**Subject:** Full investigation on exposure too these three sites for sick workers  
**Date:** Friday, June 07, 2019 10:52:11 PM

---

June 7, 2019

Dear Steven Markowitz, MD.

Please submit this to the full board members..please given us a written letter in response.

Records now have to be opened for Workers at Portsmouth, Ohio Paducah, Kentucky and Honeywell, Metropolis. We have the right to a full investigation!

We all handled contaminated reactor fuel from Russia. Plants also handled shipments from Hanford, Savanna River and West Valley, New York.

Neptunium offside in local schools exposing kids is a national tragedy. Workers and community members have been sacrificed enough!

We shouldn't have this Neptunium unless we reprocessed reactor fuel we are recommending this board ask for all records for these three sites workers deserve a fair and do processes of claims.

Thank you !  
Vina Colley
