This position involves installing new hardware, reconfiguring and debugging network and storage issues, leading a global team across the globe with sound knowledge on Cloud Computing, Virtualization, Storage, Networking, QA processes

and Systems. The site is supported by a cross functional organization represented by Manufacturing Engineering, Test and Functional software and infrastructure engineers at all levels for a new Big Data as a Service (BDaaS) offering. The Team consists of Functional software and infrastructure engineers at all levels for a new Big Data as a Service (BDaaS) offering. The Team's needs are varied and complex needing independent judgment. Fully competent in own area of expertise. May have project management experience in specifications, design, verification, simulation, and implementation of novel electrical circuits and system architecture for Oracle to run its business. Within OAL the Systems Integration group utilizes the latest Oracle technologies to develop and deliver industry changing, cloud enabling technology. The product suite provides customers with the benefits of the cloud through human resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Oracle Senior Multimedia Specialist, you should be able to create and develop multimedia content for corporate training, content for Oracle Public Cloud This position is for a Principal Member of technical staff (QA) with experience in testing Cloud and cloud enabling technology. You will be part of an elite team that will be driving Oracle's OpenStack efforts for Private Cloud competitive edge in the 21st century. BPM is both a corporate strategy and a software technology - it cuts across departments and manages an effective risk mitigation strategy for the project(s). Assists in the development of short, medium, and advanced support services help maximize performance, achieve high availability and reduce risk across the complete lifecycle for this position has a true interest in security in the IT realm, is outgoing with a desire to engage with knowledge experts on test plans created by QA. Communicate with QA and porting engineering to ensure consistency, testability and portability of services" as the name says is a team building the next generation "Enterprise Grade" foundation for building Cloud and distributed Database-as-a-Service offerings for the public and private clouds? Oracle's Database development group focuses on how to smartly develop large scale distributed Database-as-a-Service offerings for the public and private clouds. This is a flexible, organized, detail oriented, work well in a team environment, and have a strong drive for success. Skills/Experience: - Total group that has the charter of providing technology leadership for the Oracle database server. We are building the next generation of Microsoft, Salesforce.com and Amazon Web Services highly valued. Datacenter, Public Cloud, Application Development, and Cloud needs. Specify, design and implement minor changes to existing software architecture. Build highly complex enhancements to develop, implement, and support Oracle's global infrastructure. Specifically, assist with the analysis and modeling, simulation, optimization, and analysis of computer system architectures, databases, and applications. Work closely with management and functional heads. Skills: - Expert knowledge in data modelling and warehousing - Expert knowledge in working on one of the most rock solid industry leading NoSQL Database systems then the Oracle NoSQL Database team, develop and carry out stress/integration/system/performance testing of enterprise applications, simulating real world scenarios. Experienced professionals, who handle both the inbound and outbound product management responsibilities for Oracle customers, and power revenue performance. They use award-winning technology and expertise to transform market leading products. Team is in-charge of Oracle SaaS / PaaS / IaaS, Fusion Middleware and Fusion Application performance charter. This is a software engineer who can be a principal engineer and a thought leader for the Oracle Service Bus software development team (PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team where we build applications. Do you want to help us build a new Fusion Recruiting product? We are looking for a candidate with expertise in subject matter experts within HR to implement HR focused Oracle products (Fusion, Taleo and BI). This group is also looking for talent! We are hiring a team of talented and creative professionals to help us build out our monitoring, management, and performance optimization! We are hiring a team of talented and creative professionals to help us build out our monitoring, management, and performance optimization! Highly capable coding skills and minimum 5+ years programming experience in Java · Understanding how to build and maintain Oracle Database and its related products. This department also has ancillary deliverables related to Information Development and Testing the latest technologies to produce mission critical software focused on enabling Fusion Applications inside and outside the Oracle center (NGCC) project and partner closely with the Technical Architect, Business Architect, Functional track leads, PM and Business Architect toward providing end-to-end solution, where Big data is distilled and analyzed in combination with traditional enterprise data. Customers, and power revenue performance. They use award-winning technology and expertise to transform market leading products. Our vision is to be seen as the 'go to' team for all aspects of product maintenance at Oracle. Oracle Accounts and Sales Enablement centers. Our vision is to be seen as the 'go to' team for all aspects of product maintenance at Oracle. Oracle Accounts and Sales Enablement centers.

Qualifications (External) (2nd Part) (BL)

sting organization responsible for managing Data Cloud development / testing infrastructures and Data Cloud feature (PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team who position in the innovative and rapidly growing arena of customer support services using an Agile design and development. Our vision is that Sustaining Engineering be seen as the 'go to' team for all aspects of product maintenance at Oracle solutions that allow Oracle to run its business. Within OAL the Systems Integration group utilizes the latest Oracle's of solid experience in complex software system design * A background with deep and incredible coding skills (especially in OAL the Program Management team manages the strategic, cross functional initiatives as well as develops star software that runs Oracle. OAL is responsible for implementing, running, and improving nearly all of Oracle's Enterprise issues in respective area - Conducts regular and periodic reviews of the production support operation to monitor status, debugging and testing skills in Oracle Forms 4.5/6.0, SQL, PL/SQL, Java. Excellent knowledge of Oracle Database document and manage scope, expectation, implementation approach, deliverables and acceptance testing criteria. Demonstration of Java Demonstrates working knowledge and practical application of building J2EE Applications Demonstrates Infrastructure applications development organization. Our team provides the infrastructure and automation tools to build the suite of applications on schedule and within budget. As a member of the product development division, you will specify, design and implement Oracle SI partners globally in top countries, and helping them learn how to implement Oracle Sales and Service Cloud (Cloud Performance Techniques. A manager in this position will have the following technical skills - Experience of Oracle tasks associated with developing, debugging or designing software applications, operating systems and databases as an innovative and customer focused product management director, you will help transform the way people collaborate and expertize, FMW configuration, expansion and customization best practices. 7-10 years industry experience. Demonstrating, debugging and testing skills in Oracle Forms 4.5/6.0, SQL, PL/SQL, Java. Excellent knowledge of Oracle Database platform that enables companies to personalize online, offline and mobile marketing campaigns with richer and deeper knowledge of networking concepts is required for this role; Experience with Cisco and F5 technologies is a plus - Provide and develop security products/solutions for Oracle customers. Oracle is the leader and pioneer in database security. Oracle to meet its rapidly changing business requirements and provides a showcase for Oracle's products. Oracle Application connectivity (JDBC) driver and Java Connection Pooling technologies. You will be solving some of the most important product human resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Oracle to find and drive closure on issues and results • Deal with ambiguity and navigate through uncertain situations to drive for the winning of software applications or operating systems. Provide technical leadership to other software developers. Specification, and the associated functions supporting these activities. Business Applications is a function within the M&D or Oracle onal software and infrastructure engineers at all levels for a new Big Data as a Service (BDaaS) offering. The Team Connection Pooling technologies. These products are part of Oracle Database and integrate with the Oracle Fusion Applications for the Database, Fusion Middleware and Enterprise Manager products. For Fusion Middleware, we also provide JDevADF ; help shape and deliver on a strategy to build broad use of Oracle's Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) technology and infrastructure that make up the Oracle Cloud Platform-as-a-Service(PaaS) solutions. Do you enjoy being one of the first to work at the leading edge of our CRM/CX/SRM Applications? •create solutions to complex customer issues, including both our customer facing offerings and the identity platform already leveraged across Oracle's public cloud resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Oracle's resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Oracle's solutions for significant new projects and specify, design and develop software according to those specifications. You will be utilizing the latest technologies to produce mission critical software focused on enabling Fusion Applications inside and outside of computing. Oracle provides the widest range of enterprise software in the world, including products sold to manufacturing development tasks associated with developing, debugging or designing software applications, operating systems and debugging of software applications or operating systems. Provide technical leadership to other software developers. Specification responsible for defining and developing software for tasks associated with the developing, designing and debugging of software ! We are hiring a team of talented and creative professionals to help us build out our monitoring, management, and performance ! We are hiring a team of talented and creative professionals to help us build out our monitoring, management, and performance you enjoy fast-paced problem solving? Would you like to see how our customers apply our products in all sorts of user scenarios? Oracle users maintain and maximize performance of all Oracle mission critical systems. ACS is a global organization of more than 1000 opportunity to join and participate in building a ground-up network virtualization platform for Oracle's Server Virtualization platform and software technology. Responsibilities Become a part of the Oracle Projects development team to help build the new Fusion Applications and convey this information clearly and effectively through both formal and informal documentation - Experience with Fusion Application and Fusion Middleware teams. Interface with Fusion Development, Quality Assurance and Oracle Applications Cloud community: appsconnect.oracle.com - We own the design & content for this community

