Washington DC 20210

Re: Estimate of EEOICPA Liabilities as of September 30, 2022
Dear Ms. Ananthanayagam:
Attached is the actuarial report documenting our analysis of the EEOICPA liabilities as of September 30, 2022. If there are any questions regarding this report or the analysis which it documents, I can be reached by telephone at (651) 293-8008 or by email at chris.gross@cognalysis.com.

Sincerely,

Chris Gross, ACAS, MAAA
President and CEO

## Introduction

The Energy Employees Occupational Illness Compensation Program Act ("EEOICPA") provides compensation and medical benefits to claimants who are (or were) employed in various energy-related activities either directly for the Department of Energy ("DOE") or through its contractors or subcontractors. Eligible claimants also include survivors of deceased workers who otherwise would have been eligible for benefit payments.

The Office of Workers' Compensation Programs ("OWCP") at the U.S. Department of Labor maintains a model to estimate the future liabilities of the EEOICPA program. The OWCP has requested that Cognalysis review the annual data updates to the model, review the reasonableness of the EEOICPA model and assumptions, and recommend enhancements as needed.

## Distribution and Use

The valuation has been conducted in accordance with all relevant Actuarial Standards of Practice. The purpose of the actuarial valuation report is to document the Energy Employees' Occupational Illness Compensation Program ("EEOICP") actuarial liability estimate and the change in the actuarial liability, and to assess the reasonableness of the related assumptions; to assist the U.S. Department of Labor in preparing the consolidated financial statements, as of and for the fiscal year ended September 30, 2022, in accordance with U.S. generally accepted accounting principles, as promulgated by the Federal Accounting Standards Advisory Board. We understand a copy of this report may be provided to OWCP's auditors. If this report is shared, we request that the report be shared in its entirety.

## Qualification

I, Chris Gross, am a member in good standing of the Casualty Actuarial Society and the American Academy of Actuaries and am qualified to provide this analysis.

Chris Gross, ACAS, MAAA

## Executive Summary

Part B of EEOICPA, effective July 31, 2001 provides lump sum compensation of $\$ 150,000$ and medical expenses to employees of the Department of Energy ("DOE"), or its contractors or subcontractors, who develop cancer, beryllium disease, or chronic silicosis after working at a covered facility. If the employee is no longer living, compensation benefits are available to survivors. Part B also covers employees who are a member of the Special Exposure Cohort ("SEC"). A worker who is included in a designated SEC class of employees, and who is diagnosed with one of 22 specified cancers, may receive a presumption of causation under the EEOICPA. The National Institute for Occupational Safety and Health ("NIOSH") has responsibility for designating additional facilities to the SEC.

Part E of the Act, effective October 28, 2004, provides wage loss, impairment benefit, and medical expenses to employees of the DOE and its contractors and subcontractors, who develop an illness due to exposure to toxic substances at certain DOE worksites. Part E also pays survivor benefits to certain survivors. Part E pays a maximum compensation amount of $\$ 250,000$ per case.

As of $9 / 30 / 2022$, the discounted liability estimate for future EEOICPA benefit payments is $\$ 48.3$ billion. The future compensation payments are projected at $\$ 10.8$ billion, and the future medical payments are projected at $\$ 37.5$ billion, on a discounted basis. This is a $12.2 \%$ increase over the $9 / 30 / 2021$ liability estimate of $\$ 43.0$ billion, driven by increased projection of Part E approvals, increased estimated costs of Part E benefits per case and increased medical costs, with the increase mitigated by increased mortality expectations.

## ESTIMATED LIABILITY FOR EEOICPA AS OF SEPTEMBER 30, 2022

## SUMMARY OF LIABILITY FOR FUTURE PAYMENTS

 (\$ Millions)|  | Discounted Liability Estimate |  |  |  | $\begin{array}{r} \text { YOY } \\ \text { Difference } \end{array}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{array}{r} \text { as of } \\ 9 / 30 / 2022 \end{array}$ |  | $\begin{array}{r} \text { as of } \\ 9 / 30 / 2021 \end{array}$ |  |  |  |
| Compensation: Part B | \$ | 2,835 | \$ | 2,956 | \$ | (122) |
| Compensation: Part E |  | 7,927 |  | 5,163 |  | 2,764 |
| Compensation: Total |  | 10,761 |  | 8,119 |  | 2,642 |
| Medical Payments |  | 37,529 |  | 34,918 |  | 2,610 |

## Discounted Cash Flow by Year

The following exhibits document the estimated cash flows by year, on a discounted basis. For informational purposes, the cash flows for the Department of Justice Part B RECA payments are displayed in column 4. The RECA compensation liability is included as part of Part B compensation liability in the Executive Summary.

