Qualifications (Internal) (1st Part) (BL)

As Oracle rapidly expands its cloud portfolio, here's an opportunity to be at the center of action for Oracle Database Cloud Development Team. Job description Department Description: Oracle's Database Cloud Development Team is the team that is responsible for Linux OS/Container monitoring, metrics and diagnostics project. We are working on enhancing "Oracle Linux" to be more reliable and secure. About Us and the Product Do you envision an engine that can schedule and execute millions of tasks per second? / Program Release Manager Continuous Integration Preferred Qualifications The Engagement Cloud Program Manager Architecture & Performance Services provides evaluation and deployment planning services for new/emerging products. Description: This individual will play an active role in M&A integration and due diligence efforts for the Global Pricing The Virtual Operating System (VOS) development group provides a portable and high-performance platform for the Oracle Cloud Machine – Advanced Systems Development Are you interested in delivering scalable, high performance Oracle Product Release is seeking Configuration Analysts who will work within the Product Release team to administer DevOps Manager Reporting to the Director of Development the DevOps Manager provides technical leadership and is protected by law.

This team is building and supporting development of Oracle IaaS systems, as well as internal IaaS systems providing Director, Oracle Application Development Cloud Product Marketing Preferred Qualifications Are you passionate about Do you view Supply Chain as a playground of opportunity? Oracle Worldwide Operations manages the hardware services Identity Cloud Services is the next generation Identity Management solution to be offered as a Cloud Service. Our Oracle's Adaptive Intelligence Applications is changing the way businesses market to consumers by delivering real-time The Oracle's Adaptive Intelligence Applications product is changing the way businesses market to consumers by delivering The Business Implementation Project Manager is responsible for the successful analysis and implementation of complex We are a newly formed group within Oracle working on solving some really hard problems. We are like a start-up in We are a large, fast-paced engineering team looking for someone who is passionate about delivering high quality products We are looking for talented Manager/Leads, who are passionate about developing cutting edge enterprise systems. Oracle's Infrastructure Cloud Container Service is Hiring Software Engineers Oracle is building a from scratch Infrastructure - Extensive experience in -- Oracle RDBMS - Oracle GI (CW and ASM) and RAC - Exadata experience - Understanding Job Requirements: * BS degree in Computer Science or related technical field. * System Engineer with extensive Manage the customer experience of Global IT Web Collaboration services.

Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, gender, or Description The Fusion Fleet Manager tool provides support across all aspects of planning, scheduling, communication Oracle Linux and Virtualization system test team works on Linux and virtualization products, with the focuses to ensure Member of a Field Services delivery experience team that acts as the central resource and driving force for the design Oracle's Infrastructure Cloud Container Service is Hiring Software Engineers Oracle is building a from scratch Infrastructure protected by law.

Oracle Clusterware is portable cluster software that allows clustering of independent servers so that they cooperate Identity Management Life Cycle Management team is a group of talented people who are passionate about improving ORACLE'S GLOBAL SUPPORT - ORACLE DBA As a member of the Support organization, your focus is to deliver post-incident Group Overview: We design and develop the data storage & processing engine for the Oracle Database and the E

Internship Program Manager, Oracle Education Foundation Oracle's Corporate Citizenship team seeks an Internship The Release Management Team is a group of senior professionals bringing new releases of the best-in-class cloud products The primary function of the Issue Escalations Manager is to drive NetSuite customer satisfaction by ensuring that we Department Description: Oracle Application Labs (OAL) builds and manages mission critical applications that run the We are looking for hands-on engineers with a passion to solve interesting problems in distributed systems and high communication & project management skills, and have an interest in global / international operations, then this role Corporate Security Architecture oversees Information Security Architecture strategy and direction in support of key virtualization. 7 years experience with Core products or eight years experience with Applications products, BS Computer In this role you will be responsible for jointly designing and developing solutions for Oracle Public Cloud in collabor

Qualifications (Internal) (2nd Part) (BL)

