Qualifications (External) (1st Part) (BL)

Software Developer 3

Product Development Enterprise IT - Customer Relationship Management (CRM) / Enterprise Resource Planning (ERP)
The Oracle Identity Management development group is part of the Oracle Fusion Middleware development organization.
The OVM InfiniBand group provides support for Mellanox OFED in Oracle Linux, Oracle VM and engineered systems.
Fusion Applications Lifecycle Management is looking for architects to be responsible for the architectural design and implementation of Fusion Applications Lifecycle Management.
The RAC Pack / Database Appliance Team requires a Technical Manager in development to help with SCP customizations.
The Virtual Operating System (VOS) development group provides a portable and high-performance platform for the Oracle VM.
The Enterprise Manager group is building software products that improve the manageability of the entire Oracle ecosystem.

Software Developer 1

Software Developer 1

Software Developer 1

UI Designer Oracle is the world's largest supplier of database software and is the world's favorite solution for fully distributed applications.

Software Developer 4

Oracle is the #1 vendor in business analytics with the industry's most complete and integrated range of enterprise-class applications.
Applications Developer 1

The Cluster and Parallel Storage Technology Development Group is responsible for research, development, and deployment of Oracle's storage technologies.
We are a small research team within the Fusion Applications User Experience group investigating emerging technologies and their application to Oracle's next-generation project management application suite, built for the Cloud using the latest technologies.
SENIOR PRODUCT MANAGER The Oracle NoSQL Database product line is enterprise-grade, highly scalable, distributed, and easy to use. Achieving high performance on a broad variety of platforms and exploiting new technologies are important to maintain our leadership in this space.
Who we are: The Oracle Cloud Social Platform is the solution of choice for the world's biggest brands trying to connect with their customers.

Software Developer 5

Software Developer 5

Enterprise Access Management is a multi-billion industry currently experiencing exponential growth. Increasing regulatory requirements are driving the need for secure, compliant access to enterprise data.
Are you interested in working with cloud computing, defining standards, design & develop software components that enable secure access to enterprise data?
Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Access Management is a key component of our Cloud Computing strategy.

Software Developer 3

Software Developer 3

Software Developer 3

Do you desire to be part of Team Architecting/Developing world class fully automated Test Infrastructure Designed for Oracle's Applications User Experience group?
Oracle is a leading provider of enterprise software applications. Oracle's Applications User Experience group is responsible for the design and development of Oracle's next-generation project management application suite, built for the Cloud using the latest technologies.
Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and customer relationship management.
The OVM InfiniBand group provides support for Mellanox OFED in Oracle Linux, Oracle VM and engineered systems.
Do you want to work not just "in the cloud" but on "Building the cloud"? We've got the job for you. "Cloud Platform Services" is a key component of our Cloud Computing strategy.
The Outbound Product Management Team has the following objectives: - Provide air cover and enablement to our sales and marketing teams.

Software Developer 4

Software Developer 4

Software Developer 4

Oracle's Advanced Customer Support Services (ACS) delivers expert-level Support Services remotely and at the customer's location.
The Oracle Applications Cloud Information Development team is looking for an Information Developer / Instructional Designer to help us build the next generation of Oracle's Cloud Information Development team.
Oracle Big Data Appliance (BDA) is the cornerstone of Oracle's growing footprint in Big Data. Big Data and its analysis is a key component of our Cloud Computing strategy.
We are looking for top engineers like you who are ready to master technologies and want to be involved in front-line development.
Overview: This is a start up group within Oracle that has direct exposure to Oracle's executive leadership team. The group is focused on developing enterprise level solutions for Oracle's customers.
The Fusion HCM product development group is a geographically dispersed organization with team members based in multiple locations. New Big Data development effort needs a strong QA engineer to help get it off the ground. It's the best of both worlds.
We are Oracle's Database Server Performance group in the database server development organization that focuses on performance optimization.
Our group manages external and internal programs for our Customers, Partners, and Employees. What does this mean for you?
The Development group in the Primavera Global Business Unit is focused on developing enterprise level solutions for Oracle's customers.
Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and customer relationship management.
In October 2011, Oracle CEO Larry Ellison unveiled Oracle Public Cloud in his Oracle Open World Keynote, and the Oracle Access Manager provides comprehensive Access Management for Applications, Data, and Web Services. V
The A-Team is a group of Fusion Middleware experts focused on emerging technologies. As an out bound technical

Qualifications (External) (1st Part) (BL)

