Subject: SEMs questionable
Date: Monday, July 11, 2016 9:55:34 PM

There shouldn't have ever been two SEMs unless they are hiding the neutron exposures and that is no excuse. We had private meetings about what was at Piketon and I am sure other sites Interviewed workers

Workers gave information plus I know for a fact they made copies of my papers because they never knew about some of the hazards that I gave them for input. Two SEMs is really questionable to us. Especially the way we have been treated.

National Nuclear Workers For Justice.
