General Comment

I strongly support this proposed Amendment to Prohibited Transaction Exemptions 75-1, 77-4, 80-83, 83-1, and 86-128. Since the US government abandoned workers to a pension-less future, this is the least that it can do to protect the interests of individuals who must make best on their future retirement in the gambling halls known as the stock market. It is imperative that independent financial advisors have fiduciary duty to each client and to no-one else.
