Project Environmental Findings

Finding: Class II(c) - Categorical Exclusions (C-List)

Class Level Description

Class II(c) consists of projects that do not have a significant environmental impact on the human or natural environment and are therefore categorically excluded from the requirement to prepare an environmental assessment or an environmental impact statement. FTA requires a sufficient project description to support a CE determination. The project may require additional documentation to comply

with other environmental laws.

Categorical Exclusion Description

Type 07: Acquisition, installation, rehabilitation, replacement, and maintenance of vehicles or equipment, within or accommodated by existing facilities, that does not result in a change in functional use of the facilities, such as: equipment to be located within existing facilities and with no substantial off-site impacts; and vehicles, including buses, rail cars, trolley cars, ferry boats and people movers that can be accommodated by existing facilities or by new facilities that qualify for a categorical exclusion.

Only eligible Transit Vehicle Manufacturers (TVM) may bid on FTA-assisted transit vehicle procurements. The current list of eligible TVMs can be found at <https://www.transit.dot.gov/regulations-and-guidance/civil-rights-ada/eligible-transit-vehicle-manufacturers>. Recipient must ensure that all FTA-assisted vehicle purchases comply with the ADA requirements in 49 CFR Part 37 and Part 38, and purchases are through an eligible TVM.

In accordance with 49 CFR 37.77, public funded entities operating demand-responsive service which receive financial assistance from the Federal Transit Act must file a certificate of equivalent service before procuring any inaccessible demand-responsive vehicle. Please contact FTACivilRightsSupport@dot.gov for more information.

Recipient must comply with all applicable Federal laws and regulations related to this project, including the ADA Standards for Transportation Facilities, based on the U.S. Access Boards ADA Accessibility Guidelines found here: <http://www.access-board.gov/guidelines-and-standards/transportation/facilities/ada-standards-for-transportation-facilities>

. The following is a non-exhaustive list of ADA standards that Recipient must comply with. The information provided below is intended as technical assistance and applies only to the project as described. Should the project scope change or new information on the project be provided, FTA may require a re-evaluation of the project information as it relates to ADA and require additional information. This confirmation is not an express or implied promise of project compliance with the ADA.

Comment

As required under DOT ADA Standard 206.3, Recipient must ensure that accessible routes coincide with or are located in the same area as general circulation paths, and elements such as ramps, elevators, and fare vending and collection areas are placed to minimize the distance that wheelchair users and other persons who cannot climb steps must travel in comparison to the general public.

As required under DOT ADA Standard 406.8, Recipient must ensure that curb ramps will have detectable warnings.

As required under DOT ADA Standard 810.2, Recipient must ensure that bus boarding and alighting areas are in compliance with the ADA-ABA Guidelines (Section 810.2), which address surfaces (sturdy); dimensions (96 long x 60 wide); connection to sidewalks, streets, and pedestrian paths; slope (not steeper than 1:48); signs; and public address systems.

As required under DOT ADA Standard 810.3, Recipient must ensure bus shelters shall provide a minimum clear floor or ground space complying with Standard 305 entirely within the shelter. Bus shelters shall be connected by an accessible route complying with Standard 402 to a boarding and alighting area complying with 810.2. As required under DOT ADA Standard 810.2, new, altered, or relocated bus stops must have a firm, stable surface and must provide a clear length of 96 inches (2,440 mm), measured perpendicular to the curb or vehicle roadway edge, and a clear width of 60 inches (1,525 mm), measured parallel to the vehicle roadway. As required under DOT ADA Standard 810.2, the slope of the bus boarding and alighting area in the direction parallel to the roadway must be the same as that of the roadway to the maximum extent practicable. Perpendicular to the roadway, the slope must not exceed 1:48, that is, not more than 1

inch of rise over a horizontal distance of 48 inches.