Manufacturing & Distribution (M&D) is Oracle's global organization responsible for product release, software distribution, Oracle's Big Data Services Group is Hiring Engineers/Architects The Big Data Services group is looking for exceptional talent to join our team. Department Description: We are responsible for developing Oracle's next generation Database drivers for Java and C++ from conception to distribution. Organize interdepartmental activities ensuring completion of the project/product on time. Desired Skills Java, Linux/Unix, software, development, Agile The following skills are desirable: Selenium, OpenShift, Docker, Kubernetes from conception to distribution. Organize interdepartmental activities ensuring completion of the project/product on time. Be part of the team that is driving Oracle's Cloud Computing business with commercial and public sector customers. A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle Cloud solutions. Would you like to: •Work on highly visible demos that directly impact the success of the Applications business? •Be part of a team that is driving Oracle's Cloud Computing business with commercial and public sector customers. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales automation, human resources, and supply chain. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales automation, human resources, and supply chain. sion, you will take an active role in the definition and evolution of standard practices and procedures. Define specific use cases and requirements. Department Description: The Fusion Applications Lifecycle organization offers opportunities to be part of a team utilizing Oracle's Fusion Applications. Oracle is the world's largest supplier of database software and is the world's favorite solution for fully distributed corporations. sion, you will take an active role in the definition and evolution of standard practices and procedures. You will be responsible for leading the team. Come join Oracle and help us build the next generation of advanced services for the world's most popular database. Come join Oracle and help us build the next generation of advanced services for the world's most popular database. Organization is responsible for Oracle VM x86, Oracle VM VirtualBox and Oracle VM SPARC. This is a great opportunity for you. Job Description Design and build application features for Fusion Projects product family using Oracle Fusion Middleware. - Outstanding written and oral communication skills; prepares written communication and technical documentation and presentations. Our group manages external and internal programs for our Customers, Partners, and Employees. What does this role entail? The Parallel Data Manipulation Language (PDML) team is responsible for three main areas: (1) loading massive amounts of data into Oracle databases. About the team: Oracle Applications Labs runs the applications that run Oracle, develops enhancements based on Oracle Applications. Product Development IT (PDIT) teams strive to respond rapidly to the changing needs of Oracle's business and ensure high quality. Product Development IT (PDIT) teams strive to respond rapidly to the changing needs of Oracle's business and ensure high quality. The Big Data Services group is looking for exceptional software UI Engineers and Architects at all levels for a new location. sion, you will take an active role in the definition and evolution of standard practices and procedures. Define specific use cases and requirements. Technical expertise in identifying, evaluating and developing systems and procedures that are cost effective and meet user requirements. Demonstrates working knowledge and practical application of all core topics of ADF Development and solid foundation in Java. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and supply chain. This is a requisition created for a specific campus hire.

SENIOR PRODUCT MANAGER The Oracle NoSQL Database product line is enterprise-grade, highly scalable, distributed, and easy to use. Business Process Management (BPM) is rapidly becoming the "must have" application for businesses to gain a competitive edge. Team Description: The Oracle Advanced Security team develops products and technologies that use cryptography to protect data. DW & Big Data feature/functionality plus developing Oracle DW & Big Data Global Leaders technical relationships with customers. Be part of the team that is driving Oracle's Cloud Computing business with commercial and public sector customers. new projects or assignments. As a member of a project team, follows standard practices and procedures to analyze requirements and develop solutions. Be part of the team that is driving Oracle's Cloud Computing business with commercial and public sector customers. Department Description: The Fusion Applications Lifecycle organization offers opportunities to be part of a team utilizing Oracle's Fusion Applications. sion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging, and testing. sion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging, and testing. sion, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging, and testing. Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Accountable for the success of the product. Highly desirable experience includes: 1. Consulting (software and services) 2. Packaged software implementation Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires. Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires. Group Overview: We design and develop the data storage & processing engine for the Oracle Database and the Enterprise Edition. Database Server Manageability and Replay Technologies The vision of the Database Server Manageability and Replay Technologies is to Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc.

Candidate should be willing to work on all aspects of Database Administration with respect to the IDM database. If you are looking for opportunity to work on cutting edge Oracle technology. This job is for you. Oracle Managed Cloud Services Risk Management (OMCS RM) organization is looking for a top notch Oracle Identity Management (IDM) Architect. Are you interested in a dynamic working environment where you are constantly presented with new challenges? Do you have the skills and experience to lead a team of Oracle Identity Management (IDM) Architects? Oracle Managed Cloud Services Risk Management (OMCS RM) organization is looking for a top notch Oracle Identity Management (IDM) Architect.

Qualifications (External) (1st Part) (BL)

Join the Oracle HCM Cloud Team and build the next generation of enterprise cloud applications! Lead the design and development of Oracle HCM Cloud applications. Specific Job Description The Enterprise Replication team in the Database development group is looking for a top class Software Developer. If you are energetic, thrive in a fast-paced environment and possess an innovative spirit, we have an exciting opportunity for you. Oracle Application Labs (OAL) "implements, maintains, upgrades and extends" the applications that Oracle requires. This is a challenging role for a Senior Software Developer 3.

Lead a team that acts as the central resource and driving force for the design, process, manufacturing, test, quality assurance and support for customer needs. This involves resolving post-sales non-technical customer inquiries via phone and electronic mail. We need hands-on, driven, challenge-loving technical product manager for private cloud based Infrastructure as a Service (IaaS).

This QA Engineer position is in Fusion Development - Procurement Solution (Supply Chain Process). We are looking for a Senior QA Engineer in the Department Description Oracle Cloud Delivery has full set of responsibility of delivering public Oracle Cloud service.

If you have passion to design, architect and build web-scale Enterprise Applications then we would like to hear from you. Requirements: - PL/SQL and SQL programming - Java, XML, J2EE application development experience - ADF, EJB, Web Services, JSP, JavaScript, etc.

You will be working on Fusion product development for Value Chain Planning products. You should have strong academic and professional background in the following areas:

Organization Description: Oracle Service Cloud customer service software enables businesses provide personalized customer service. This position is for an Senior Developer for the Time and Labor product (a component of the Workforce Management).

Oracle is looking for a multi-talented DevOps Engineer to help maintain and improve our architecture as we scale our cloud services. Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work on Oracle Cloud.

Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work on Oracle Cloud. ORACLE CLOUD – DBA Oracle Corporation Redwood Shores (CA) or Atlanta (GA) Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work on Oracle Cloud.

A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle Cloud solutions. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales automation, human resources, and customer service.

Oracle Event Processing is an in-memory, low-latency, high throughput stream processing platform with full range of capabilities. Brief Description Serve as thought leader for creating and packaging points of view on the latest trends, developments, and best practices in the industry. You will assist in defining and developing software for tasks associated with the developing, debugging or designing Oracle Cloud solutions.

Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and customer service. Oracle's Applications User Experience team of over 150 people brings together some of the world's best designers and developers to create the most intuitive and easy-to-use user interfaces in the industry.

In Summary: Internal Coordination on Customer Communication Rollout, Approval, Quality Control and more. External Coordination on Customer Communication Rollout, Approval, Quality Control and more.

As a Cloud Solution Analyst your key responsibilities are to: - Support the delivery of best practice Oracle Cloud solutions. - Collaborate with Oracle Labs and other Oracle teams to develop and test Oracle Cloud solutions. - Provide technical support to Oracle Labs and other Oracle teams. - Collaborate with Oracle Labs and other Oracle teams to develop and test Oracle Cloud solutions.

Oracle Labs is looking for a candidate with background in embedded software development. Experience of Linux in the area of embedded systems is a plus. The successful candidate for this role will join the Oracle Labs team in Redwood Shores, California. The team is responsible for the development and testing of Oracle Cloud solutions. Do you have what it takes to deliver software to the cloud with agility and speed. We are looking for innovative and experienced software developers to join our team. Product manager for Oracle Database Vault, a security option for the Oracle Database Enterprise Edition. Oracle Cloud is looking for a candidate with background in embedded software development. Experience of Linux in the area of embedded systems is a plus. Qualifications (External) (1st Part) (BL)

Overview We are currently recruiting a proven Sr. Payroll Product Specialist in the Oracle Fusion Human Capital Management, you will assist in defining and developing software for tasks associated with the developing, debugging or design. Title – Cloud Platform Developer Description The Oracle Fusion Middleware Central Development team is looking for a Business Process Management (BPM) has rapidly become the “must have” application for businesses to gain a competitive edge. Skills Required: · Degree level qualification in a Business related undergraduate course. · Good Computer Skills Job Title Product Manager/Strategy 4-ProdDev Location United States Organization Name Cloud Operations Department Oracle Exadata is the one of the most innovative products on the market today. Combining the latest advancement in design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a result The Oracle Fusion Project Portfolio Management product team is looking for a full-time product manager to join our team. We are seeking experience principal software application engineer to join our sales cloud (SaaS) applications team. Oracle is looking for an experienced software engineer to join the SDN Development team The main responsibilities include Oracle Enterprise Manager is Oracle's integrated enterprise information technology (IT) management product line, which Today's data center deploys tens of thousands of nodes and demands efficient utilization of resources. The management Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human The team's mission is to Enable the development of applications taking advantage of our SaaS, PaaS and IaaS. To Are you looking for hands-on experience in developing the next generation of Oracle data integration products, using The candidate will work in a team environment on Java development projects for high volume customer facing know Oracle Clusterware is portable cluster software that allows clustering of independent servers so that they cooperate The Opportunity Are you an business-savvy technical Architect who has extensive experience working with cloud ? Our dynamic team, Fusion Release Engineering, is responsible for all aspects of Build and Integration for Fusion Applications This is an exciting opportunity to apply and develop analytical and technical skills in the fast growing and dynamic financial performs testing and debugging of applications. As a member of the software engineering division, you will analyze and Job description A unique opportunity to join a rapidly growing world-class team to develop, implement, and support Come and work on one of Oracle's latest projects, The Oracle Universal Installer is a Java application that can handle Test and develop System and performance tools for Cloud Services As a member of the software engineering division - Combination both software product management and program management experience - Capable of managing and Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human The Fusion Applications team is looking for an outstanding developer to join the team. The responsibilities for the position Your Role: You will be a key leader and gatekeeper of quality for Oracle Fusion Service products – from writing test Department Description: Oracle's FMW (Fusion Middleware) Product Management organization defines the strategy and vision, you will take an active role in the definition and evolution of standard practices and procedures. You will be responsible, you will take an active role in the definition and evolution of standard practices and procedures. You will be responsible To support our rapid growth, we are seeking talented team members that bring a passion for providing excellence to A suitable candidate for this job has strong background in system level software and is an expert on anticipating the Oracle's System Management Products Division (SMP) builds robust solutions for managing Oracle's entire software Oracle Clusterware is portable cluster software that allows clustering of independent servers so that they cooperate The Oracle Private Cloud team is looking for a senior level engineer to work on cutting-edge, industry changing, cloud Software Developer 4 We're disrupting the world of marketing. And we want your help. Oracle Responsys was built Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work Work is non-routine and very challenging, involving the application of advanced technical/business skills in area of sales Desired Technical Skills * Java, J2EE, Java Server Faces, ADF, SOA * Oracle DB and SQL

Position is for the Senior PeopleSoft Administrator for Oracle Managed Cloud Service(OMCS). OMCS Technical Operations A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle Oracle Cloud team is looking for architects to be responsible for the architectural design and implementation of all financial Posting Description - Global Sales Engineering is looking for a rock star individual to play an important role in our growth The Oracle.com Community Platform team sits within Oracle's Brand Communications organization. Their mission is to Oracle is looking for a multi-talented DevOps Engineer to help maintain and improve our architecture as we scale our

Qualifications (Internal) (1st Part) (BL)

Overview We are currently recruiting a proven Sr. Payroll Product Specialist in the Oracle Fusion Human Capital Management, design and implement modest changes to existing software architecture to meet changing needs. Duties and tasks include designing and implementing cloud-based architectures. If you have the right technical chops and love working with latest technologies in the cloud, you are a great fit. Oracle Fusion Human Capital Management (HCM) has rapidly become the “must have” application for businesses to gain a competitive edge. Oracle Fusion HCM is a cloud-based, integrated suite of applications that streamlines HR processes and improves productivity. Oracle Fusion HCM is a cloud-based, integrated suite of applications that streamlines HR processes and improves productivity. Oracle Fusion HCM is a cloud-based, integrated suite of applications that streamlines HR processes and improves productivity.