## ESTIMATED LIABILITY FOR EEOICPA AS OF SEPTEMBER 30, 2022

[^1]
## Summary of Changes

The following significant changes in assumptions made in the model this year:

## 1. Part B

- Slight increase in the estimated percentage of cases that are filed by the employee for Beryllium Disease and Cancer - SEC.
- Slight increase in the percentage of Part B approvals that are already approved for Part E

## 2. Part E

- Increase in the number of estimated future new cases awarded for Part E
- Benefit amounts were previously uniform, but this year that assumption was revised to a trended benefit. The amount was set to $\$ 120,000$ for pre-2014, trended up at $6.1 \%$ annually until a cap of $\$ 250,000$ per case is hit, at which point it stays at the $\$ 250,000$ cap.
- Increase in the estimated percentage of cases that are filed by the employee (from $86 \%$ to 90\%)

## 3. Medical Costs

The estimated medical inflation rates were modified based on observed inflation/utilization over time. The starting point for projection was higher as a result of actual cost for 2022. The longterm inflation rates selected are the CPI-Medical inflation rates from the OMB Economic Assumptions.

## 4. Mortality

The mortality table was updated to the Private Retirement Plans (Pri-2012) published by the Society of Actuaries. The mortality rates have increased from the prior tables, resulting in a decrease in the liability estimate due to mortality assumptions.

Please see Appendix 2 for a listing of the specific values for all assumptions.

## Actual vs Projected

## Number of Cases Approved

Overall, there were 19\% fewer Part B cases and $15 \%$ more Part E cases newly approved during 7/1/2021 to $6 / 30 / 2022$ than what was projected. The reduced number of Part B cases continues a trend that we have seen since the start of the COVID-19 pandemic.

Total Number of Approved Cases 7/1/21-6/30/22

|  | Projected | Actual | Diff | \% Diff |
| :---: | :---: | :---: | :---: | :---: |
| B: RECA | 125 | 140 | 15 | 12\% |
| B: BD \& BS | 66 | 30 | (36) | -55\% |
| B: CS | 368 | 342 | (26) | -7\% |
| B: CNSEC | 830 | 729 | (101) | -12\% |
| B: CN | 346 | 171 | (175) | -51\% |
| Part B Total | 1,735 | 1,412 | (323) | -19\% |
| Part E | 2,484 | 2,863 | 379 | 15\% |

## Cash Flow

Overall, the revised cash flow projection for Fiscal Year 2022 is very similar to the amount projected as of $9 / 30 / 2021$, but with higher compensation than projected for Part $E$ and less than projected for Part B.

## Benefit Payments FY 2022

|  | Actual 9 month |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Projected @ 9/2021 |  | $+\operatorname{Proj} 3 \mathrm{mo}$ |  | \$ Difference | Diff |
| Part B Compensation | \$ | 252,062,543 | \$ 228,145,921 | \$ | (23,916,622) | -9\% |
| Part E Compensation |  | 375,316,977 | 446,002,521 |  | 70,685,544 | 19\% |
| Medical Payments |  | 1,174,173,337 | 1,165,000,000 |  | $(9,173,337)$ | -1\% |
| Total | \$ | 1,801,552,856 | \$1,839,148,441 | \$ | 37,595,586 | 2\% |

## The EEOICPA Model

The EEOICPA analysis consists of the following steps:

1. Organize and aggregate the data

## Compensation Benefits

2. Estimate the number of future new cases approved
3. Estimate the average compensation payout per approved case
4. Determine the payout patterns to estimate the compensation cash flow by year

## Medical Benefits

5. Estimate the percentage of cases eligible for medical benefits
6. Remove double counting - cases can be approved for both Part B and Part E
7. Apply mortality assumptions to determine the number eligible for medical benefits
8. Estimate the number of individuals eligible for medical benefits
9. Estimate the average medical costs and future inflation rates
10. Calculate the total expected medical payments
11. Discount the future payments to $9 / 30 / 2022$

These steps are described in detail in the next sections.

## 1: Organize and Aggregate the Data

The EEOICPA analysis is performed using detailed claim-level data extracts provided by the DOL. Data provided includes information on medical payments by case, compensation payments by claim and case, claim disposition status (e.g., approved, denied, pending decision, etc.), and employee data such as date of birth, sex, date of death (if known), and survivor information.

The data provided for this analysis consists of a series of text data files that were imported into a database for further analysis and manipulation. The source data includes the following tables:

| Table Name | Description |
| :--- | :--- |
| Bp history | History of medical payments by case |
| Case_main | Employee information by case, includes RECA indicator |
| Causation | All causation records, includes SEC identifier |
| Claimant | Claim information included type of claim and filing dates |
| Employment | Employment information for employees, including worksite ID |
| FD | Final decision table by case, identifies acceptance/denial of filed <br> claims |
| Medical | Medical information by case, includes disease type |
| Payment_mart | History of compensation payments by claim |
| RECA_eft | Additional RECA payments (electronic funds transfer) |
| RECA_paper_check | Additional RECA payments (paper check) |

The data was then organized through a series of database queries to create summarized tables of new entrants, compensation payments, medical payments, and claims filed by living employees. These summarized tables are checked against the EEOICP Program Statistics ${ }^{2}$ (as shown in the table below), and then brought into the EEOICPA model to begin the analysis.

