OSHA’s On-Site Consultation Program
FREE Workplace Safety and Health Consultation Services

Why should I consider calling?
It is a free service that can save you money.

Do I have to participate?
No, but if you do, you can save money for your company and improve the safety of your employees.

Am I inviting trouble?
No, you are inviting an opportunity to improve employee morale, recognize and remove hazards from your workplace, and decrease workers’ compensation costs.

Is it difficult?
You will have no trouble calling. Saving money and increasing safety is easy when you have the right information.

Will the person who visits me be an expert?
Absolutely. The person will be skilled in the best ways to save you money and increase your company’s safety and health capabilities.

OSHA’s On-Site Consultation Program
FREE Workplace Safety and Health Consultation Services

Every year, many businesses like yours are found to be in violation of workplace safety and health regulations, and they face the consequences.

On-site consultations are provided by a consultant from a state agency or university and can cover any of the following:

- Safety and health hazard surveys
- Industrial hygiene testing
- Safety management
- Informal on-site training

The On-site Consultation Program is designed to be easy for workplace to take part in.

These consultations are an opportunity for your business, with the assistance of an expert consultant, to learn how to keep both current and future safety and health concerns.

On-site consultations are free, confidential, and completely separate from enforcement.

You’re glad you now have procedures to minimize workplace injuries, lost workdays, property damage, high workers’ compensation costs, lost revenues, and a damaged reputation.

You’ve seen other businesses like yours fail because they didn’t adequately address workplace safety and health hazards and face workplace injuries, lost revenue, and a damaged reputation. Your business was not and will not be one of those.

The consultant was an experienced expert aware of workplace safety and health requirements and standards.

Workplaces can be fined for serious workplace violations of workplace safety and health regulations. Besides the cost of the fine, unsafe workplaces face higher workers’ compensation and insurance premiums.

The On-site Consultation Program consultant was able to help you implement manageable and doable solutions to address safety and health issues in your workplace.

All it took to get started was one call. Participation was easy. From a project scope, the consultant helped you develop the skills and tools necessary to implement workplace solutions.

OSHA’s On-Site Consultation Program
FREE Workplace Safety and Health Consultation Services

People are injured at work every hour of every day. How many last time incidents have you had in the last year? How long will it be before the situation is totally out of your control?

FACT

There’s nothing I can do. If someone’s going to get hurt, I’m helpless to stop it.

You can do something right now. You can call the On-site Consultation Program.

FACT

Myth

No one in my workplace will be seriously hurt.

Myth

OSHA’s On-Site Consultation Program is designed to be easy for businesses to take part in. These consultations are an opportunity for you to work with the assistance of an expert consultant. To learn how to best handle both current and future safety and health concerns.

OSHA consultations are free, confidential, and completely separate from your enforcement.

Myth

I can wait until next year.

Myth

What if someone gets hurt this year?
Think about how you’ll feel when you receive the call that a worker was hurt.

FACT

Myth

If they find a hazard, I won’t know what to do.

FACT

The consultant will suggest how to eliminate hazards. They’re experts there to help you. They’ll give you the knowledge you need to address any problems.

FACT

This is too complicated—It’s too much of a bother to get involved.

FACT

Requesting a consultation only requires a call, an email, or contact through our website.

It is easy to work with the On-site Consultation Program consultant.

Your expert consultant can help you learn to reduce both current and future safety and health hazards.

The Consultation visit will include an opening conference, an evaluation of potential hazards at the worksite or operation(s) you designate, and a confidential report with findings and recommendations for the workplace hazards identified. Assistance may also be available after the visit to help you get started.

OSHA’s On-Site Consultation Program
FREE Workplace Safety and Health Consultation Services

It is easy to arrange a free on-site consultation.
The process starts with your call, email, or website request.

Unsafe workplaces put workers at risk and can be fined for serious violations of safety and health regulations.

Unsafe workplaces also face higher workers’ compensation and insurance premiums.

Every year, many businesses (like yours) are found to be in violation of workplace safety and health regulations, and they face the consequences.

On-site consultations are provided by a consultant from a state agency or university and can cover any of the following:

- Safety and health hazard surveys
- Industrial hygiene testing
- Safety management
- Informal on-site training

The On-site Consultation Program is designed to be easy for workplaces to take part in. These consultations are an opportunity for your business, with the assistance of an expert consultant, to learn how to best solve both safety and health problems.

On-site consultations are free, confidential, and completely separate from enforcement.

The Consultation visit will include an opening conference, an evaluation of potential hazards at the worksite or operation(s) you designate, and a confidential report with findings and recommendations for the workplace hazards identified. Assistance may also be available after the visit to help you get started.

OSHA's On-Site Consultation Program

FREE Workplace Safety and Health Consultation Services

Serving the Small Business Community

OSHA provides free and confidential safety and health advice to small and medium-sized businesses committed to improving workplace safety and health.

ON-SITE CONSULTATION PROGRAM

Do you worry that serious workplace hazards put workers at risk and could disrupt or even shut down your business?

Workers’ comp costs cutting into profits?

Can’t afford to hire a safety consultant?

If so, OSHA’s FREE and CONFIDENTIAL On-site Consultation Program may be perfect for you!

On-site Consultation services are separate from enforcement and do not result in penalties or citations.

Each year, our on-site consultants respond to approximately 30,000 requests from businesses looking to improve worker safety and health. At your request, a consultant from a state agency or university will visit your workplace to help you identify hazards and make recommendations on possible solutions.

The Consultation visit will include an opening conference, an evaluation of potential hazards at the worksite or operation(s) you designate, and a confidential report with findings and recommendations for the workplace hazards identified. Assistance may also be available after the visit to help you get started.