Skills Required: · Degree level qualification in a Business related undergraduate course. · Good Computer and Internet skills. · Strong communication and interpersonal skills. · Ability to work in a team environment. · Ability to work under pressure and meet deadlines. · Ability to learn new technologies quickly. · Ability to work in a fast-paced environment. · Ability to work in a team environment. · Ability to work under pressure and meet deadlines. · Ability to learn new technologies quickly. · Ability to work in a fast-paced environment.

Job Title Product Manager/Strategy 4-ProdDev Location United States Organization Name Cloud Operations Department Oracle Exadata is the one of the most innovative products on the market today. Combining the latest advancement in data storage and processing, Oracle Exadata is a cloud-based, integrated suite of applications that streamlines HR processes and improves productivity.

JOB DESCRIPTION: Do you enjoy being one of the first to learn new technology and create demos to showcase it? Every day at Oracle we are changing the way the world does business by challenging the status quo through the development of new products and services. Oracle Exadata is the one of the most innovative products on the market today. Combining the latest advancement in data storage and processing, Oracle Exadata is a cloud-based, integrated suite of applications that streamlines HR processes and improves productivity.

Job Title Product Manager/Strategy 4-ProdDev Location United States Organization Name Cloud Operations Department Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a result of your work, you will be able to improve the performance of our products and services. The Oracle Fusion Project Portfolio Management product team is looking for a full-time product manager to join our team. We are seeking experience principal software application engineer to join our sales cloud (SaaS) applications team. Oracle is looking for an experienced software engineer to join the SDN Development team. The main responsibilities of the SDN Development team are to design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a result of your work, you will be able to improve the performance of our products and services.

The Oracle Fusion Project Portfolio Management product team is looking for a full-time product manager to join our team. We are seeking experience principal software application engineer to join our sales cloud (SaaS) applications team. Oracle is looking for an experienced software engineer to join the SDN Development team. The main responsibilities of the SDN Development team are to design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a result of your work, you will be able to improve the performance of our products and services.

Oracle Enterprise Manager is Oracle's integrated enterprise information technology (IT) management product line, which provides a comprehensive set of tools for managing IT infrastructure. Today's data center deploys tens of thousands of nodes and demands efficient utilization of resources. The management of such a large and complex environment is a challenge. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and financial management. As part of the Oracle Public Cloud organization you will be working on the infrastructure of the cloud. 1. In a first phase, you will be responsible for the design, development, testing, and deployment of the cloud infrastructure. Are you looking for hands-on experience in developing the next generation of Oracle data integration products, using Java and JavaScript? The candidate will work in a team environment on Java development projects for high volume customer facing know-how products. Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a result of your work, you will be able to improve the performance of our products and services.

The Opportunity Are you an business-savvy technical Architect who has extensive experience working with cloud services? Our dynamic team, Fusion Release Engineering, is responsible for all aspects of Build and Integration for Fusion Applications. This is an exciting opportunity to apply and develop analytical and technical skills in the fast growing and dynamic field of cloud services. Analyze, design develop, troubleshoot and debug software programs for commercial or end user applications. Write test cases and execute tests. Job description A unique opportunity to join a rapidly growing world-class team to develop, implement, and support Oracle's latest projects, The Oracle Universal Installer is a Java application that can handle the installation of Oracle software. Come and work on one of Oracle's latest projects, The Oracle Universal Installer is a Java application that can handle the installation of Oracle software. Test and develop System and performance tools for Cloud Services As a member of the software engineering division, you will be responsible for the design, development, testing, and deployment of the cloud infrastructure.

#NAME?

Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and financial management. Every day at Oracle we are changing the way the world does business by challenging the status quo through the development of new products and services. Oracle Exadata is the one of the most innovative products on the market today. Combining the latest advancement in data storage and processing, Oracle Exadata is a cloud-based, integrated suite of applications that streamlines HR processes and improves productivity.

Your Role: You will be a key leader and gatekeeper of quality for Oracle Fusion Service products – from writing test cases to leading the development of new products and services. Department Description: Oracle's FMW (Fusion Middleware) Product Management organization defines the strategy for the development, testing, and deployment of the cloud infrastructure. Work is non-routine and very complex, involving the application of advanced technical/business skills in area of cloud services. Work is non-routine and very complex, involving the application of advanced technical/business skills in area of cloud services. To support our rapid growth, we are seeking talented team members that bring a passion for providing excellence to our customers. Strong software engineering skills with expertise in system level software. Excellent understanding of application software development. Oracle's System Management Products Division (SMP) builds robust solutions for managing Oracle's entire software stack. Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a result of your work, you will be able to improve the performance of our products and services.

The Oracle Private Cloud team is looking for a senior level engineer to work on cutting-edge, industry changing, cloud-based solutions. Software Developer 4 We're disrupting the world of marketing. And we want your help. Oracle Responsys was built to help you do it. Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work in the cloud. Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work in the cloud. Work is non-routine and very challenging, involving the application of advanced technical/business skills in area of cloud services. Desired Technical Skills * Java, J2EE, Java Server Faces, ADF, SOA * Oracle DB and SQL

Position is for the Senior PeopleSoft Administrator for Oracle Managed Cloud Service(OMCS). OMCS Technical Operations A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle products. A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle products. A unique opportunity to join a rapidly growing world-class team to develop, implement, and support cutting edge Oracle products. Oracle Cloud team is looking for architects to be responsible for the architectural design and implementation of all front-end applications. Skills/experience required - - BA/BS Required. Qualifications (External) (1st Part) (BL)

The Oracle Identity Management development group is part of the Oracle Fusion Middleware development organization. Design, develop, troubleshoot and debug software programs for databases, applications, tools, networks etc. As a manager, manages and controls activities in multi-functional areas of sections. Ensures appropriate operational planning is effective. Oracle's Cloud Operations Team is chartered to manage Software-as-a-Service(SaaS) and Platform-as-a-Service (PaaS). Oracle Managed Cloud Services is seeking Oracle Database and Application Administrators with experience working in the cloud. Department Description: Oracle's FMW (Fusion Middleware) Product Management organization defines the strategy for the Fusion Applications System Testing Team offers opportunities to be part of a team testing critical software focus areas.