## Comparison to EEOICP Program Statistics

Website: https://www.dol.gov/owcp/energy/regs/compliance/weeklystats.htm
The data on this website is updated weekly, and shows cumulative data since the inception of the program.

|  | Raw Data @ | 7/1/2022 |  | DOL website as of 7/4/2022 |  |  | Difference between raw data and 7/4/2022 website data |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \# Cases |  |  | \# Cases |  |  | \# Cases |  |
|  | Approved |  | Payments | Approved |  | Payments | Approved | Payments |
| Part B Compensation | 59,232 | \$ | 7,484,539,367 | 59,170 | \$ | 7,484,539,367 | 0.105\% | 0.000\% |
| Part E Compensation | 55,044 |  | 6,000,968,835 | 54,900 |  | 6,001,091,335 | 0.262\% | -0.002\% |
| Medical |  |  | 8,103,347,153 |  |  | 8,124,188,974 |  | -0.257\% |
| Total |  |  | 21,588,855,355 |  |  | 21,609,819,676 |  | -0.097\% |

[^2]
## 2: Estimate the number of Future Approved Cases

To estimate the number of cases that will be newly approved in the future, the historical number of newly-approved cases by quarter is determined in total for Part E and by governing disease for Part B. Part B is split out by governing disease because the compensation payment amounts are different by governing disease for Part B.

For Part B, an exponential decay model is then fit to the recent history, minimizing the sum of squared errors between the actual data and the fitted data, to determine the parameters with the best fit. Judgment is used to determine how many quarters of recent history should be incorporated into the fit model, as the rate of decay differs somewhat over time. For Part E, cases have been generally increasing, so significant actuarial judgment is required to estimate the timing and amount of future decreases in reporting.

The exhibits on the following pages show a graph of the quarterly history of newly-approved cases, the modeled fit line, as well as the assumed projections (current and prior). Significant actuarial judgment was used in making these projections, in light of what was believed to be temporarily depressed approval levels as a result of COVID-19 impacts. Hence the projection will not always coincide with the modeled fit line. We find the selected projections to be reasonable and appropriate.

Part B: RECA

## Part B: Beryllium Disease

## Part B: Beryllium Sensitivity

## Part B: Chronic Silicosis

Selected Decay Rates:

|  | $\underline{2022}$ | $\underline{2021}$ |
| :--- | :--- | :--- |
| Quarterly | $1.0 \%$ | $1.0 \%$ |
| Annual | $3.9 \%$ | $3.8 \%$ |

Selected Decay Rates:

|  | $\underline{2022}$ | $\underline{2021}$ |
| :--- | :--- | :--- |
| Quarterly | $2.3 \%$ | $2.3 \%$ |
| Annual | $8.9 \%$ | $8.9 \%$ |

Due to the recent increase in approved cases, a curve was not fit to the historical data for Part B Chronic Silicosis. Instead, 85 new cases per quarter is projected for the next eight quarters, with a $2 \%$ quarterly decay going forward at that point.

## Part B: Cancer SEC

## Part B: Cancer Non-SEC

## Part E

Selected Decay Rates:

|  | $\underline{2022}$ | $\underline{2021}$ |
| :--- | :--- | :--- |
| Quarterly | $1.7 \%$ | $1.8 \%$ |
| Annual | $6.6 \%$ | $7.0 \%$ |

For Cancer SEC, a decay model is fit to history, excluding 2020 and 2021, to estimate future decay rates. This method does not explicitly assume any future new SEC class designations.

Selected Decay Rates:

|  | $\underline{2022}$ | $\underline{2021}$ |
| :--- | :--- | :--- |
| Quarterly | $1.0 \%$ | $0.9 \%$ |
| Annual | $3.9 \%$ | $3.6 \%$ |

The trendline was based on precovid data only.

Due to the recent dramatic shifts in approved cases, a curve was not fit to the historical data for Part E. Instead, 716 new cases per quarter is projected for the next four quarters with a $2 \%$ quarterly decay subsequent to that point.

## 3: Estimate the average compensation payment per case

## Part B Compensation

For Part B, the compensation benefit is paid out as a lump sum. The amount of the benefit varies by governing disease as follows:

RECA (Non-DOJ portion) $\$ 50,000$
RECA (DOJ portion) $\$ 100,000$
Beryllium Disease, Cancer, Chronic Silicosis \$150,000
Beryllium Sensitivity (Part B) \$0
Under Part B, Beryllium Sensitivity cases are approved for medical benefits only. They do not receive compensation benefits. If the condition develops into Beryllium Disease, the case would then be eligible for compensation benefits.

## Part E Compensation

Part E cases are eligible for wage loss benefits, impairment benefits and survivor benefits subject to a maximum payment of $\$ 250,000$ total compensation for the employee and survivor combined.

For Part E, historically less than $30 \%$ of the ultimate compensation benefits are paid within one fiscal year of approval. This is due to the nature of the benefit payments. Employee claimants can file for additional wage or impairment payments subsequent to the initial case approval, and the survivors of the employee may be eligible to receive a lump sum benefit upon the death of the employee years after the initial case approval.

A cradle-to-grave cost estimate is needed, to apply to future new entrants. Because of the development of payments over time, a triangle squaring approach is employed where the compensation payments are organized into a triangle by first approval quarter and subsequent payment quarters. Historical relationships between quarters were then measured and projected forward to indicate ultimate payments by approval quarter from 2005 to the present. An increase in ultimate payments has been observed starting with cases approved in FY 2014, The selected ultimate is being modeled as a flat amount prior to that point, with a $6.1 \%$ trend following that point. The projections include this trend until the maximum of $\$ 250,000$ is reached.