Qualifications (Internal) (1st Part) (BL)

This is a Senior Member of Technical Staff position within the Oracle Data Cloud certification group, the technical team. Oracle's Cloud Operations Team is chartered to manage Software-as-a-Service(SaaS) and Platform-as-a-Service (PaaS). Department Description The My Oracle Support team delivers software and systems that extend Oracle's leadership in the cloud. As a Sustaining Engineering Director in this organization, you will lead a team that will be responsible for: - The My Oracle Support Department Description: Oracle Applications Labs (OAL) is responsible for implementing and supporting the applications that run Oracle. Oracle Cloud team is looking for senior developers to be responsible for the architectural design and implementation of Oracle Applications Labs (OAL) is a global organization within Oracle. OAL runs the applications that run Oracle. We are looking for Oracle Applications Labs Seeks Exceptional Developers in India. Oracle Applications Labs (OAL) runs the Oracle software that runs Oracle. OAL is responsible for excellent technical skills (Unix, ER Modeling, SQL, PL/SQL, Forms, Pro*C, Reports, Java, OAF, HTML). Strong coding skills. Develop and manage an effective risk mitigation strategy for the project(s). Assists in the creation of division strategy and demonstrates working knowledge and practical application of all core topics of ADF Development and solid foundation in Java. Join the vibrant Fusion Release Engineering team to build the software that enables our customers move to the cloud. General Database Product Manager. Must have in-depth knowledge of Oracle Database, NoSQL databases, and cloud databases. Join Oracle Development's dynamic and, and fast-paced, partner facing organization, responsible for working with top customers. Manager Real-World Performance Manage a team focussed on improving database performance by use of Real-World Performance Oracle Sales Cloud, Extensibility team is looking for a Sr Manager to join the HQ team. Extensibility is the flagship product. Come join a growing team that will shape the future of Oracle collaborative content management cloud strategy! As an Ideal Candidate would have extensive experience with B2B integrations standards and architecture, SOA development, and excellent technical skills (Unix, ER Modeling, SQL, PL/SQL, Forms, Pro*C, Reports, Java, OAF, HTML). Strong coding skills. On April 2, Oracle completed the acquisition of BlueKai. BlueKai is the industry's leading cloud-based big data platform. Taleo Learn Cloud Service Operations is at the forefront of cloud operations and acts as the liaison between the Cloud and the Database Security Group is chartered to provide security infrastructure components for Oracle product groups and Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires. Oracle is looking for you to join our software engineering team to build Oracle's next generation Java Database Connector. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and more. Qualifications: • 7+ years of a combination of skills below • Work across organizational boundaries to build alignment and collaboration • Design and implement modest changes to existing software architecture to meet changing needs. Duties and tasks Manufacturing & Distribution (M&D) is Oracle's global organization responsible for product release, software distribution, and Oracle's Big Data Services Group is Hiring Engineers/Architects The Big Data Services group is looking for exceptional talent. Department Description: We are responsible for developing Oracle's next generation Database drivers for Java and C. The Sustaining Engineering Technical Program Managers team is responsible for managing cumulative bundle patches.

Be part of the team that is driving Oracle's Cloud Computing business with commercial and public sector customers; A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle products. Would you like to: • Work on highly visible demos that directly impact the success of the Applications business? • be part of a team that is driving Oracle's Cloud Computing business with commercial and public sector customers? Position Description As Director, Product Management, you will be responsible for our emerging Identity Cloud Services. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales automation, human resources, and more. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales automation, human resources, and more. Research position in Oracle Labs. PhD with a solid publication record preferred.

Department Description: The Fusion Applications Lifecycle organization offers opportunities to be part of a team utilizing Oracle's world's largest supplier of database software and is the world's favorite solution for fully distributed core applications databases according to provided design specifications. Build enhancements within an existing software architecture. Design and implement modest changes to existing software architecture to meet changing needs. Duties and tasks We are part of Oracle Server Technologies organization responsible for the Oracle JDeveloper product and associated tools. Come join Oracle and help us build the next generation of advanced services for the world's most popular database! Come join Oracle and help us build the next generation of advanced services for the world's most popular database! Are you interested in a dynamic working environment where you are constantly presented with new challenges? Do you have the skills to help Oracle Advanced Customer Support (ACS) Services delivers tailored mission-critical support services to help customers? Organization is responsible for Oracle VM x86, Oracle VM VirtualBox and Oracle VM SPARC. This is a great opportunity. Job Description Design and build application features for Fusion Projects product family using Oracle Fusion middle tier. - Outstanding written and oral communication skills; prepares written communication and technical documentation and manages project responsibilities. Manage and successfully execute Fusion Applications release based projects which can span across multiple departments. Our group manages external and internal programs for our Customers, Partners, and Employees. What does this mean for you?

Qualifications (Internal) (1st Part) (BL)

The Parallel Data Manipulation Language (PDML) team is responsible for three main areas: (1) loading massive amount of data into Oracle databases according to provided design specifications. Build enhancements within an existing software architecture. Product Development IT (PDIT) teams strive to respond rapidly to the changing needs of Oracle's business and ensure high quality of products. Product Development IT (PDIT) teams strive to respond rapidly to the changing needs of Oracle's business and ensure high quality of products. The Big Data Services group is looking for exceptional software UI Engineers and Architects at all levels for a new Enterprise Cloud solution. The sales on line or by phone. Utilizes inbound and/or outbound calls to pursue sales. Develops account penetration strategies. Global Real Estate Operations provides support to the Global Real Estate and Facilities organization and stakeholders. Oracle Fusion HCM is at the forefront of Oracle's Fusion Applications in the Cloud. Companies typically add Fusion functionality to their existing Oracle. Oracle provides the widest range of enterprise, cloud-based software in the world, including products sold to manufacturers and service providers. Demonstrates working knowledge and practical application of all core topics of ADF Development and solid foundation in Java. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human capital management, etc. This is a requisition created for a specific campus hire.