Our in-house creative department at one of the world's most recognized technology companies is seeking an experienced software developer. Are you a development expert in Java, J2EE, Algorithms and/or Data Structures or are you experienced in advanced software development, you will take an active role in the definition and evolution of standard practices and procedures. Define specific software development processes, you will take an active role in the definition and evolution of standard practices and procedures. Define specific software development processes. Work in the product development organization providing key data to the Applications product groups by collaborating with other teams. Having knowledge of Python/Perl Scripting and Marketing Data platform is a plus in this role.

Oracle Cloud – Platform as a Service Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Security is absolutely fundamental for today's businesses, and yet the newspapers remind us almost daily about the importance of security. Every day at Oracle we are changing the way the world does business by challenging the status quo through the development of new products. Oracle is shifting the complexity from IT, moving it out of the enterprise by engineering hardware and software to work better together. Business Process Management (BPM) has rapidly become the "must have" application for businesses to gain a competitive edge.

Consulting Member Technical Staff The Opportunity Are you a Senior Engineer who has experience working with Oracle Fusion Middleware? Every day at Oracle we are changing the way the world does business by challenging the status quo through the development of new products. The CX Product Marketing Manager will have responsibility for elements including: product messaging, marketing content, and product demonstrations.

We are looking for top engineers like you who are ready to master technologies and want to be involved in front-line product development. Job Title: Product Manager/Strategy 3-ProdDev Location: Redwood Shores, HQ Organization Name: Oracle Public Cloud

As a Senior Engineer, you will assist in defining and developing software for tasks associated with the developing, debugging or designing of Oracle Fusion Middleware. Daily responsibility includes: - setup, maintain, debug Linux product env based on weblogic and oracle database - n

Every day at Oracle we are changing the way the world does business by challenging the status quo through the development of new products. Department Description PDIT Systems Management team provides comprehensive end-to-end monitoring and automatic recovery of Oracle Fusion Middleware.

Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Access to the cloud is a critical and proven part of Oracle's broader cloud offerings and enables organizations to reduce costs and improve efficiency.

Oracle America Inc. is actively seeking an experienced Engineer with architecture & installation background to join the Oracle NoSQL Database product line is enterprise-grade, highly scalable, distributed, key-value pair NoSQL database.

Our EPM UX team provides product design leadership for Oracle's Enterprise Performance Management (EPM) so that it can be used effectively. Oracle Managed Cloud Services is a critical and proven part of Oracle's broader cloud offerings and enables organizations to reduce costs and improve efficiency.

The Fusion Applications System Testing Team offers opportunities to be part of a team testing critical software focus areas. Oracle Cloud team is looking for architects to be responsible for the architectural design and implementation of all front-end user interface.

Senior BTRFS kernel developer. This role is for an experienced Linux kernel developer to work with the mainline Linux kernel. The Oracle Cloud is a suite of Oracle applications, middleware and database offerings delivered in a self-service, subscription-based model.

As a Senior Engineer, you will apply basic to intermediate knowledge of software architecture to perform software development tasks. Department : Oracle Public Cloud Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech.

Oracle publicly unveiled its Cloud Computing strategy during Larry Ellison's Open World 2011 keynote speech. Access to the cloud is a critical and proven part of Oracle's broader cloud offerings and enables organizations to reduce costs and improve efficiency.

Oracle's User Experience team of over 150 people brings together some of the world's best designers and usability experts. Oracle Cloud is seeking a skilled, senior technical writer to join the Cloud Operations documentation team. The successful candidate will be responsible for:

Software Developer 3 Architect the Next Generation Development Framework for Fusion Applications Fusion Applications Technical Architect

Architect the Next Generation Development Framework for Fusion Applications Fusion Applications Technical Architect Security Alerts Group is responsible for the following: - Managing and expediting the resolution of security vulnerabilities.

The group is responsible for delivering Oracle Multitenant and features in SQL & Meta-data Cache layer Oracle Multitenant As part of the Higher Education Development strategy team, provide strategic leadership for key product, market and competitive analysis.

Fusion Talent Management is a fast growing family of applications that is key to Oracle's ability to outpace the competition. Our team is responsible for low-level software development that includes boot code, device drivers, management software and system integration.

Oracle Cloud offers a comprehensive set of enterprise applications and services in the Cloud from the Oracle Data Cloud.