## Part E Average Compensation per case

Cases approved prior to FY 2014: \$120,000
Cases approved FY 2014-2025: \$120,000 * (1.061) ^(FY - 2013)
Cases approved FY 2026 or later: $\$ 250,000$ (maximum benefit)
For more detail on the triangle development analysis, see Appendix 3.

## 4: Payout patterns

Multiplying the number of cases from Step 2 times the average compensation benefit payment per case will determine the total amount of compensation benefit for new cases.

The next step is to estimate cash flow by fiscal year. To estimate the cash flow, it is necessary to know the timing of the benefit payments.

The historical data shows that the majority of the Part B cases pay the full amount of the compensation benefit within the same fiscal year as the case approval.

## Part B Compensation Payout Pattern

Year 1 100\%

The compensation payment triangle analysis was used to estimate the payout pattern for Part E benefits:

## Part E Compensation Payout Pattern

| Year |  | Paid |
| ---: | :--- | :--- |
| Year 1 |  | $27.0 \%$ |
| Year 2 | $25.6 \%$ |  |
| Year 3 | $6.6 \%$ |  |
| Year 4 | $6.4 \%$ |  |
| Year 5 | $4.5 \%$ |  |
| Year 6 | $4.2 \%$ |  |
| Year 7 | $3.6 \%$ |  |
| Year 8 | $3.1 \%$ |  |
| Year 9 | $3.0 \%$ |  |
| Year 10 | $2.6 \%$ |  |
| Year 11 | $2.3 \%$ |  |
| Year 12 | $2.4 \%$ |  |
| Year 13 | $2.2 \%$ |  |
| Year 14 | $1.2 \%$ |  |
| Year 15-25 | $0.5 \%$ |  |

For more detail on the payment pattern analysis, please see Appendix 3.

## 5: Estimate the number of cases eligible for medical benefits

The next step in the process is to estimate the future medical payments.
Only the cases in which an approved claim was filed by an employee are eligible for medical benefits. The pool of individuals eligible to receive medical benefits includes both existing and newly approved cases that were filed by an employee (as long as the employee is still alive).

Historical ratios were used to select the percentage of future cases expected to contain an approved claim filed by an employee (and thus eligible for medical benefits).

|  | RECA | BD | BS | CS | CN SEC | CN Non SEC | Part E |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Prior | 51\% | 63\% | 100\% | 80\% | 33\% | 39\% | 52\% |
| 2008 | 59\% | 64\% | 99\% | 83\% | 28\% | 46\% | 56\% |
| 2009 | 59\% | 64\% | 100\% | 59\% | 26\% | 54\% | 58\% |
| 2010 | 59\% | 73\% | 100\% | 69\% | 33\% | 57\% | 60\% |
| 2011 | 61\% | 69\% | 100\% | 67\% | 28\% | 61\% | 62\% |
| 2012 | 64\% | 68\% | 100\% | 69\% | 34\% | 59\% | 60\% |
| 2013 | 73\% | 67\% | 100\% | 100\% | 41\% | 60\% | 65\% |
| 2014 | 63\% | 78\% | 100\% | 100\% | 42\% | 69\% | 69\% |
| 2015 | 66\% | 78\% | 100\% | 82\% | 47\% | 65\% | 71\% |
| 2016 | 59\% | 70\% | 100\% | 84\% | 51\% | 63\% | 75\% |
| 2017 | 60\% | 80\% | 100\% | 89\% | 52\% | 66\% | 76\% |
| 2018 | 64\% | 76\% | 99\% | 93\% | 57\% | 72\% | 79\% |
| 2019 | 52\% | 70\% | 100\% | 95\% | 61\% | 73\% | 82\% |
| 2020 | 66\% | 81\% | 100\% | 94\% | 59\% | 82\% | 85\% |
| 2021 | 53\% | 77\% | 100\% | 94\% | 66\% | 83\% | 89\% |
| Selected | 59\% | 86\% | 100\% | 94\% | 66\% | 80\% | 90\% |

The selected ratios are then applied to future approved cases in all future years, to estimate the number of future cases that will be eligible for medical benefits.

## 6: Remove double counting

Cases can be approved for Part B alone, Part E alone, or for both Part B and Part E. Cases approved for either Part are eligible to receive medical benefits. The number of approved cases is being projected separately by Part, so the total count of approved cases will count many, but not all, of the individuals twice (once for Part B and once for Part E). Historical ratios are used to determine how the approved cases need to be reduced in order to convert the number of approved cases to the number of individuals eligible for medical benefits.

Because the approval decisions are made separately for each Part (for example, a case could receive approval for Part B and then months or years later receive approval for Part E), a reduction in the case count is made for the assumption that some of the newly approved cases will have already been approved for the other Part and thus are already included in the count of individuals eligible for medical benefits.