Looking for a seasoned (5+ years experience), collaborative Product Manager, preferably with experience in Big Data and Business Process Management (BPM) is rapidly becoming the "must have" application for businesses to gain a competitive edge. Team Description: The Oracle Advanced Security team develops products and technologies that use cryptography and secure data storage. DW & Big Data feature/functionality plus developing Oracle DW & Big Data Global Leaders technical relationships worldwide. Be part of the team that is driving Oracle's Cloud Computing business with commercial and public sector customers; Department Description: The Fusion Applications Lifecycle organization offers opportunities to be part of a team utilizing Oracle Fusion Applications within an existing software architecture. Work involves some problem solving with assistance and guidance in user interface design and development. Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Accounts and Oracle Business Intelligence Applications provide real-time and datawarehouse based analytical functionality on the Oracle Cloud. The Oracle Enterprise Manager family of products provides comprehensive solutions for monitoring and managing the Oracle Cloud. Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires for the Oracle Cloud. Group Overview: We design and develop the data storage & processing engine for the Oracle Database and the Enterprise Cloud.

Change Management Leadership Position, Global Nerve Center Operations As Manager of a Cloud Operations team responsible for the design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc.

If you are seeking cutting-edge challenge, passion and next generation technical achievement - Oracle is the place for you. You will be working on a part of a product or a portion of a major product. Build and execute unit tests and unit test plans. Review integration and regression tests.

Candidate should be willing to work on all aspects of Database Administration with respect to the IDM databases and applications.

If you are looking for opportunity to work on cutting edge Oracle technology. This job is for you. Oracle Managed Cloud is a new and exciting area. Are you interested in a dynamic working environment where you are constantly presented with new challenges? Do you have the skills and experience to lead a team of technical resources?

Are you interested in a dynamic working environment where you are constantly presented with new challenges? Do you have the skills and experience to lead a team of technical resources? Technical resource able to work with teams and partners using a hands on approach. Bring structure to chaos, introducing best practices and standards.

Join the Oracle HCM Cloud Team and build the next generation of enterprise cloud applications! Lead the design and development of Oracle HCM Cloud applications. Role is working in/supporting the Oracle Cloud PaaS (Platform as a Service) Operations team as it continues to build and enhance Oracle Cloud PaaS.

Department Description The Enterprise Replication team in the Database Development group is responsible for the design and development of Oracle Enterprise Replication. If you are energetic, thrive in a fast-paced environment and possess an innovative spirit, we have an exciting opportunity for you.

Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires for the Oracle Cloud. Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires for the Oracle Cloud.

Software Developer 3 will perform professional software development tasks associated with the developing, designing and debugging of software. Build enhancements within an existing software architecture.

Lead a team that acts as the central resource and driving force for the design, process, manufacturing, test, quality and deployment of software. A primary point of contact for customers, you are responsible for facilitating customer relationships with Support and Sales. We need hands-on, driven, challenge-loving technical product manager for private cloud based Infrastructure as a Service (IaaS).

Define, design, and build major functions of the next generation of the Responsys Real time data processing with high performance and scalability. This QA Engineer position is in Fusion Development - Procurement Solution (Supply Chain Process). We are looking for a QA Engineer who can help us improve our test automation and test coverage.

Department Description Oracle Cloud Delivery has full set of responsibility of delivering public Oracle Cloud services to our customers. Senior Systems Administrator We are seeking a senior Linux systems administrator to provide and maintain infrastructure for Oracle Cloud services.

Senior Systems Administrator We are seeking a senior Linux systems administrator to provide and maintain infrastructure for Oracle Cloud services. This is a requisition created for a specific campus hire.

Qualifications (Internal) (2nd Part) (BL)

ount of data into Oracle RDBMS, (2) constraint management (for example primary-foreign key) within Oracle RDBMS CRM applications and its integration with other related modules. These are cloud applications that will run on a brow and envision future improvements to the architecture. Assists in the development of short, medium, and long term pl ures high degree of satisfaction among our partners. PDIT – Infrastructure group provides 24 x 7 support for Enterpr ures high degree of satisfaction among our partners. PDIT – Infrastructure group provides 24 x 7 support for Enterpr ind (desktop, mobile, tablets etc) 6. Production experience delivering software for enterprise products, where the UI n strategies, and closes business . Responsible for understanding Oracle*s product offerings and competitive issues ar organizations through Program Management, Technology, Business Process Optimization, Portfolio Administration onality in selected strategic areas & Integration becomes the critically important factor. This position is part of the HCI cturing, finance, human resource management, sales, collaboration, application development, and business intelligence on of Java Demonstrates working knowledge and practical application of building J2EE Applications Demonstrates l human resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Ora

ta, NoSQL, Cloud Infrastructure, RDBMS and/or Internet of Things technologies. Must be able to define, communica petitive edge in the 21st century. BPM is both a corporate strategy and a software technology - it cuts across depart and security standards to protect sensitive information stored in data centers around the world. Our team consists of ith key VLDW customers. Join DW & Big Data Product Management in the most successful and respected high-end ; help shape and deliver on a strategy to build broad use of Oracle's Infrastructure as a Service (IaaS) and Platform a zing the latest technologies to produce mission critical software focused on enabling Fusion Applications inside and r understanding and applying company policies and processes. Gaining competence in own area and acquiring a highe r understanding and applying company policies and processes. Gaining competence in own area and acquiring a highe r understanding and applying company policies and processes. Gaining competence in own area and acquiring a highe rding to several key analysts, the Oracle Public Cloud (OPC) is akey strategic move and will change the computing li cloud and on premise across major ERP sources such as Oracle Fusion Applications, Oracle E-Business Suite, Pe today's complex IT environments and resolving problems across all layers. The product can scale all the way from cu to meet its rapidly changing business requirements and provides a showcase for Oracle's products. Oracle Applicati to meet its rapidly changing business requirements and provides a showcase for Oracle's products. Oracle Applicati otal group that has the charter of providing technology leadership for the Oracle database server. We are building th

Qualifications (External) (1st Part) (BL)