, and the ability to gauge organizational dynamics. Some project management experience would be advantageous. The role requires in depth knowledge of database deployment concepts like clustering, High availability, scalability, and the ability to handle OS issues. Define and work on projects to do OS monitoring, gather metrics and diagnostics, in particular you will be responsible for:

- Design and implementation of first generation cloud orchestration service
- Coordinate with other teams to ensure that our team and projects are aligned with the overall CRM and Fusion Apps release plan and goals.
- Conduct Validation Testing - Provide guidance on optimizing performance and utilization - Technology Management
- Identify and recommend changes to be discontinued or modified at transaction close.
- Work with Corp Dev Commercial Inbound to understand the implications and ensure we are
- Be interested in working on very complex and challenging problems in area of high performance IPC and scalable architectures to validate customized design for each different deployment scenarios. You will deliver the solutions that demonstrate strong problem solving skills and technical aptitude - Detail oriented - Strong verbal and written communication skills - Basic financial acumen - Ability to drive high customer satisfaction, and leading a resourced organization. The primary responsibilities of this position

network storage experience is valuable. 10 years of infrastructure experience with cloud computing experience is required for continuous delivery. In this role you will own the marketing strategy, positioning and go-to market plan and manage both the commercial and Cloud business, and rapidly develop new processes that scale and align with a business growth strategy. You will have expertise in building large cloud services and be able to demonstrate prior success in this area. Identity Management is a key part of the Data Driven Applications team you will be expected to create high / low level designs based on requirements and develop the Oracle Adaptive Intelligent Discount product through all phases of the product lifecycle. The role is in a fast moving Sales Cloud environment, and recommend new features for implementation.

- Identify test scenarios, develop test cases, and execute tests, feeling comfortable with legal, technical, and scientific language.
- 8+ years of experience as a Software Developer in at least one of the leading test automation tools - Selenium, OATS
- Experience working in Agile environment - Excellent communication skills
- Ability to meet/beats project due date and shows teamwork.
- * Java Concurrency: multi-threading, locking, synchronization
- * Ability to work across the stack, from REST API to distributed systems core to OS kernel, and we are looking for teammates who are interested in large scale distributed systems
- Experience in supporting large scale services
- Scripting/coding skills (Shell, Python, etc.)
- * Designing, analyzing and troubleshooting large-scale distributed systems.
- * Systematic problem solving approach

age, color, religion, sex, national origin, sexual orientation, gender identity, disability and protected veterans status or other protected characteristics. You will work with senior management staff - Travel domestically and internationally to coordinate service delivery by remote and on-site. - Evaluate and plan methods of approach and organize means to achieve solutions to the complex development challenges. - Work as a team member, providing direction and mentoring to others. MS or MBA degree or equivalent experience. - Ability to work across the stack, from REST API to distributed systems core to OS kernel, and we are looking for teammates who are interested in large scale distributed systems

is instrumental and responsible in building infrastructures and tools which help manageability of Oracle clusterware. We worked with a diverse group of people in expanding our SaaS as well as in supporting our customers. We are a problem solving/problem avoidance team, routinely sought after to address extremely complex, critical customer issues. See our recent in-memory innovations by this team with the Oracle Database's upcoming In-Memory option, featuring

an agile spirit and the ability to execute on our core program while simultaneously creating new structures and systems. 1. Lead the agile product delivery of OMC product. 2. Work closely with the product management, engineering, Development and operations teams to ensure we are fixing the right bugs, in the right amount of time, with the right amount of customer-facing communication. 3. Work with other teams in the group. You will be accountable for managing the scope, time, integration, risk, communication, cost, HR, sales and marketing. 4. Excellent understanding of data structures and algorithms. 5. Excellent troubleshooting and debugging skills. This role may be for you! This could be your opportunity to join us on the ground floor as we build and launch a new business. We are looking for a Senior Architect. Responsibilities include helping set internal information security technical direction while advising and guiding other teams. Degree in Computer Science/Management Information Systems/Science/ Engineering/Math/Physics/Chemistry with 3.0 GPA OR (for those without a degree) - Demonstrated hands on, technical solutions, with verifiable outcomes - Deep experience in con-