It is assumed that $12 \%$ of newly-approved Part B cases have already been approved for Part E, and that $0.5 \%$ of newly-approved Part E cases have already been approved for Part B.

| Fiscal Year | Part B Cases Filed by an <br> employee that had already <br> been accepted as Part E | Part E Cases Filed by an <br> employee that had already <br> been accepted as Part B |
| ---: | ---: | ---: |
| 2008 | $2.5 \%$ | $16.1 \%$ |
| 2009 | $5.9 \%$ | $6.1 \%$ |
| 2010 | $10.2 \%$ | $1.3 \%$ |
| 2011 | $9.0 \%$ | $1.4 \%$ |
| 2012 | $10.5 \%$ | $1.5 \%$ |
| 2013 | $7.8 \%$ | $0.8 \%$ |
| 2014 | $8.8 \%$ | $0.7 \%$ |
| 2015 | $8.9 \%$ | $0.8 \%$ |
| 2016 | $8.6 \%$ | $0.8 \%$ |
| 2017 | $9.7 \%$ | $0.6 \%$ |
| 2018 | $12.3 \%$ | $0.7 \%$ |
| 2019 | $12.2 \%$ | $0.4 \%$ |
| 2020 | $11.8 \%$ | $0.3 \%$ |
| 2021 | $13.1 \%$ | $0.5 \%$ |
| Selected for 2022 and Subsequent | $12.0 \%$ | $0.5 \%$ |

Additionally, some cases will receive an approval for both Part B and Part E at the same time, or in the same fiscal year. A reduction must be made so that these two approved case parts are not treated as two separate individuals eligible for medical benefits. Historically, approximately $80 \%$ of the employee-filed Part B cases also are approved for Part E at the same time. It is assumed that this ratio will continue into the future.

| Fiscal Year | Part B Cases Filed by an <br> employee where Part E is <br> approved in the same year |
| ---: | ---: |
| 2008 | $82.2 \%$ |
| 2009 | $80.5 \%$ |
| 2010 | $79.6 \%$ |
| 2011 | $69.3 \%$ |
| 2012 | $73.5 \%$ |
| 2013 | $81.3 \%$ |
| 2014 | $78.0 \%$ |
| 2015 | $78.9 \%$ |
| 2016 | $78.5 \%$ |
| 2017 | $77.9 \%$ |
| 2018 | $77.3 \%$ |
| 2019 | $80.5 \%$ |
| 2020 | $82.1 \%$ |
| 2021 | $80.8 \%$ |
| Selected for 2022 and Subsequent | $80.0 \%$ |

To convert the number of approved employee-filed cases into the number of employee-filed cases eligible for medical benefits, the number of newly-approved employee-filed Part B cases is reduced by $12 \%$, the number of newly-approved employee-filed Part E cases is reduced by $0.5 \%$ (as shown on the previous page) and then the newly-approved employee-filed Part B cases is further reduced by $80 \%$ to estimate the total number of cases eligible for medical benefits by year.

## 7: Mortality

Because the EEOICPA program is not always notified when a participant is deceased, the number of individuals that are still alive and eligible for medical benefits must be estimated, using mortality assumptions. The mortality assumptions in the model are reviewed every three years. The 2022 liability estimate uses the Private Retirement Plans (Pri-2012) Male Disabled Retiree mortality table, published by the Society of Actuaries in October 2019. The previous mortality table was the Society of Actuaries Retirement Plan (RP-2014) Male Disabled Retiree table, published in 2014. This resulted in an increase in the mortality rates.

For purposes of mortality, the model assumes that employees are age 72 at the time that an employeefiled case is first approved ${ }^{3}$.

## Average Age of Employee at First Approval Date

| Part B |  |  | Part E |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Avg Age |  |  | Avg Age |
| FY | Count | at Award | FY | Count | at Award |
| 2013 | 1,783 | 70.8 | 2013 | 2,100 | 70.2 |
| 2014 | 1,291 | 72.7 | 2014 | 1,580 | 71.3 |
| 2015 | 1,137 | 72.8 | 2015 | 1,274 | 72.2 |
| 2016 | 1,176 | 73.7 | 2016 | 1,373 | 72.4 |
| 2017 | 1,255 | 73.2 | 2017 | 1,683 | 72.4 |
| 2018 | 1,246 | 72.2 | 2018 | 1,658 | 71.5 |
| 2019 | 1,286 | 72.4 | 2019 | 1,817 | 71.2 |
| 2020 | 1,421 | 71.9 | 2020 | 2,243 | 70.3 |
| 2021 | 986 | 71.3 | 2021 | 2,089 | 69.4 |
| 2022 | 837 | 71.8 | 2022 | 2,004 | 68.8 |
| Average 201 | 2022 | 72.3 | Average 201 | 2022 | 71.0 |

$\begin{array}{llll}\text { Average 2013-2022 } & 72.3 & \text { Average 2013-2022 } & 71.0\end{array}$

[^3]
## 8: Estimate the Number of Individuals eligible for medical benefits

The total number of individuals eligible to receive medical benefits each year is then the number of individuals with prior case approvals, assumed to be still alive, plus the number of newly-approved cases (adjusted to remove double counting of cases approved for both Parts) minus the number of expected deaths, as shown below:

## ESTIMATED LIABILITY FOR EEOICPA <br> AS OF SEPTEMBER 30, 2022

ESTIMATED NUMBER OF INDIVIDUALS ELIGIBLE FOR MEDICAL EXPENSES

| Fiscal Year | New Cases Eligible for Medical Expenses |  |  |  |  |  | Part E | Remove double counting: |  |  | Net new <br> Individuals | Assumed <br> \# Deaths | Total \# Individuals Eligible | Average \# Individuals Eligible |

| $(141)$ | $(12)$ | $(941)$ | 2,484 | $(2,0$ |
| $(133)$ | $(11)$ | $(884)$ | 2,293 | $(2,1$ |

## 9: Estimate Average Medical Payments and Inflation Rates

The total medical payments each year are divided by the average number of eligible individuals to determine the average medical payment per eligible individual for each year.