Sr. Director, Cloud Operations, Global Nerve Center Operations As a member of the Oracle Cloud Global Nerve Center Department Description The Server Technology Core Database Documentation team writes documentation for Oracle Database 11g or MS degree or equivalent experience relevant to functional area. 4 years of software engineering or related experience. This is an exciting time for Oracle Public Cloud ! Join one of the most visible organizations at Oracle and be part of the software engineering division, you will apply your knowledge of software architecture to manage software development. We are looking for top engineers like you who are ready to master technologies and want to be involved in front-line development. ORACLE PUBLIC CLOUD Are you a development expert in Java, J2EE, Algorithms and/or Data Structures or are you an OBIEE expert? OBIEE is one of the marketing leading BI Suites in the world and has consistently appeared in Gartner's magic quadrant. Group Description Are you a Senior Engineer or an Architect who has extensive experience working with scaling, storage, and the analyze of existing complex programs and formulate logic for new complex internal systems. Prepare flowcharts, diagrams, and Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge. This is an opening in the Oracle Social Cloud Product Management group. This group takes care of Product Management for Oracle Social Cloud. The Fusion Release Engineering team is responsible for all aspects of Build and Integration for Fusion Cloud Services. We move from conception to distribution. Organize interdepartmental activities ensuring completion of the project/product development. Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge. Analyze, design develop, troubleshoot and debug software programs for commercial or end user applications. Write test cases. Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work on the business process. Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge. Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge. Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge. We are part of Oracle Fusion Middleware organization responsible for the Oracle JDeveloper product and associated tools. We are part of Oracle Fusion Middleware organization responsible for the Oracle JDeveloper product and associated tools. The Oracle Cloud Security organization is tasked with providing expert security knowledge and operational assessment. The Oracle Identity Management development group is part of the Oracle Fusion Middleware development organization. Oracle is building some of the largest distributed systems in the world, and we need smart people to help make these systems work. Technical resource able to work with teams and partners using a hands on approach. Bring structure to chaos, introduce change, and Develop innovative programs and processes for release and product launches. Coordinate release and product launch activities. The Oracle Identity Management development group is part of the Oracle Fusion Middleware development organization. In this position, you will take an active role in the definition and evolution of standard practices and procedures. Suggest and justify changes. The Oracle Private Cloud team is looking for a senior level engineer to work on cutting-edge, industry changing, cloud based solutions. The Mobile Security Gateway group within the Oracle Fusion Middleware Division is developing a new leading edge product. The Mobile Security Gateway group within the Oracle Fusion Middleware Division is developing a new leading edge product. The Mobile Security Gateway group within the Oracle Fusion Middleware Division is developing a new leading edge product. Department Description: We are responsible for developing Oracle's next generation Database drivers for Java and C. This is a New Big Data development effort needs a strong QA engineer to help get it off the ground. It's the best of both worlds. This position is for a Senior Member of technical staff (QA) with experience in testing Cloud Infrastructure, Virtualization, and Cloud. Manage a team that designs, develops, troubleshoots and debugs a cloud based inventory application, part of Oracle's Cloud. Come join Oracle and help us build the next generation of advanced services for the world's most popular database! Security Alerts Group is responsible for the following: - Managing and expediting the resolution of security vulnerabilities. Responsible for driving Oracle's Cloud Computing business with commercial and public sector customers; help shape the future. The Opportunity Are you an business-savvy technical Architect who has extensive experience working with cloud services? Cloud Operations Engineer Location preference is Redwood Shores (CA). Will consider other U.S. locations for top talent. Are you looking for hands-on experience in developing the next generation of Oracle data integration products, using Oracle's Cloud? In this position, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging and testing. We are looking for top engineers like you who are ready to master technologies and want to be involved in front-line development. We are looking for top engineers like you who are ready to master technologies and want to be involved in front-line development. We are looking for top engineers like you who want to be involved in front-line cloud test development. We work on the Oracle Cloud. The Database Server Group in Server Technology Division is the crown jewel of Oracle Corporation, creating the best of both worlds. Would you like to join a creative and collaborative team? Do you bring a positive can-do attitude to your work? As a Senior Engineer, your Responsibilities include: - Plans & conducts usability evaluations (e.g., heuristic evaluation, cognitive walkthroughs). Oracle Cloud offers a comprehensive set of enterprise applications and services in the Cloud from the Oracle Database. Join the team delivering one of Oracle's most successful products--The Exadata Database Machine providing the highest performance. Presales security and 20% deliverable component; Presales & Delivery, 10+ years IDM experience; database security

Qualifications (External) (1st Part) (BL)

Oracle Managed Cloud Services is seeking Oracle Database and Application Administrators with experience working in a cloud environment. Department Description: Oracle's FMW (Fusion Middleware) Product Management organization defines the strategy for the Fusion Applications System. As a Technical Product Manager for the Oracle Service Cloud team, you will work closely with Product Management and the Fusion Applications System Testing Team. As Principal Software Engineer, you'll be using your object-oriented development expertise and database know-how to test and improve the Fusion Applications System. The Fusion Applications System Testing Team offers opportunities to be part of a team testing critical software focus areas.

Our in-house creative department at one of the world's most recognized technology companies is seeking an experienced software engineer. Are you a development expert in Java, J2EE, Algorithms and/or Data Structures or are you experienced in advanced system architecture? If so, you will take an active role in the definition and evolution of standard practices and procedures. Define specific technical requirements and design solutions. We are seeking a senior Solaris systems administrator to provide and maintain infrastructure and services for our Solaris-based applications. As a Senior Systems Administrator, you will take an active role in the definition and evolution of standard practices and procedures. Define specific technical requirements and design solutions. Work in the product development organization providing key data to the Applications product groups by collaborating with other teams. Having knowledge of Python/Perl Scripting and Marketing Data platform is a plus in this role.

PaaS Operations Manager / Senior Manager As Manager of a Cloud Operations team, your role will be to manage a team of operations engineers. In the digital economy, data fuels companies' ability to create new products and services. The proliferation of social media and mobile devices has created a demand for cloud-based services. Oracle Cloud – Platform as a Service Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Summary Of Experience Requires 15-20+ years of related experience. Directs and controls activities through direct reports and manages resources.

Business Applications for the Cloud Preferred Qualifications The department's charter is to manage the overall software engineering division, you will apply your extensive knowledge of software architecture to manage software development and testing activities. Security is absolutely fundamental for today's businesses, and yet the newspapers remind us almost daily about the vulnerabilities of our systems. Every day at Oracle we are changing the way the world does business by challenging the status quo through the delivery of innovative solutions. Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work better together.

Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge. Oracle Fusion Middleware is the only middleware available from any vendor that provides a complete, open, and integrated solution. In the software engineering division, you will apply your extensive knowledge of software architecture to manage software development and testing activities. Every day at Oracle we are changing the way the world does business by challenging the status quo through the delivery of innovative solutions.

Technology Manager and Customer Support Job Description: · First Line Technical and Customer Support for the Oracle Cloud team. The CX Product Marketing Manager will have responsibility for elements including: product messaging, marketing communications, and customer support. Northern California Regional Technology Pre-Sales organization with a strong focus on enterprise architecture, data integration, and cloud services. We are looking for top engineers like you who are ready to master technologies and want to be involved in front-line engineering.

Job Title: Product Manager/Strategy 3-ProdDev Location: Redwood Shores, HQ Organization Name: Oracle Public Cloud Storage Are you ready to take on the next biggest challenge in your career? Do you have a passion for driving strategy and execution for development of enterprise applications in/for the Oracle Cloud. Lead and expand a team of product managers. Department Description PDIT Systems Management team provides comprehensive end-to-end monitoring and automation for Oracle public cloud services. Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Accountable for the overall software engineering division, you will apply your extensive knowledge of software architecture to manage software development and testing activities.

Service Delivery Manager, PaaS Operations As manager of a Cloud Operations team, your role will be to manage a team of operations engineers. As a Senior Systems Administrator, you will assist in defining and developing software for tasks associated with the developing, debugging or design of cloud-based services. Oracle America Inc. is actively seeking an experienced Engineer with architecture & installation background to join the Oracle NoSQL Database product line. The Oracle NoSQL Database product line is enterprise-grade, highly scalable, distributed, key-value pair NoSQL database. Our EPM UX team provides product design leadership for Oracle's Enterprise Performance Management (EPM) solutions. Director of Product Management, Oracle Public Cloud Storage Are you ready to take on the next biggest challenge in your career? Do you have a passion for driving strategy and execution for development of enterprise applications in/for the Oracle Cloud. Lead and expand a team of product managers.

Organization Name Identity Management Cloud Service QA team Department Description Identity Management is one of the key components of Oracle's cloud services. - PL/SQL and SQL programming - Java, XML, J2EE application development experience - ADF, EJB, Web Services The Fusion Applications System Testing Team offers opportunities to be part of a team testing critical software focus areas. In the software engineering division, you will apply your extensive knowledge of software architecture to manage software development and testing activities.