Qualifications (External) (2nd Part) (BL)

ation. It is the industry leader in the Identity Management space with a strong slate of both established and emerging member of the software engineering division, you will use basic knowledge of software architecture to perform tasks effectively executed to meet Corporate specifications. Demonstrated leadership and people management skills. Strong PaaS) product offerings for Oracle customers. We are a rapidly growing, fast paced and technology driven team with - Understanding of OBIEE architecture, Presentation Services, Web Catalog, Answers Dashboard, Informatica ETL. y of FMW products as offerings in Oracle Public Cloud (OPC) Platform-as-a-Service (PaaS) model and also deployed ities: - As a System Testing team, we are responsible for Fusion Apps SaaS Setups (OVM), Lifecycle Management refinement for acquisition phase of digital media lifecycle o Integration of studio systems with Oracle applications, ent, job management * Networking: transport protocols, security, load balancing, routing, performance * Specific Applications for significant new projects and specify, design and develop software according to those specifications. You v ations for significant new projects and specify, design and develop software according to those specifications. You v g with all levels of the organization and researching information using internal systems in addition to external data s

Open World 2011 keynote speech. According to several key analysts, the Oracle Public Cloud (OPC) is a key strategic fragile security technology and implementations. Enterprises deploy sophisticated tools, Identity Management systems delivery of innovative cloud, infrastructure and data solutions. The things we do at Oracle have never been done before work together—in the cloud and in the data center. By eliminating complexity and simplifying IT, Oracle enables its competitive edge in the 21st century. BPM is both a corporate strategy and a software technology - it cuts across departments cloud systems and applications? Do you dream about web security, cloud scale and scalable architecture? If so, delivery of innovative cloud, infrastructure and data solutions. The things we do at Oracle have never been done before campaign strategy, product launches, and cross functional orchestration of marketing execution activities for Oracle cloud test development. We work on Java, JMS, TestNG, Bpels, Oracle Weblogic, Oracle SOA, High Availability Cloud Level: Senior Product Manager Department Description Oracle's Cloud mission is to bring its leading enterprise gnoring of software applications or operating systems. Provide technical leadership to other software developers. Specifically manually test (one or a few of) Oracle cloud infrastructure components; execute and analyze automated tests - manually delivery of innovative cloud, infrastructure and data solutions. The things we do at Oracle have never been done before information solutions for Oracle Enterprise, Oracle Cloud and Engineering teams through Oracle Enterprise Manager according to several key analysts, the Oracle Public Cloud (OPC) is a key strategic move and will change the computing gnoring of software applications or operating systems. Provide technical leadership to other software developers. Specifically provisioning team, at Oracle Cloud Managed Services. Oracle experts use Information Technology Infrastructure Library atabase. The Oracle NoSQL Database and related technologies are used by some of the leading technology innovation. Core to our EPM solution are industry leading financial applications for enterprise budgeting, planning, consolidation to leverage their Oracle investments to extend into the cloud with greater value, choice and confidence. For ities: - As a System Testing team, we are responsible for Fusion Apps SaaS Setups (OVM), Lifecycle Management frameworks and tooling necessary for the successful running of Oracle Cloud Services for customers on Oracle Cloud nux community on BTRFS and withing Oracle to develop new features for the kernel. Significant experience as a manager on Incidents/Request and CHANGE MANAGEMENT process - Proficient with Installation, configuration and administration; associated with developing, debugging or designing software applications or operating systems according to provide; associated with developing, debugging or designing software applications or operating systems according to provide Open World 2011 keynote speech. According to several key analysts, the Oracle Public Cloud (OPC) is a key strategic rice, videos, and courseware to support the Oracle HCM Cloud Service applications. Our team works closely with the according to several key analysts, the Oracle Public Cloud (OPC) is a key strategic move and will change the computing engineers to create next generation user experiences. We use the latest industry standards and best practices to create successful candidate will have superior written and oral communication skills, a solid grounding in both software and do

Qualifications (Internal) (2nd Part) (BL)

Information, human resources, talent management, social networking, databases and Java as part of the Oracle Cloud. I will be responsible for driving the adoption and implementation of standards for consistent product release communication. Sustaining Engineering will be seen as the 'go to' team for all aspects of product maintenance at Oracle. Oracle Identity is Oracle's internal Learn implementation and will also be responsible for understanding other enablement tools that drive our operations. Our core areas for Customers and the Applications organization are: - Increased productivity; - Increased integration; - Enterprise Deployment, and Lifecycle testing, which includes taking an active role in the definition and evolution of improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes, and at least 10 years experience working on test development and automation frameworks. He should be well versed with the design and sustaining of the core supply planning engine(s). Desired Skills/ Experience: - Strong object oriented design and development of complex data in a simple UI. Do you like to develop slick web and mobile interfaces that are simple yet powerful. I am looking for a loud. My group is chartered with LCM solutions of this space. Team will be responsible to give best LCM experience to our customers. - Frequency patterns, etc. - Java Design and Abstraction: designing classes and interface, using patterns effectively to build high quality products. Candidate should have the ability to install, configure and troubleshoot each operating system. - Troubleshooting experience - 2+ years IT work experience preferred in a corporate support environment - Demonstrated experience with RDBMS, Oracle database, Oracle SQL - Experience with Java/J2EE technology stack - Ability to learn and apply object-oriented development expertise and database know-how on the data we ingest from hundreds of different sources that keep Oracle at the forefront of the computer industry. Oracle Labs is the only organization at Oracle which is similar to companies like Nikon, Orbitz, Tivo, and Sony as they interact with millions of customers every day. This is an opportunity to work on Java Design and Abstraction: designing classes and interface, using patterns effectively, documenting APIs clearly, and producing external webcasts. They are responsible for the complete cycle of video encoding, delivery, presentation on a variety of devices, assigning metadata tagging and organizing of digital assets. Responsible for the day to day system usage, management, and optimization. Leading contributor individually and as a team member, providing direction and mentoring to others. BS in Computer Science. Improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes, and integration and regression test plans created by QA. Communicate with QA and porting engineering to discuss major changes.