Estimated Average Medical Payment in FY 2022 \$57,575

Medical inflation rates are then selected for future years.
The average medical inflation rates for future years $1-5$ were selected based on guidance from OWCP management regarding expected cost increases in the short term. Medical inflation rates for 6 years and later are the CPI-Medical inflation rates from the OMB Economic Assumptions for the FY 2023 Midsession Review.

| Annual Medical Inflation, Future Year 1 | $3.8 \%$ |
| :--- | :--- |
| Annual Medical Inflation, Future Year 2 | $6.7 \%$ |
| Annual Medical Inflation, Future Year 3 | $6.0 \%$ |
| Annual Medical Inflation, Future Year 4 | $6.6 \%$ |
| Annual Medical Inflation, Future Year 5 | $6.1 \%$ |
| Annual Medical Inflation, Future Year 6+ | $3.9 \%$ |

## 10: Calculate the total expected Medical Payment by year

The total number of individuals eligible is multiplied by the average medical cost per eligible individual to determine the expected medical payments by fiscal year, as shown below.

| FY | Average \# Individuals Eligible <br> (1) | Average <br> Medical <br> Cost per <br> Eligible <br> Individual <br> (2) | Total Undiscounted Medical Payments (3) |
| :---: | :---: | :---: | :---: |
| 2023 | 20,955 | \$ 59,763 | \$ 1,252,362,010 |
| 2024 | 21,493 | 63,767 | 1,370,564,119 |
| 2025 | 21,801 | 67,593 | 1,473,584,810 |
| 2026 | 21,890 | 72,055 | 1,577,249,706 |
| 2027 | 21,791 | 76,450 | 1,665,940,693 |
| 2028 | 21,535 | 79,431 | 1,710,555,135 |
| 2029 | 21,146 | 82,529 | 1,745,169,643 |
| 2030 | 20,646 | 85,748 | 1,770,343,195 |
| 2031 | 20,053 | 89,092 | 1,786,529,736 |
| 2032 | 19,382 | 92,567 | 1,794,127,965 |
| 2033 | 18,648 | 96,177 | 1,793,529,777 |
| 2034 | 17,864 | 99,928 | 1,785,153,502 |
| 2035 | 17,043 | 103,825 | 1,769,475,241 |
| 2036 | 16,195 | 107,874 | 1,747,051,650 |
| 2037 | 15,333 | 112,081 | 1,718,521,459 |
| 2038 | 14,466 | 116,452 | 1,684,592,409 |
| 2039 | 13,604 | 120,994 | 1,646,023,669 |
| 2040 | 12,756 | 125,713 | 1,603,602,106 |
| 2041 | 11,929 | 130,615 | 1,558,125,939 |
| 2042 | 11,130 | 135,709 | 1,510,384,828 |
| 2043 | 10,362 | 141,002 | 1,461,125,556 |
| 2044 | 9,631 | 146,501 | 1,411,022,776 |
| 2045 | 8,939 | 152,215 | 1,360,660,429 |
| 2046 | 8,287 | 158,151 | 1,310,525,580 |
| 2047 | 7,674 | 164,319 | 1,261,011,300 |
| After 2047 |  |  | 15,244,918,443 |
| Total future undiscounted |  |  | \$ 55,012,151,677 |

## 11: Discount the cash flows to $9 / 30 / 2022$

The projected cash flows by fiscal year for 2023 through 2082 are then discounted back to 9/30/2022.
The discount rates for compensation and medical payments are determined based on the duration of the liabilities. The rate used for discounting corresponds to the point on the Treasury yield curve for that duration. The Treasury curve being used is based on a five-year averaging of the U.S. Department of Treasury's Yield Curve for Treasury Nominal Coupon Issues.

Discount rate for compensation payments
Discount rate for medical payments
2.068\%
2.325\%

## Hindsight Opinion

The hindsight opinion adjusts the current liability estimate to be consistent with the liability estimate as of $9 / 30 / 2021$, removing periods that were not contemplated at that time, and adding back payments made between the previous date and the current date. This is a more valid indication of revisions in the liability estimate than comparing the year-over-year average.

The current hindsight estimate of liability as of $9 / 30 / 2021$ is $\$ 49.5$ billion, compared with a liability estimate of $\$ 43.0$ billion in the $9 / 30 / 2021$ actuarial report. This increase is mainly driven by an increase in the number of part E cases and an increase to the expectation of average Part E compensation benefit per case.

## Calculation of 9/30/2021 Hindsight Liability Opinion

(\$millions)

| Current Estimated Liability as of 9/30/2022 | \$ | 48,290 |
| :---: | :---: | :---: |
| Minus liability for additional exposure from 10/1/2021-9/30/1022 |  | 483 |
| Plus payments in FY 2022 (excluding payment for current exposures) |  | 1,839 |
| Discount back to 9/30/2021 |  | $(1,149)$ |
| Hindsight Liability Estimate as of 9/30/2021 | \$ | 49,462 |

To arrive at the hindsight estimate, the liability for additional exposure was estimated at $1 \%$ of the total liability. The total estimate is not calculated at the employment year level.