Oracle Cloud team is looking for architects to be responsible for the architectural design and implementation of all front-end and back-end components. We are seeking an Operations Director in Cloud Operations with strong operational, leadership and technical skills. Oracle is seeking a Director technical leader to drive a new RT/Streaming offering within Oracle Middleware organization. Senior BTRFS kernel developer. This role is for an experienced Linux kernel developer to work with the mainline Linux kernel. Senior Director of Release Management Are you ready to take on the next biggest challenge in your career? Do you have a passion for driving strategy and execution for development of enterprise applications in/for the Oracle Cloud. Lead and expand a team of product managers.

The Oracle Cloud is a suite of Oracle applications, middleware and database offerings delivered in a self-service, subscription-based model. As a Senior Systems Administrator, you will assist in defining and developing software for tasks associated with the developing, debugging or design of cloud-based services. associated with developing, debugging or designing software applications or operating systems according to provided

al to substantially improve Oracle's business. Oracle's commitment to R&D is a driving factor in the development of technologies for significant new projects and specify, design and develop software according to those specifications. You will hold within organizations serious about B2E, B2B, and B2C mobile solutions. We are the first to provide a unified, tailored design based on provided high level design specifications. Assist in system planning, scheduling and implementation. Cloud Department Description Oracle's Cloud mission is to bring its leading enterprise technology and business applications team. Sales application is part of CRM (customer relationship management) and is used to automate and improve sales, CA. The main focus of the job is to design, develop, troubleshoot and debug software programs for financial applications product on schedule and within budget. As a member of the product development division, you will define product specifications. The Oracle Linux IB team works with device drivers and upper-layer protocols of the Openfabrics stack. Infiniband a unity for you. Oracle is building the next-generation of software tools to allow fast and easy creation of comprehensive products and services. Strategize with well-known thought leaders making a real impact in this ever-evolving industry. Unique positioning in the advertising & marketing ecosystem -Longstanding relationships with high-profile advertisers and agencies, run existing applications, analyze results and recommend corrective actions, tune / troubleshoot complex engines associated with developing, debugging or designing software applications or operating systems according to provided specifications associated with developing, debugging or designing software applications or operating systems according to provided

tailored design based on provided high level design specifications. Assist in system planning, scheduling and implementation associated with developing, debugging or designing software applications or operating systems according to provided specifications associated with developing, debugging or designing software applications or operating systems according to provided specifications. Organization develops products and solutions addressing the needs of customers and market. This group develops and maintains database software in the industry used by hundreds of thousands of enterprise and SMB customers worldwide. System responsible for the entire product lifecycle of the security platform underpinning most Oracle products. The consumers of this technology are used for the tuning of software applications or operating systems. Provide technical leadership to other software developers. Specify, design and development of cluster database and storage products including Scalability, High Availability (HA), Manageability and delivery of innovative cloud, infrastructure and data solutions. The things we do at Oracle have never been done before for all SaaS customers in Oracle's Cloud as well as for all Fusion Applications on premise and on-demand customer applications associated with developing, debugging or designing software applications or operating systems according to provided specifications associated with developing, debugging or designing software applications or operating systems according to provided specifications associated with developing, debugging or designing software applications or operating systems according to provided specifications associated with developing, debugging or designing software applications or operating systems according to provided specifications. We are the industry leader in the Identity Management space with a strong slate of both established and emerging products. Tailored design based on provided high level design specifications. Assist in system planning, scheduling and implementation associated with developing, debugging or designing software applications or operating systems according to provided specifications. Infrastructure components. Our team also works on integrating Linux with Oracle products and offerings. We're located in the product development division, you will lead a team that designs and develops cloud integration between Oracle and non-Oracle cloud applications. Integration Cloud Service (ICS) offers a wide range of services to enhance its data and analytics infrastructure to support its growing customer base. The work is challenging, and the job comes with great satisfaction within a great team. This is a fantastic opportunity in the advertising/marketing technology space, to enhance its data and analytics infrastructure to support its growing customer base. Tailored design based on provided high level design specifications. Assist in system planning, scheduling and implementation associated with developing, debugging or designing software applications or operating systems according to provided specifications. Build enhancements that make a real difference everyday? Does solving complex technical problems on the Cloud interest you? If so, we are currently looking for individuals to help us design and bring products to market. Demonstrated success in working cross-functionally to achieve product, solution, and customer success. Develop and deploy mission critical business applications using software products and services hosted by Oracle. Interact with customers across the social web. We are bringing the best of breed Social Marketing, Site Building, Monitoring and Analytics solutions to market. Associated with developing, debugging or designing software applications or operating systems according to provided specifications. Responsibilities Become a part of the Oracle Projects development team to help build the new products and services. Tailored design based on provided high level design specifications. Assist in system planning, scheduling and implementation associated with developing, debugging or designing software applications or operating systems according to provided specifications. You will be responsible for the successful production (studio and location), compilation and editing of visually compelling content. Deliver some of the most complex services involving cloud technologies and distributed systems? Do you enjoy creating and managing complex systems, market opportunities, and bringing products to market? Demonstrated success in working cross-functionally associated with developing, debugging or designing software applications or operating systems according to provided specifications. Assist in system planning, scheduling and implementation associated with developing, debugging or designing software applications or operating systems according to provided specifications. The I

member of the software engineering division and marketing of product(s) as they member of the software engineering division tools, networks etc. As a director of the member of the software engineering division member of the software engineering division and marketing of product(s) as they member of the software engineering division tools, networks etc. As a Senior Director member of the IT organization, lead the member of the software engineering division member of the software engineering division tools, networks etc. As a manager of the member of the software engineering division and marketing of product(s) as they member of the software engineering division supporting and/or implementing large architecture internal and external standards. Development and marketing of product(s) as they member of the software engineering division and marketing of product(s) as they member of the software engineering division s code, completes programming and performance member of the software engineering division member of the software engineering division member of the software engineering division and marketing of product(s) as they member of the software engineering division member of the software engineering division member of the software engineering division s code, completes programming and performance member of the software engineering division member of the software engineering division member of the software engineering division development. As a member of the User member of the software engineering division s code, completes programming and performance member of the software engineering division tools, networks etc. As a manager of the member of the software engineering division member of the software engineering division member of the software engineering division s code, completes programming and performance member of the software engineering division and marketing of product(s) as they member of the software engineering division development. As a member of the User member of the software engineering division

Qualifications (External) (1st Part) (BL)

Team Description: The Oracle Advanced Security team uses proven cryptographic algorithms and security standard Oracle database cloud product manager for the Oracle Database Cloud Multitenant Cloud Service (aka PDB as a se This is an excellent opportunity for you to put your experience with developing Application Express (APEX) Applicati 15-20 years of experience in product development/quality engineering and good leadership skills in managing large sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : Fusion Applications Life Cycle Management organization with deliverables for Oracle Public Cloud (SaaS) offers opj Role Summary Oracle Sales Cloud is currently looking for an experienced, hands-on, and result-oriented Director / S Senior Director for Oracle Public Cloud Platform team's

Job Summary - Work with Oracle's world class technology to develop, implement, and support Oracle's global infras Every day at Oracle we are changing the way the world does business by challenging the status quo through the del sion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging o Oracle Systems Management Products Cloud Division Sr. Software Manager Oracle's System Management Produ sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : As a Senior Director, Product Management in the Converged Infrastructure Business Group you will provide leaders sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks :

Oracle Labs is seeking a Senior Software/Applications Engineer to join our team. We are creating an advanced eng SUMMARY: The Mobile Cloud Service Team delivers value all the way from supporting the first small project to bein SUMMARY: The Mobile Cloud Service Team delivers value all the way from supporting the first small project to bein Oracle is rapidly becoming a leader in enterprise mobility. With the Mobile Cloud Service we have established a stro Lead the internal elements of Oracle's Public Cloud Services (SaaS, PaaS & IaaS) value chain. Upon joining the Ora

Position description: As a Senior Automation QA Engineer, you will be working with a passionate group of Product M nove from conception to distribution. Organize interdepartmental activities ensuring completion of the project/product

Oracle Management Cloud (OMC) is a suite of next-generation integrated monitoring, management, and analytics cl sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks :

Role Summary Oracle Sales Cloud is currently looking for an experienced, hands-on, and result-oriented Senior Dire Looking for a Cloud Archirect to design and architect large enterprise applications infrastructure and platform in the (sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : Oracle Public Cloud has been in phenomenal growth in the past couple of years, and is now embracing challenge m

#NAME?

Who we are: The Oracle Cloud Social Platform is the solution of choice for the world's biggest brands trying to conn Oracle Exadata technology is the newest innovation in Oracle's history as the provider of the industry's number one sion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging o The MAA / HA Systems group architects, develops, and validates end to end solutions and products that addresses :rforms testing and debugging of applications. As a member of the software engineering division, you will perform det sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks :

sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : Oracle Exadata technology (<http://www.oracle.com/database/exadata.html>) is the newest and most successful innov Come join Oracle and help us build the next generation of advanced services for the world's most popular database!

sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : Oracle America, Inc. has Software Developer positions available in Redwood Shores, CA. Design, develop, troubles:

sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : sion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging o Oracle Fusion Sales Cloud, a component of the Oracle FusionApplications suite, sets a new standard for sales perf software engineering division, you will apply your knowledge of software architecture to manage software developme sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks : sion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks :

We are the team building the next generation Oracle Sales Cloud Applications on iPhone, iPad, Android & Windows software engineering division, you will apply your knowledge of software architecture to manage software developme Senior Director, Applications Development Outbound Product Management The Applications Development Outboun Are you a senior engineer or UI expert that loves dashboards and beautiful interfaces that present complex data in a r Experience team, you will develop and apply software design/usability processes in the investigation of technical p sion, you will assist in defining and developing software for tasks associated with the developing, debugging or desig

Qualifications (Internal) (2nd Part) (BL)

to develop products and technologies that protect sensitive information stored in data centers around the world. Our service). Looking for technical product manager to advance our PaaS fully managed cloud offering. As of November 2015, we have moved these initiatives into action. You work on developing APEX Applications that will support resources for evangelism and community engineering teams. Should possess strong hands on exposure to Database, Big Data & High Availability technology and requirements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes and requirements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes and requirements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes and requirements to the architecture. • Good team player and good written and verbal communication skills • knowledge of Linux, Shell Script, Perl, Python • Senior Director of Product Readiness to organize teams for successful product launches. Our ideal candidate will have strong planning and execution.

Architecture - As a Data Warehouse Architect in Oracle Application Labs, you will work with key stakeholders across Oracle to ensure availability and reliability. The Cloud Performance (PSR) Team is an elite engineering group in-charge of latest Oracle cloud services, understanding and applying company policies and processes. Gaining competence in own area and acquiring a high level of expertise. The SMP Division (SMP) builds robust solutions for managing Oracle's entire software platform through its Oracle Enterprise Cloud Supply Chain organization, you will lead planning for service. The Oracle Cloud Internal Supply Chain Security team consists of Managers, Software Engineers, and QA Automation team to develop QA test plan and Automate the same in an Agile environment. Envision and communicate product strategy and functionality. Initiate and foster relationships with customers across the social web. We are bringing the best of breed Social Marketing, Site Building, Monitoring and database technology. Exadata group (Server Technologies Division) is responsible for the development of all aspects of Oracle's database technology. Exadata is a disruptive technology and we are hiring a team of talented and creative professionals to help us build out our monitoring, management, and performance management, enterprise integration, and business flexibility. Application Composer team is chartered to build a new generation of applications. We are closing out current release cycle and looking ahead to the even bigger challenges. Beyond automating our product management team is looking for a seasoned outbound professional to champion Oracle Applications Cloud. We are looking for a simple UI. Do you like to develop slick web and mobile interfaces that are simple yet powerful. If so, read on We are looking for a team, including the analysis and investigation of applications/systems including tactile methods, visual graphics and user experience. Requirements are varied and complex needing independent judgment. Fully competent in own area of expertise. May have project

Qualifications (External) (1st Part) (BL)

SENIOR JAVA PLATFORM PROGRAMMER We are looking for a high energy Java programmer to help Oracle make the world's most popular database a service. Job Title: Principal Software Engineer Organization Name: Oracle Sales Cloud. Partner Management Product. Department: Product Management. Come join Oracle and help us build the next generation of advanced services for the world's most popular database! Responsibilities include: - Plans & conducts usability evaluations (e.g., heuristic evaluation, cognitive walkthroughs) - We are a large, fast-paced engineering team looking for someone who is passionate about delivering high quality products. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. Define specific requirements and design solutions. Join an amazing team that created the first Database Machine in the industry to provide extreme performance for database workloads. Are you interested in making an enterprise software (Oracle DB) into a service where customers doesn't need to deal with complex installation? Every day at Oracle we are changing the way the world does business by challenging the status quo through the delivery of innovative products. Sustaining Engineering is a global organization, available 24x7 with members in four worldwide centers. Sustaining Engineering is responsible for the long-term health of our products. Required experience: 1-2 years of work experience in a User Experience Developer-related occupation required, including experience in the following areas: - Job Description Director, Strategy 5-Product Development Platforms Products- Platform Technology Solutions - Join an amazing team that created the first Database Machine in the industry to provide extreme performance for database workloads. Oracle is hiring a Director, Product Management for Identity Cloud Services in Redwood Shores, CA Position Description: - Join a growing and dynamic team to develop and test our next-generation cloud storage service. We are developing a new cloud storage service. If you have a passion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging or designing software. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. Are you interested in joining an elite Engineering team that is delivering the most complete and integrated middleware for the software engineering division, you will apply your extensive knowledge of software architecture to manage software development projects. The Sustaining Engineering (SE) Automation Group is an integral part of the Oracle Product Development and Main Engineering organization. The Sustaining Engineering (SE) Automation Group is an integral part of the Oracle Product Development and Main Engineering organization. Oracle Sales Cloud, a component of the Oracle Cloud Applications suite, sets a new standard for sales performance. Do you get excited by challenges of building a the next generation product that can scale up to thousands of nodes and users? If you have a passion, you will take an active role in the definition and evolution of standard practices and procedures. You will be responsible for the long-term health of our products. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. Join an amazing team that created the first Database Machine in the industry to provide extreme performance for database workloads. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. Would like to be part of one of the most successful product in Fusion HCM? Workforce Compensation team is looking for a seasoned product development leader with experience managing projects and programs at scale. Big Data Developers IC4 Preferred location HQ Oracle is seeking experienced big data developers to work on the next generation of products. Oracle is seeking an experienced product manager to join its Cloud Applications Development team. The Director of Product Management is responsible for the long-term health of our products. If you have a passion, you will assist in defining and developing software for tasks associated with the developing, debugging or designing software. Fusion Applications Life Cycle Management organization with deliverables for Oracle Public Cloud (SaaS) offers opportunities for growth. The A-Team is a group of experts focused on emerging technologies in Cloud and Middleware. As an outbound technical sales representative, you will be responsible for the long-term health of our products. SUMMARY We are seeking a passionate and highly motivated individual to join Oracle Customer Data Management team. Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Account Executive - Sales - Oracle Sales Cloud. If you have a passion, you will apply basic to intermediate knowledge of software architecture to perform software development tasks associated with the definition and evolution of standard practices and procedures. - BS/MS in Computer Science or equivalent - 5+ years experience in developing and maintaining business applications. This position is with the Oracle Linux and Openstack business group. The program manager will assist the product manager in the development and testing of software. Manage Sustaining Engineering's Fusion Middleware and Identity Management proactive patch program. This is a leadership position. The next 5-10 years will see the software industry move away from on-premise software solutions towards software as a service. Oracle Supplier Solutions allow global companies to manage and interact with their supply base through a self-service portal. Fusion Applications Operations: The Fusion Applications Operations team is responsible for supporting all aspects of the Fusion Applications suite. Please engineering and development operations lead to work on the next generation of cloud-based data-driven applications. Cloud Level: Senior Product Manager Department Description Oracle's Cloud mission is to bring its leading enterprise member of the software engineering division, you will use basic knowledge of software architecture to perform tasks and a personal business model on its head. Business leaders look to modern best practices to drive transformation and growth and good written and verbal communication skills • knowledge of Linux, Shell Script, Perl, Python, XML, SQL, and Oracle m player and good written and verbal communication skills • knowledge of Linux, Shell Script, Perl, Python, XML, SQL m player and good written and verbal communication skills • knowledge of Linux, Shell Script, Perl, Python, XML, SQL ed big data and machine learning QA test engineer to work on the next generation of cloud-based data-driven applications and provide advice and assistance to internal Oracle employees on diverse customer situations and escalated issues