and ability to automate common administration tasks. - Expertise in administration of Oracle technologies like Fusion Middleware as part of a team organizing, planning and executing projects from vision through implementation. As part of Oracle's commitment for a position opportunity, Oracle Corporation asks for each candidate to register for their respective targeted position. Don't miss out! We are seeking a senior software developer who is interested in bringing software development expertise to our team. We will be able to develop new features for the kernel. A high level of proficiency with C, Linux kernel internals, and git is required. We will be able to develop new features for the kernel. A high level of proficiency with C, Linux kernel internals, and git is required. We will be able to help shape and deliver on a strategy to build broad use of Oracle's Infrastructure as a Service (IaaS) and Platform as a Service (PaaS). Java Design and Abstraction: designing classes and interface, using patterns effectively, documenting APIs clearly, and producing external web work and the support you need to accomplish great things. Our Engineers and product managers are focused on building and maintaining ad hoc queries, reporting, and multidimensional analysis. Our customers are typically business users, who are looking for improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes, and systems, or equivalent experience relevant to functional area. * Experience in one or more of the following areas: - Oracle's strength as the premier Enterprise Software provider to deliver applications in a new and innovative Cloud Computing environment and systems for the Oracle Cloud organization. We focus on improving the operational efficiency of hosting operations for our customers. Networking, Mobile services. We certify all the above products for the entire lifecycle including provisioning, upgrade, and testing. Frameworks and tooling necessary for the successful running of Oracle Cloud Services for customers on Oracle Cloud. We will be able to help our customers with high qualities to lead, perform, support Integration and System level testing related to Oracle Cloud Identity Service. We will be able to take a proactive position on ensuring a quality user experience for enterprise applications. At Oracle, user experience means we will be able to help our customers with high qualities to lead, perform, support Integration and System level testing related to Oracle Cloud Identity Service.

Improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes, and forensic investigations & eDiscovery tasks. Provide technical computer forensic advice and assistance to Oracle lines of business. Advanced technical/business skills in area of specialization. Leading contributor individually and as a team member, providing direction and mentoring to others. Improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes, and users. We create the user experience for the Cloud Applications as well as the UX for the platform, components and integrations. We are responsible for our Integration Marketplace as part of Oracle Integration products in the cloud. The ideal candidate will understand and apply the latest advancements in hardware with innovative features built in software, Exadata has gained huge traction in our market. Improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, processes, and

Qualifications (External) (1st Part) (BL)

We are currently seeking an experienced IT analyst to join our Oracle Application Labs (OAL) DevOps team. This position, you will apply basic to intermediate knowledge of software architecture to perform software development tasks. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and marketing. Description: Analysis of the market, go-to-market plan development, message creation and content creation are essential. Department Description: Join the Oracle Sales Cloud Product Management Team and work with smart Product Managers. In this position, you will apply basic to intermediate knowledge of software architecture to perform software development tasks. Description: The Sales Cloud Vertical Mobile development group is part of the Oracle Sales Cloud development team. Exciting opportunity to join a cutting edge team to advance our tools and automation to deliver apps for the Oracle Cloud. Oracle Sales Cloud is part of Oracle's Customer Experience portfolio and is one of the market leading Software-as-a-Service solutions. Oracle Fusion HCM is the world's best human capital management cloud application to automate HR process from recruitment to retirement. In this position, you will develop and apply software design/usability processes in the investigation of technical issues. In this position, you will develop and apply software design/usability processes in the investigation of technical issues. In this position, you will apply basic to intermediate knowledge of software architecture to perform software development tasks. We are seeking a passionate JavaScript, AJAX expert who will play a key role in supporting critical oracle.com web applications. Description: As a member of the software engineering division, you will take an active role in the definition and evolution of standard practices and procedures. Every day at Oracle we are changing the way the world does business by challenging the status quo through the development of new products for customer needs. This involves resolving post-sales non-technical customer inquiries via phone and electronic mail. We're looking for highly motivated, experienced and smart engineer who will manage hardware and software parts in the development of Oracle's Applications User Experience team of over 150 people brings together some of the world's best designers. USABILITY ENGINEER Responsibilities include: - Develops and conducts usability evaluations (e.g., heuristic evaluations, user testing). - Analyzes and reports on usability issues. - Collaborates with product managers and developers to improve the user experience. - Defines specific usability requirements. Brief Description: Oracle's Data Driven Applications team is looking for exceptional talent to develop the next generation of Oracle applications. Organization Name: Oracle Sales Cloud, PRM product development Department Description: Oracle Sales Cloud Product Management Team The Database Security group at Oracle is responsible for developing database security technology that provides deep protection for Oracle Public Cloud. Oracle Public Cloud is experiencing significant growth resulting in rapid expansion of the underlying network infrastructure. Oracle Public Cloud is experiencing significant growth resulting in rapid expansion of the underlying network infrastructure. In this position, you will apply basic to intermediate knowledge of software architecture to perform software development tasks. Oracle Cloud offers a comprehensive set of enterprise applications and services in the Cloud from the Oracle Data Analytics Cloud to the Oracle Cloud Infrastructure. Oracle Public Cloud is experiencing significant growth resulting in rapid expansion of the underlying network infrastructure. Oracle Public Cloud is experiencing significant growth resulting in rapid expansion of the underlying network infrastructure. Oracle Fusion Sales Cloud, a component of the Oracle Fusion Applications suite, sets a new standard for sales performance. The Oracle Virtual Compute Appliance product development team is a fast-paced, multi-faceted engineering organization. Oracle's Advanced Customer Support (ACS) Services organization delivers expert-level Support Services remotely. Build up your career opportunities by learning the modern software development technology and all aspects of business operations. Oracle is moving aggressively to offer customers a full range of Cloud Solutions including sales force automation, human resources, and marketing. Department description: Manufacturing & Distribution (M&D) is Oracle's global organization responsible for product development and manufacturing. Technical expertise in identifying, evaluating and developing systems and procedures that are cost effective and meet user requirements. *KC Are you a development expert in Java, J2EE, Algorithms and/or Data Structures or are you experienced in advanced system architecture? Oracle Contact On Demand (COD), cloud based, intelligent telephony system. Supports Voice, Chat and E-mail interaction. Are you a Leader that can transform how industry Enterprises use the Cloud to automate? Can you work equally well in a team? In this position, you will apply basic to intermediate knowledge of software architecture to perform software development tasks. This position will be primarily focused on outbound product management activities with the Oracle Talent Management team. ORACLE CLOUD – Middleware Engineer Oracle Corporation Redwood Shores (CA) Oracle is shifting the complex world of middleware to the cloud. This key Senior Developer/Designer would spearhead designing and prototyping solutions for our most strategic products. Job title: Senior or Principal Product Manager – SMB and LOB, Oracle Cloud Platform Quick description: This is an exciting opportunity to join a fast-paced, multi-faceted engineering organization. Performs testing and debugging of applications. As a member of the software engineering division, you will perform development and testing of applications. The Oracle Virtual Compute Appliance product development team is a fast-paced, multi-faceted engineering organization. In this position, you will use basic knowledge of software architecture to perform tasks associated with developing, debugging and testing applications. If you have experience in and a passion for developing databases (OS development is welcomed as well) and want

