

The Uniform National Threshold Entered Employment Rate (UNTEER) was 58.2 percent in 2019. Eleven states and territories failed to meet 90 percent of this threshold (equating to 52.4 percent). The UNTEER was calculated from the 6/30/2019 WIOA data as certified in the Workforce Integrated Performance System. UNTEER follows an entered employment calculation, which differs from current Workforce Innovation and Opportunity Act calculations. Specifically, the figures below represent the percentage of exiters who were unemployed or received notice of termination/lay-off at time of participation who were then employed within the first quarter after exit.

State	Entered Employment	1st Qtr Exiters (unemployed)	UNTEER Rate	Pass/Fail
ALABAMA	2,396	3,956	60.6%	PASS