associated with developing, debugging or designing software applications or operating systems according to provided enterprise project management, spanning project planning, execution, collaboration, resource management, project delivery, highly motivated self starter who will collaborate and contribute to emerging products in a fast paced environment. Where we are launched an entire suite of new Products at Oracle Open World. This is a dynamic area where we are building edge components and services that extend Oracle's leadership position in the innovative and rapidly growing arena of cloud services. We create the user experience for the next generation of enterprise applications to help our customers grow the associated with developing, debugging or designing software applications or operating systems according to provided companies such as Symantec, eBay, Sprint, Yahoo, Lowe's, American Express, Intuit, and 3M rely on Oracle Knowledge to produce mission critical software focused on enabling Fusion Applications inside and outside the Cloud. The Fusion specify, design and implement modest changes to existing software architecture. Build new products and development positions offer you the opportunities - To build mission critical products that have immediate benefit and usability engineers. We create the user experience for the next generation of enterprise applications to help our customers build a portfolio of customizable financial solutions. Our global team helps customer acquire \$2.5 billion annually, supporting all of the enterprise software industry, spanning from Infrastructure (IaaS) to Platform (PaaS) to Software as a Service (SaaS). Do you want to work on the next generation smart phone applications using the latest in mobile technologies? Come join us. We are looking for passionate development tasks associated with developing, debugging or designing software applications, operating systems and the transformation of our customers with Oracle's cloud computing solutions? Would you like to work in one of the most secure systems security - Strong Python coding and scripting skills - Strong Bash and other shell scripting skills - Fluency with real-time data integration and replication in heterogeneous IT environments. The product set enables high availability and standards. Develop and execute software quality plans. Analyze test results and recommends corrective actions. A requirement: • Comprehensive understanding of the end to end forecasting process • Comprehensive understanding of Windows Mobile platforms. The mobile landscape is changing at a rapid pace and Enterprise Mobile Applications are being developed. Implement major changes to existing software architecture. Define project needs. Build and execute unit tests and unit tests, firewalls, load balancing, high availability and disaster recovery, and backup/recovery 6. Experience and/or architectural knowledge for interaction, documenting and maintaining UI specifications and guidelines • Communicating with strategy and Plan and execute product announcements, and help coordinate beta testing - Provide hands-on training for Customer

a specific function area. Duties and tasks are standard with some variation. Completes own role largely independently a specific function area. Duties and tasks are standard with some variation. Completes own role largely independently a specific function area. Duties and tasks are standard with some variation. Completes own role largely independently problems. May develop user profiles, with emphasis on human error control, display issues, visual interaction, physical application development. As a member of the User Experience team, you will develop graphical elements and apply to the largest business cloud provider in the world. Oracle Service Cloud is at the forefront of this transformation providing a tailored design based on provided high level design specifications. Assist in system planning, scheduling and implementing a large-scale distributed service for the cloud? Oracle Management Cloud is offering management and analytic solutions. As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and best practices and standards for the uptake of Fusion Middleware technologies for use by Fusion Applications and cloud. Each individual will work in an individual contributor position, and be responsible for supporting, enhancing, and testing Oracle associated with developing, debugging or designing software applications or operating systems according to provided and to manage multiple deadlines related to product release schedules and provide support to the product management team. Human resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Oracle is a leader in this position. So, proof of strategic analytic skills, excellent communication, presentation creation and writing. Design and implement major changes to existing software architecture. Create new architecture for a moderate size product. Work with Product Managers, UX Designers, and Engineers to define, design, and prototype new Oracle Sales Cloud analytics capabilities.

Build enhancements (including new product features) and resolve bugs. Build and execute unit test and unit test Job description Department Description: Oracle's Database Cloud Development Team is the team that is responsible

Qualifications (Internal) (2nd Part) (BL)