Qualifications (Internal) (2nd Part) (BL)

ably in one or more of the following modules : Order Management/Oracle Receivables /Oracle Inventory. - Strong improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p human resources, talent management, social networking, databases and Java as part of the Oracle Public Cloud. Or sential in this position. So, proof of strategic analytic skills, excellent communication, presentation creation and writi anagers, UX Designers, and Engineers to define, design, and prototype new Oracle Sales Cloud analytics capabilities improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p e offline applications for vertical solutions for Consumer Goods Retail Execution, Pharmaceuticals using mobile app Cloud! Requirement: - Ability to adopt and create solutions with new technology - Perl, Unix shell scripting, Java, Pyt a-Service offerings in the CRM space. We are seeking a Product Manager to join the Sales Cloud platform team. T small scale to extremely large scale Enterprises over the cloud. We have a huge customer base and growing very st lopment teams, including the analysis and investigation of applications/systems including tactile methods, visual gra lopment teams, including the analysis and investigation of applications/systems including tactile methods, visual gra improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p technology programs. Primary focus is to support the implementation and integration of various market-leading web ition of standard practices and procedures. You will be responsible for defining and developing software for tasks as delivery of innovative cloud, infrastructure and data solutions. The things we do at Oracle have never been done before and providing advice and assistance to internal Oracle employees on diverse customer situations and escalated issues of Oracle Linux (OL), Unbreakable Enterprise Kernel (UEK) and Oracle VM test lab and will be a part of test infrastru and usability engineers. We create the user experience for the next generation of enterprise applications to help our ation, cognitive walkthrough, usability tests) on individual products/prototypes or modules of larger products/prototyp improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p the Server Technologies division is responsible for research, design and development of cluster database and stor; ation of Applications running on Oracle Cloud Infrastructure. Detailed Description: As part of the Data Driven Applic cloud is building the next generation Oracle Sales Cloud products. As part of Oracle Sales Cloud we are enhancing F fense-in-depth for sensitive business data. We were the first in the industry to come up with innovative technologies ructure to support that growth. We are looking for high caliber software engineers with development experience in ructure to support that growth. Our team is building a suite of solutions to facilitate secure interconnects with custom ructure to support that growth. Our team is building a suite of solutions to facilitate secure interconnects with custom improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p base, Fusion Middleware and Fusion Application stack, including: Software as a Service (SaaS), Platform as a Servi ructure to support that growth. We are looking for software engineers with development experience in multiple area ructure to support that growth. We are looking for software engineers with development experience in multiple area orformance management, enterprise integration, and business flexibility. Application Composer team is chartered to build zation. As part of Oracle's Engineered Systems portfolio, product development merges server, storage, networking, and at the customer site. These services help customers with managing and maintaining their Oracle environments astic folks who understand the blend of technology and applications like - Fusion Home Page - Help Portal - Reporti human resources, talent management, social networking, databases and Java as part of the Oracle Cloud. Oracle's s t release, software distribution to customers, and the associated functions supporting these activities. Business App organizations through Program Management, Technology, Business Process Optimization, Portfolio Administration ent, job management * Networking: transport protocols, security, load balancing, routing, performance * Specific App interactions. It is skill based automatic call distributor (ACD), Interactive Voice Response (IVR), and multi-tenant sys: tise as well as develop new skills. The PCS/BPM engineering team is spread all around the world in four continents improvements to the architecture. Duties and tasks are standard with some variation; displays understanding of roles, p ent for Midsize team supporting the Oracle Taleo Business Edition and Oracle Learn Cloud products. The p primary ity from IT, moving it out of the enterprise by engineering hardware and software to work together—in the cloud and e-sales opportunities for our cloud and mobile products. This would include modern and competitive UX/UI designs, outbound product management position r esponsible to build and support initiatives to grow Oracle Cloud Platform nit test plans. Review integration and regression test plans created by QA. Interact with QA and porting engineering zation. As part of Oracle's Engineered Systems portfolio, product development merges server, storage, networking, r understanding and applying company policies and processes. Gaining competence in own area and acquiring a hi; : to be a part of a team building a next generation database, please read on and apply! There is a lot of excitement a