## Appendix 1: Reconciliation of Change in Liability Estimate

Liability Estimate as of 9/30/21 (\$millions, discounted to 9/30/21)....................... \$43,038

1. FY 2022 roll off of estimate
2. FY 2082 roll on to estimate

1
3. Discount to $9 / 30 / 22$ instead of $9 / 30 / 21 \quad 1,005$
4. Revised number of Part E Approvals 3,826
5. Change in Part E compensation benefit per case 2,045
6. Change to mortality table $(1,552)$
7. Revised percent filed by employee 930
8. Revised medical cost estimate 330
9. Revised percentage approval for both Part B and Part E (265)
10. Discount rates as of 2022233
11. Revised number of Part B Approvals 66
12. Combination/other 414

Total Change 5,252

Liability Estimate as of 9/30/2022 (\$millions, discounted to 9/30/22)................... \$48,290

## Appendix 2: Summary of EEOICPA Model Assumptions

|  | as of 9/30/2022 | as of 9/30/2021 |
| :---: | :---: | :---: |
| Compensation Benefit Amounts |  |  |
| RECA Benefit (Non DOJ) | \$ 50,000 | \$ 50,000 |
| RECA Benefit (on behalf of DOJ) | \$ 100,000 | \$ 100,000 |
| Part B Benefit (lump sum) | \$ 150,000 | \$ 150,000 |
| Part E Benefit, piecewise: |  |  |
| Through 2013 | \$ 120,000 | \$ 157,000 |
| post-2013 annual trend | 6.1\% | - |
| cap | \$ 250,000 | \$ 250,000 |
| Discount Rates |  |  |
| Discount Factor for Compensation | 2.068\% | 2.120\% |
| Discount Factor for Medical | 2.325\% | 2.384\% |
| Discount Period | $\begin{aligned} & 60 \text { Future Years } \\ & 2023-2082 \end{aligned}$ | $\begin{aligned} & 60 \text { Future Years } \\ & 2022-2081 \end{aligned}$ |
| Duration |  |  |
| Average Compensation Duration (years) | 12.7 | 12.3 |
| Average Medical Duration (years) | 18.6 | 19.3 |
| Inflation Rates |  |  |
| Annual Inflation for Part B Compensation | 0.0\% | 0.0\% |
| Annual Inflation for Medical, Future Year 1 | 3.8\% | 6.0\% |
| Annual Inflation for Medical, Future Year 2 | 6.7\% | 5.8\% |
| Annual Inflation for Medical, Future Year 3 | 6.0\% | 5.6\% |
| Annual Inflation for Medical, Future Year 4 | 6.6\% | 5.5\% |
| Annual Inflation for Medical, Future Year 5 | 6.1\% | 3.9\% |
| Annual Inflation for Medical, Future Years 6+ | 3.9\% | 3.9\% |
| Mortality |  |  |
| Mortality Table | PRI-2012 Male Disabled | RP-2014 Male |
| Projection Scale | Retiree <br> No projection | Disabled Retiree <br> No projection |
| New Cases |  |  |
| Eligible for medical benefits if filed by employee | 100\% | 100\% |
| Average age of employee when case approved ${ }^{4}$ | 72 | 72 |

${ }^{4}$ The exception to this assumption is for employees for which the first case approval date was more than 15 years ago. For these employees, the model uses a weighted average of the actual age at approval.

| Percent of new cases filed by employee |  |  |
| :--- | ---: | ---: |
| RECA (Part B) | $59 \%$ | $58 \%$ |
| BD (Part B) | $86 \%$ | $73 \%$ |
| BS (Part B) | $100 \%$ | $100 \%$ |
| CS (Part B) | $94 \%$ | $95 \%$ |
| CN SEC (Part B) | $66 \%$ | $61 \%$ |
| CN Non SEC (Part B) | $80 \%$ | $80 \%$ |
| Part E | $90 \%$ | $86 \%$ |

Probability that the newly-approved case is already eligible for medical benefits

| Part B | $12.0 \%$ | $10.9 \%$ |
| :--- | ---: | ---: |
| Part E | $0.5 \%$ | $0.7 \%$ |
| Part B cases where Part E approved same year | $80.0 \%$ | $79.0 \%$ |

| Quarterly Decay in new case approval |  |  |
| :--- | :--- | :--- |
| RECA (Part B) | $1.6 \%$ | $1.6 \%$ |
| BD (Part B) | $1.0 \%$ | $1.0 \%$ |
| BS (Part B) | $2.3 \%$ | $2.3 \%$ |
| CS (Part B) | $2.0 \%$ | $2.0 \%$ |
| CN SEC (Part B) | $1.7 \%$ | $1.8 \%$ |
| CN Non SEC (Part B) | $1.0 \%$ | $0.9 \%$ |
| Part E | $2.0 \%$ | $2.0 \%$ |

## Payment Pattern: Part B Compensation

Year

| $\%$ Paid |  |
| ---: | ---: |
| $100 \%$ | $\frac{\text { \% Paid }}{100 \%}$ |