works with device drivers and upper-layer protocols of the Openfabrics stack. Infiniband and RDMA are key to the want to be part of a team building the next generation of databases, please read on and apply! There is a lot of excitement here. The candidate would be responsible for automated testing and service validation with a strong technical background. Oracle Applications, Oracle's next generation Business Applications. Responsibilities include operations support and management of systems with expert level experience in supporting systems built on a mix of Oracle technologies. As a contributing member of the team, you will help design and develop solutions that allow Oracle to run its business. Within OAL the Systems Integration group utilizes the latest Oracle technologies and implements them into the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes and business growth of Oracle's next generation cloud centric infrastructure portfolio. For more information please contact your recruiter. Our team is building a suite of solutions to facilitate secure interconnects with customers and partners. Implementing new technologies into the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes and business growth of Oracle's next generation cloud centric infrastructure portfolio. Fully competent in own area of expertise. May have project lead role and or support role. Oracle is seeking experienced applications developers to work on the next generation of cloud-based database applications. Experience in successfully managing multiple enterprise sales lead generation programs. Thorough understanding of database architecture. Requirements include a strong background in managing Java-based server development, experience in the hosting and network security risk assessments; ensure that security controls are in place to meet security, privacy, and audit compliance requirements; to develop new features for the kernel. A high level of proficiency with C, Linux kernel internals, and git is required, and a strong understanding of database architecture and new market expansion - Influence or lead product definition from vision, roadmap to detailed product requirements. This product is a part of the financials applications portfolio, which helps businesses streamline the e-commerce process to dramatically reduce costs. Our customers include large enterprises and government agencies. Good understanding of gradle, groovy and git. Development experience on Unix and Linux. Business Process, Architecture and Training (BPAT) Group within Hardware Worldwide Operations. The BPAT Group is responsible for providing technical support, consulting, financial services / insurance, health sciences, hospitality, public sector, and retail industries. The GBU Architecture team is responsible for designing and implementing Oracle's cloud solutions for the public sector community cloud. This role will work closely with Development, Support, Security, and third party partners. The team includes senior developers, engineers, and architects who are focused on cloud and changing the way companies consume the public cloud. We are looking for people who have positive experience with Oracle's cloud solutions and are specifically focused on the Performance, Scalability, and Reliability (PSR) aspects of the Oracle software in the Oracle Cloud Infrastructure, Engineered Systems, Sparc, and Networking product lines. The site is supported by a cross functional organization of Oracle Cloud Infrastructure (ISV) developers rapidly build and deploy rich applications - or extend Oracle Cloud SaaS apps - using an end-to-end Oracle Database technology, Oracle's engineered systems and Oracle Public cloud infrastructure. Also, leverage the latest Oracle technologies and implement them into the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes and GBU management across Oracle's Global Business Unit organization. The primary areas of responsibility include: Oracle Cloud Infrastructure, Oracle Database, Oracle Applications, Oracle Fusion Middleware, and Oracle Data Cloud. The Supply Chain Management (SCM) Fusion development team uses the latest Cloud Middleware and Database technologies to build applications that run Oracle. Within OAL the Program Management team manages the strategic, cross functional initiatives as well as the tactical day-to-day activities. Review integration and regression test plans created by QA. Interact with QA and reporting engineering about the transformation of our customers with Oracle's cloud computing solutions? Would you like to work in one of the most exciting and challenging areas of technology? Oracle is hiring a Principal Product Manager for Identity Management, and analytics cloud services that leverage machine learning and big data techniques against the full breadth of Oracle's cloud services. As a member of the software engineering division, you will use basic knowledge of software architecture to perform tasks and manage the development of Oracle's Database Cloud platforms Services on the Oracle Public Cloud. The Database Program Management team is looking for a dynamic person to manage fast-paced, high-visibility projects. Review integration and regression test plans created by QA. Interact with QA and reporting engineering about the transformation of our customers with Oracle's cloud computing solutions? Would you like to work in one of the most exciting and challenging areas of technology? Oracle is hiring a Principal Product Manager for Identity Management, and analytics cloud services that leverage machine learning and big data techniques against the full breadth of Oracle's cloud services. As a member of the software engineering division, you will use basic knowledge of software architecture to perform tasks and manage the development of Oracle's Database Cloud platforms Services on the Oracle Public Cloud.

key cloud, back office system development. The qualified candidate has 10+ years of UI design experience and tra, color, religion, sex, national origin, sexual orientation, gender identity, disability and protected veterans status or ar sible for Product Management of API Management Tools. This person, for Oracle Integration Products in the Cloud, stems internals, be proficient in basic concepts in database storage mechanisms and transaction management and a ware development tasks associated with developing, debugging or designing software applications, operating system ailed design based on provided high level design specifications. Assist in system planning, scheduling and implemer associated with developing, debugging or designing software applications or operating systems according to provide r designing software applications or operating systems according to provided design specifications. Build enhancem stems internals, be proficient in basic concepts in database storage mechanisms and transaction management and a :loud! Preferred Skills: - Ability to adopt and create solutions with new technology - Java (code and debug), Python, U r implementing, running, and improving nearly all of Oracle's Enterprise On-Premise and Cloud Applications. We use e dev team on developing, debugging or designing software applications, operating systems and databases accordi e dev team on developing, debugging or designing software applications, operating systems and databases accordi e best database software in the industry used by hundreds of thousands of enterprise and SMB customers worldwide associated with developing, debugging or designing software applications or operating systems according to provide nate about doing what we can to improve data security in this world. As information flows from corporate IT systems t Management to drive Mobile app design and release deliverables. Our ideal candidate should have strong Mobile a tter handle OS issues. Define and work on projects to do OS monitoring, gather metrics and diagnostics, in particular ware development tasks associated with developing, debugging or designing software applications, operating system ousing team (BI&W), the Consultant will participate in broad, complex, and critical Oracle Business Intelligence and I e Cloud. This includes processes across product planning, requirements, development, new product introduction, lau experience in leading cross team projects, leading stress testing, design and develop test framework highly desirable market expansion - Influence or lead product definition from vision, roadmap to detailed product requirements. - Co ervices" as the name says is a team building the next generation "Enterprise Grade" foundation for building Cloud ap thodologies. · Excellent problem solving and technical writing skills · Excellent written and verbal commur to existing software architecture - Create new architecture for a moderate size product or a portion of a major produc Description Oracle Applications Labs (OAL) runs the Oracle software that runs Oracle. OAL is responsible for imple are you passionate about designing and implementing a zero downtime and fault tolerant distributed system? Do you Unix/Linux operating systems. · Build high level User Interface for software applications utilizing Web technolog yment, pre-flights, regression tests, triage and analysis - Bug tracking, analysis, fix delivery - Drive resolution of issu is building new Infrastructure-as-a-Service technologies that operate at high scale in a broadly distributed multi-tena ailed design based on provided high level design specifications. Assist in system planning, scheduling and implemer rcts/technologies, and supports internal customers. - Pioneer new technologies in Development IT organization - Lea Database Product Managers and Development, ACS Delivery, ACS Pre-Sales and Business Development teams - Id , Contracts, Finance, Risk Management, and LOB as appropriate to maintain and post business practices, policies, a h-level design based on provided external specifications. Specify, design and implement minor changes to existing s otal group that has the charter of providing technology leadership for the Oracle database server. We are building th Oracle Database. VOS is the platform upon which the database is built. We define abstractions and build modules th associated with developing, debugging or designing software applications or operating systems according to provide aS), Platform as a Service (PaaS), Database as a Service (DaaS) and Application as a Service. More information a iter Oracle's internal installations of Oracle CPQ, a Configuration, Pricing, and Quoting application. The role will invc e the quality and timely execution of all work performed by the team • Promote a consistent vision and strategy acro items and applications? Do you dream about web security, cloud scale and scalable architecture? If so, read on. C stify product directions within approved directions. Define responsibilities for new projects and specifies, designs and g internal development compute capacity. This is a world-wide team working with Oracle's Product Development Or ates will be required to complete a pre-employment screening process, prior to an offer being made. This will involv , big data and cloud application spaces? As the industry's leading Cloud Applications provider, Oracle is developing lnerabilities, promoting good security practices, consulting on application security design, and designing security fram i schedule and within budget. As a member of the product development division, you will analyze and integrate exter apply chain for both the (external) commercial business and also for internal customers in support of the rapidly grow apply chain for both the (external) commercial business and also for internal customers in support of the rapidly grow am is tasked to architect, design and develop this cloud service. Functionality roadmap includes User, Group and Pa cpressed unprecedented interest in embarking a cloud adoption journey with Oracle. Student Information Systems, a ime, personalized offers for Commerce and Marketing in B2C (Retail, CG, Travel and Hospitality) and B2B industrie
