ARTICLE 26
DIRTY WORK

- (a) The parties recognize the nature of work within the shipyard industry requires working in conditions more dirty disagreeable, and unpleasant than in other industries in the trades. Therefore, it is the intent of the parties to limit the applicability of dirty pay to mechanics and helpers in situations that are exceptionally dirty, disagreeable, or unpleasant relative to shipyard work. The onsite foreman, in consultation with the shop steward as necessary and/or as available shall determine in advance what areas warrant dirty pay or human waste pay, but shall not exercise this prerogative arbitrarily. The Company shall provide necessary appropriate protection (clothing, gloves, breather) when working on septic systems. It is not the intent of this provision to discontinue the use of tank cleaning and other cleaning services. The Company will implement a policy to flush and sanitize all septic systems prior to beginning repair work. The dirty pay penalty will be paid at the rate of time and one-half (1-1/2). However, when cleaning or working in septic tanks containing human waste, double time (2T) shall be paid for all classifications.
- (b) When an employee's clothing or body becomes soaked or contaminated with human waste, water or oil due to circumstances beyond his (her) control, and when the incident is properly reported, the employee shall be given a reasonable opportunity, on the Company's time, to clean up and/or change clothing. When circumstances require the employee to leave the yard or job site (outside job), he (she) shall be compensated (not to exceed two (2) hours) at the normal straight time rate. If the incident occurs less than two (2) hours before the end of the shift, he (she) shall be paid at the appropriate rate until the end of the shift.
