(PRESS) Portsmouth/Piketon Residents for Environmental Safety and Security

(NNWJ) National Nuclear Workers for Justice .
A Call to Action

We are asking that the DOL to turn
the program over to the justice department .

We would like for Congress to see what is going on with this program before any more workers pass away.

We are into 18 years of corruption with our medical conditions and records. Workers are comparing records not just local but nationally.

We know from documented evidence that the workers and community have been exposed to neptunium, plutonium, americium, etc. We are demanding justice once and for all. You are liable for the deaths of thousands if you do not use your authority to act and make changes legislatively.

Thank you !
