Comment Type Application Details

Date	7/27/2018
------	-----------

CDOT must comply with all applicable Federal laws and regulations related to this project, including the ADA Standards for Transportation Facilities, based on the U.S. Access Board's ADA Accessibility Guidelines. Found here: <http://www.access-board.gov/guidelines-and-standards/transportation/facilities/ada-standards-for-transportation-facilities>

The following is a non-exhaustive list of ADA standards that CDOT must comply with:

Requirements to Remember for: New Construction of Facilities

- As required under DOT ADA Standard 206.4.1, CDOT must ensure that 60 percent of all public entrances to the facility will be accessible. If a station has only two entrances, then both must be accessible.
- As required under DOT ADA Standard 810.10, for rail projects, CDOT must ensure that no flange way gap can be greater than 2.5" where passenger circulation paths cross tracks at grade (i.e. a street-level pedestrian crossing over streetcar tracks).
- As required under DOT ADA Standard 206.3, CDOT must ensure that accessible routes coincide with or are located in the same area as general circulation paths, and elements such as ramps, elevators, and fare vending and collection areas are placed to minimize the distance that wheelchair users and other persons who cannot climb steps must travel in comparison to the general public.
- As required under DOT ADA Standard 406.8, CDOT must ensure that curb ramps will have detectable warnings.
- As required under DOT ADA Standard 810.2, CDOT must ensure that bus boarding and alighting areas are in compliance with the ADA-ABA Guidelines (Section 810.2), which address surfaces (sturdy); dimensions (96" long x 60" wide); connection to sidewalks, streets, and pedestrian paths; slope (not steeper than 1:48); signs; and public address systems.
- As required by DOT ADA Standard 810.5.3, CDOT must ensure that station platforms must be coordinated with the vehicle floor height.

Comment

Requirements to Remember for: Alterations or Additions to Facilities

- As required under DOT ADA Standard 201 and DOT ADA Regulation 49 C.F.R. 37.43(a)(1), CDOT must ensure that altered or added portions of the facility must be made accessible.
- As required by DOT ADA Regulation 49 C.F.R. 37.43(a)(2) and DOT ADA Standard 202.3, CDOT must ensure that the path of travel to the altered or added portion of the facility must be made accessible, to the maximum extent feasible.
- As required by DOT ADA Standard 202.4 and DOT ADA Regulation 49 C.F.R. 37.43(e)(1), if the path of travel cannot be made accessible, CDOT must submit to FTA an analysis demonstrating that the cost of making the path of travel accessible is disproportionate to (i.e., > 20%) the cost of the alterations or additions to the primary function area.
- As required by DOT ADA Standard 202.4 and DOT ADA Regulation 49 C.F.R. 37.43(b), if the path of travel cannot be made accessible, CDOT must submit to FTA an analysis demonstrating that site-specific conditions prevent you from making the path of travel accessible. Include relevant diagrams and maps.

Rebuilt or Remanufactured Vehicles

- As required by DOT ADA Regulation 49 C.F.R. 37.75, DOT ADA Regulation 49 C.F.R. 37.83, and DOT ADA Regulation 49 C.F.R. 37.89, CDOT must ensure remanufactured or rebuilt vehicles are accessible.
- As required by DOT ADA Regulation 49 C.F.R. 37.75 (c), DOT ADA Regulation 49

C.F.R. 37.83(c), and DOT ADA Regulation 49 C.F.R. 37.89(c), if a remanufactured or rebuilt vehicle will not be accessible, CDOT must submit information to FTA demonstrating that the structural integrity of the vehicle would be significantly compromised if it is made accessible. Include an appropriate structural engineering analysis.

The information provided above is intended as technical assistance and applies only to the project as described. Should the project scope change or new information on the project be provided, FTA may require a re-evaluation of the project information as it relates to ADA and require additional information. This confirmation is not an express or implied promise of project compliance with the ADA.

Comment	Currently, in TrAMS, FTA is not able to deob funds from one scope while adding funds for other new scopes. These actions would have to be processed as separate amendments. Upon discussion with the grants manager, CDOT has decided to modify the POP and shift some projects around in order to reduce the need to deob from operating. Returning the grant so grantee may edit.

Comment	Please edit the "amendment remarks" since removing the original plan to deob some scope has been changed. FTA is unable to edit these remarks after the grant has been "transmitted." Returning so we can edit such remarks.

Comment	<p>Nice job on this amendment! Please make the following changes and this grant is ready for initial review signoffs:</p> <ol style="list-style-type: none">1. For each new project added (P2-P6) please add STIP info to the planning sections.2. ICB Bustang Outrider AVL project - please confirm project is compatible with Regional ITS Architecture requirements, and add statement.3. Change Avon Bus Shelter project to ALI 11.33.10 for a Bus Passenger Shelter description, instead of a bus station/terminal description.4. Change Cripple Creek Service Truck to ALI 11.42.11 for a support vehicle description, instead of acquire administrative building description.5. Add a couple more milestones to the Avon Bus Shelter construction project. Recommend taking any construction related milestones that may exist in the subrecipient agreement/contract. Such as, procure contractor dates, begin/end construction dates, open for transit service dates, or anything that CDOT uses to gauge progress for this project throughout the life of the pass-through contract.5. Last milestone date in this amendment appears to be 12/31/2019. Please change the Award End Period of Performance to 3/31/2020 instead of 2021, or provide rationale why CDOT would need an additional year after completion of activities to closeout this grant.6. I modified several ALI's to "yes, 3rd party contractors," including vehicles acquisition projects, Bustang Outrider ALV project, and CASTA contract. These projects include subrecipients and/or the state to develop procurement documents and need to comply with 3rd party contracting requirements of FTA and the State. The CASTA RTAP project is a contractor relationship, not a subrecipient relationship, between the State and CASTA to deliver RTAP training needs and therefore 3rd party requirements would also apply to this scope. Please review. If CDOT disagrees we can review further, together.