## Payment Pattern: Part E Compensation

| Year | \% Paid | \% Paid |
| :---: | :---: | :---: |
| Year 1 | 27.0\% | 28.5\% |
| Year 2 | 25.6\% | 25.3\% |
| Year 3 | 6.6\% | 6.4\% |
| Year 4 | 6.4\% | 5.9\% |
| Year 5 | 4.5\% | 4.3\% |
| Year 6 | 4.2\% | 4.4\% |
| Year 7 | 3.6\% | 3.8\% |
| Year 8 | 3.1\% | 3.1\% |
| Year 9 | 3.0\% | 2.9\% |
| Year 10 | 2.6\% | 2.7\% |
| Year 11 | 2.3\% | 2.3\% |
| Year 12 | 2.4\% | 2.2\% |
| Year 13 | 2.2\% | 1.9\% |
| Year 14 | 1.2\% | 1.1\% |
| Year 15-25 | 0.5\% | 0.5\% |

## Prior Year Cohort

| Average Age at Award | 69 | 68 |
| :--- | :--- | :--- |
| Average Age at Start of FY 2008 | 72 | 71 |
| Average Part E pmt yr for FY2023 | 18 | 17 |

## Appendix 3: Part E Compensation Payments

A triangle approach is employed to estimate the Part E compensation payout patterns. The compensation payments are organized into a paid triangle by first approval quarter and payment quarter. Historical relationships between quarters were then measured and projected forward to estimate the ultimate payments by approval quarter from 2005 to the present.

The exhibits in the following pages show the triangle of payment amounts, the age-to-age factors and the selection of ultimate payments.

## Loss Development Factor (LDF) Method

The LDF method applies a loss development factor to paid cases by period (in this case, approval quarter) to arrive at an estimate of the ultimate losses incurred in that period. The loss development factor varies by the maturity of the period. Loss development factors are selected based on review of historical development and actuarial judgment to consider items such as credibility of observed data and changing patterns within the aggregated data.

Part E Compensation
Summary of Results: Paid Compensation

|  |  | Current Paid | Paid LDF | Selected <br> Ultimate <br> Payments | Ultimate Count | Ultimate <br> Average <br> Payment | Selected <br> Ultimate <br> Average <br> Payment |

## Appendix 4: Undiscounted Liability Estimate

As of $9 / 30 / 2022$, the undiscounted liability for future EEOICPA benefit payments is projected at $\$ 68.6$ billion. The future compensation payments are projected at $\$ 13.6$ billion, and the future medical payments are projected at $\$ 55.0$ billion, on an undiscounted basis.

[^4]Totals may not equal sum of components because of independent rounding

## Appendix 5: Ranges

A range of reasonable estimates was developed, to help describe the level of uncertainty surrounding the EEOICPA liability estimate. This range includes Low, High and Estimated values, as shown. Significant uncertainty exists around these estimates, and the reader of this report should not confuse any level of reported precision in the estimates contained in this report to be indicative of predictive accuracy. The numbers of new case approvals have been increasing dramatically since 2015, as have the utilization rates for medical services. It is not likely that the increases will continue indefinitely, but estimating the timeframe in which they will level off/decrease, and by how much, is a very subjective exercise.

To determine a range of reasonable liability estimates, key assumptions were varied within reasonable high and low values that another actuary might be likely to select, if they were conducting an independent valuation of the liability. It is important to note that the range shown is one that is considered reasonable (i.e. an estimate from another actuary making reasonable assumptions would fall within this range). The actual outcome could still be outside of this range. The projection goes out 60 years, and there is much that cannot be accurately foreseen.

A range was also calculated around next year's hindsight value and the cash flow for FY 2022, for purposes of monitoring the EEOICPA liability model's performance.

|  | -24\% |  |  |  | 81\% |

EEOICPA Liability Report as of 9/30/2022

## Reasonable Range of Liability Estimates

## Hindsight Estimate Range Calculation

1 - The low and high values of the assumptions represent potential estimates that other actuaries would be likely to provide using different, yet reasonable assumptions than the assumptions used in the EEOICPA 9/30/2022 actuarial report
2 - The Medical Cost Inflation (utilization of services and unit cost inflation) and the number of future Part E approvals are the major drivers of the uncertainty around the liability estimate
3 - Because it is unlikely that a reasonable actuary would select every assumption at the low end or the high end, the combination of assumptions is calculated as the square root of the sum of each of the differences squared.

[^0]:    The discount rates used for the 9/30/2022 estimate were $2.068 \%$ for compensation and $2.325 \%$ for medical. Totals may differ slightly due to rounding.

[^1]:    ${ }^{1}$ Reflects projected cash flow through 2082
    Totals may not equal sum of components because of independent rounding

[^2]:    ${ }^{2}$ The expectation is not that the results will match exactly to the website, but that they will be reasonably close. Due to the fact that the data may reported a few days apart, and that there may be slightly differing methodologies for determining the number of approved cases, a small amount of variance is expected.

[^3]:    ${ }^{3}$ The exception to this assumption is for employees for which the first case approval date was more than 15 years ago. For these employees, the model uses a weighted average of the actual age at approval.

[^4]:    ${ }^{5}$ Reflects projected cash flow through 2082
